

**Supplementary Table 3 | Summary of life span analysis for PEN2 and ATP6AP1 worms<sup>a,b</sup>** Values of mean lifespan and median lifespan, and numbers of worms counted (total, deaths and censored) in each lifespan experiments are shown. See also statistical analysis data ( $P$  values calculated by Mantel-CoX) comparing the lifespan of worms between different phenotypes treated with metformin.

Genotypes/ treatments	Mean life span (days)			Median life span (days)				P-value Vs saline control within each genotype (Mantel-CoX)		
	Estimated life span ± s.e.m.	95% confidence interval		Estimated life span ± s.e.m.	95% confidence interval					
		Lower bound	Upper bound		Lower bound	Upper bound	N <sup>c</sup>	N <sup>d</sup>	N <sup>e</sup>

<sup>a</sup>Independent repeats of each life span experiment were performed. Data from representative experiments are shown.

<sup>b</sup>Life span data sets within each panel of this table were done in parallel and statistical analyses was done within the data set.

<sup>c</sup>Number of worms scored (death events).

<sup>d</sup>Number of worms censored.

<sup>e</sup>Total number of worms.
