

# Supplemental Figure

**Fig. S1 Differential expression analysis indicates AKTi significantly alters expression of most genes regulated by SAL.** Normalized log<sub>2</sub> fold change and significance of expression by the treatments of (A) *CDKN2B* encoding p15, (B) *KLK3* encoding PSA, (C) *TMPRSS2* and (D) *FKBP5* in both LNCaP and C4-2 cells. (n=3), \*\*\*padj≤0.001, \*\*\*\*padj≤0.0001
