

Supplemental Table 2. Comparison of the proportion of patients with MoCA scores ≥ 26 points at 48 and 96 weeks of follow-up between the treatment group and the control group

	Treatment group		Control group	
	48weeks (n=22)	96weeks (n=22)	48weeks (n=16)	96weeks (n=16)
MoCA ≥ 26 (%)	11 (50.0) *	16 (72.7) #	1 (6.2)	1 (6.2)
MoCA < 26 (%)	11 (50.0)	6 (27.3)	15 (93.8)	15 (93.8)

*48 weeks of follow-up in treatment group vs 48 weeks of follow-up in control group, $p=0.012$

#96 weeks of follow-up in treatment group vs 96 weeks of follow-up in control group, $p<0.001$
