

Supplementary Figure S3.

(a)

(b)

**Supplementary Figure S3. Hsp70 interacts with PKA-C $\alpha$  in A9 and A11 cells.** (a) Hsp70 expression is demonstrated in all cell lines. Following co-immunoprecipitation with PKA-C $\alpha$  antibody, Hsp70 is identified in the protein complexes from A9 and A11. (b) Full-length blot represented in panel A.
