<u>Supplementary Figure 1.</u> **B cell profile of ASYMP and SYMP HSV-1 infected individuals:** PBMC of ASYMP and SYMP infected individuals were stained for percentage of IgG (CD19+ CD27+IgG+), IgM (CD19+ CD27+IgM+), and (IgA CD19+ CD27+IgA+) memory B cells. Graphs showing percentage of B cells, memory B cells, IgG, IgA and IgM memory B cells in ASYMP and SYMP HSV-1 infected individuals.
