

**S1 Table. COVID-19 associated SNPs description.** Ref. allele - reference allele. Alt. allele - alternative allele. A - adenine. C - cytosine. G - guanine. T - thymine. dupA - duplication of an adenine. V - valine. M - Methionine.

SNP	Position	Ref. allele	Alt. allele	Aminoacid alteration	Gene : Consequence	Clinical Significance
rs286914	chr11:34653124	G	A	No alteration	EHF : Intron Variant	Not Reported in ClinVar
rs12329760	chr21:41480570	C	T	V [GTG] > M [ATG]	TMPRSS2 : Missense Variant	Not Reported in ClinVar
rs657152	chr9:136139265	A	C,T	No alteration	ABO : Intron Variant	Not Reported in ClinVar
rs11385942	chr3:45876461	A	dupA	No alteration	LZTFL1 : Intron Variant	Not Reported in ClinVar
