

Composition of early life leukocyte populations in preterm infants with and without late-onset sepsis

Supporting Information

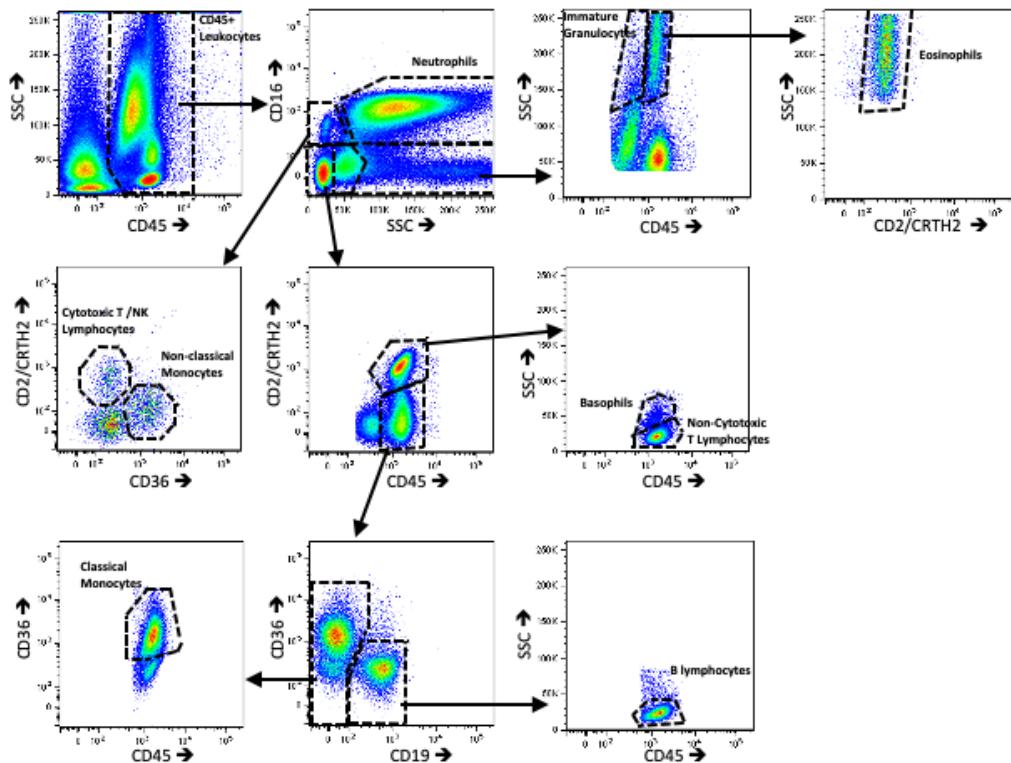

Figure S1. Leukocyte population gating strategy. Example plots of CD45⁺ leukocytes, neutrophils, basophils, immature granulocytes, eosinophils, classical and non-classical monocytes, non-cytotoxic and cytotoxic T/NK lymphocytes, and B lymphocytes from preterm infant peripheral blood.

Supplementary Table 1. Descriptive summaries of absolute counts and percentage of total CD45⁺ leukocyte populations in preterm infants with and without LOS. Median (95% CI) absolute counts ($\times 10^9/L$) are presented in the first row and frequencies (%) in the second row of each timepoint.
