

Supplementary Information

Four concurrent feedforward and feedback networks with different roles in the visual cortical hierarchy

Elham Barzegaran, Gijs Plomp

S1 Fig. Laminar power spectral densities per area. **a**, shows visually induced power spectral density (PSD; Morlet wavelet) with respect to pre-stimulus time, for high-contrast stimuli. **b**, shows corresponding data for low-contrast stimuli. Underlying data: <https://osf.io/pqf7z/>
