

S1 Fig. Allelic frequencies for significant SNPs, for A - susceptibility (rs286914 and rs12329760) and B - severe response (rs657152 and rs11385942) to COVID-19 infection. No significant differences were found between Control group of Baixo Vouga cohort and Minho cohort for any of the tested SNPs; rs286914: p-value=0.54; rs12329760: p-value=0.06; rs657152: p-value=0.44. rs11385942 was not evaluated in Minho Cohort.
