

Supplementary Figure 1: Nocturnal oximetry parameters according to altitude. (A) TE, number of events. (B) TTE, total time of events. (C) ATE, Average time per event. (D) ODI, Oxygen desaturation index of 4%. Data are presented as a box-and-whisker plot. Significant differences: * $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$ compared to the population at 0 m.
