S1. Level of cytokines released after 24 h by a single stimulation

TNF- α (A) and IL-6 (B) levels were detected in culture supernatants of BMMC stimulated for 24 hours with LPS (1mg/ml), curdlan (100mg/ml), IgE/Ag or left un-treated (RPMI). N=3; statistical analysis were performed with one-way Anova with Dunnet correction (*= $p < 0,05$ **= $p < 0,01$; ***= $p < 0,001$).
