

## Data Sharing Statement

<b>Article Info</b>	<a href="https://dx.doi.org/10.21037/atm-21-6868">https://dx.doi.org/10.21037/atm-21-6868</a>	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	All the experiment data will be shared. To our knowledge, FNDC5 overexpression promotes the survival rate of BMSCs in a rat cerebral infarction model has seldom been provided in previous studies.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan and protocol about lentivirus construction will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	No limits.
7	To whom will you share the data?	Neurologists and stem cells researchers who are interested in studies of stem cell therapy for cerebral infarction.
8	For what type of analysis or purpose?	For analysis to evaluate the benefits of stem cell therapy for cerebral infarction.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: liling3@mail.sysu.edu.cn.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
