### **Supplemental Material**

## **Gestational Perfluoroalkyl Substance Exposure and DNA Methylation at Birth and 12 Years of Age: A Longitudinal Epigenome-Wide Association Study**

Yun Liu, Melissa N. Eliot, George D. Papandonatos, Karl T. Kelsey, Ruby Fore, Scott Langevin, Jessie Buckley, Aimin Chen, Bruce P. Lanphear, Kim M. Cecil, Kimberly Yolton, Marie-France Hivert, Sharon K. Sagiv, Andrea A. Baccarelli, Emily Oken, and Joseph M. Braun

### **Table of Contents**

**Table S1.** Characteristics and maternal serum PFAS concentrations for participants with single or both measures of DNA methylation at birth and/or age 12 years in the HOME Study (Cincinnati, OH; Enrolled 2003-2006).

**Table S2.** Baseline and follow-up characteristics and maternal plasma PFAS concentrations in the Project Viva (eastern Massachusetts; Enrolled 1999-2002).

**Table S3.** Distribution of serum per- and polyfluoroalkyl substance (PFAS) concentrations (ng/mL) in pregnancy (n=291) in the HOME Study (Cincinnati, OH; Enrolled 2003-2006).

**Table S4.** Pearson correlation between log<sub>2</sub>-transformed serum per- and polyfluoroalkyl substance (PFAS) concentrations (ng/mL) in pregnancy (n=291) in the HOME study (Cincinnati, OH; Enrolled 2003-2006).

**Table S5.** Genes from statistically significant PFAS associated CpG sites and their potential human health implications in the HOME Study (Cincinnati, OH; Enrolled 2003-2006).

**Table S6.** A list of CpGs with p-value ≤0.001 provided by prior studies with the same direction of association and p-value <0.05 observed in the HOME Study (Cincinnati, OH; Enrolled 2003-2006).

**Figure S1.** Directed acyclic graph of potential confounders of the associations between serum PFAS concentrations in pregnancy and DNA methylation at birth and age 12 years in the HOME Study (Cincinnati, OH; Enrolled 2003-2006).

**Figure S2.** Box plot of serum per- and polyfluoroalkyl substance (PFAS) concentrations (ng/mL) in pregnancy in the HOME Study (Cincinnati, OH; Enrolled 2003-2006).

**Figure S3.** Quantile-quantile plots for the associations between gestational PFAS concentrations and repeated measures of DNA methylation in the HOME Study (Cincinnati, OH; Enrolled 2003-2006).

**Additional File-** Excel Document

**Table S1.** Characteristics and maternal serum PFAS concentrations for participants with single or both measures of DNA methylation at birth and/or age 12 years in the HOME Study (Cincinnati, OH; Enrolled 2003-2006).

Characteristics	Both (N= 135)	Single (N= 156)
	N (%) or Mean (SD)	N (%) or Mean (SD)
<b>Child sex</b>		
Girls	71 (53)	83 (53)
Boys	64 (47)	73 (47)
<b>Child age</b>	12.3 (0.7)	12.4 (0.6)
<b>Maternal serum cotinine (ng/mL)</b>		
<0.015 (Unexposed) <sup>a</sup>	37 (28)	59 (38)
0.015-<3 (Secondhand Tobacco Smoke Exposure)	88 (65)	82 (53)
≥3 (Active Smoking)	10 (7)	15 (9)
<b>Maternal race/ethnicity</b>		
White, non-Hispanic	83 (62)	101 (65)
Black, non-Hispanic	45 (33)	43 (28)
All others	7 (5)	12 (7)
<b>Annual household income</b>		
>\$80 K	40 (30)	45 (29)
\$40–80K	47 (35)	50 (32)
\$20–40K	22 (16)	30 (19)
<\$20K	26 (19)	31 (20)
<b>PFAS concentrations (ng/mL)</b>	Median (25 <sup>th</sup> , 75 <sup>th</sup> )	Median (25 <sup>th</sup> , 75 <sup>th</sup> )
PFOA	5.1 (3.6, 7.5)	5.9 (4.2, 8.2)
PFOS	13.3 (9.0, 17.4)	14.3 (10.1, 18.1)
PFHxS	1.2 (0.8, 2.3)	1.7 (1.0, 2.4)
PFNA	0.9 (0.7, 1.2)	1.0 (0.8, 1.3)

<sup>a</sup>Below detection limit. PFAS concentrations were measured in maternal serum at 16 weeks of pregnancy. Note: PFAS, perfluoroalkyl substances; PFOA, perfluorooctanoate; PFOS, perfluorooctane sulfonate; PFHxS, perfluorohexane sulfonate; PFNA, perfluorononanoate. Data were complete for all variables. PFAS concentrations below LOD were replaced with LOD/√2.

**Table S2.** Baseline and follow-up characteristics and maternal plasma PFAS concentrations in the Project Viva (eastern Massachusetts; Enrolled 1999-2002).

Characteristics	Baseline (N=371)	Follow-up (N=342)
	N (%)	N (%)
<b>Child sex</b>		
Female	175 (47)	163 (48)
Male	196 (53)	179 (52)
<b>Child race</b>		
White	263 (71)	229 (67)
Non-white	108 (29)	113 (33)
<b>Annual household income</b>		
>\$70,000	222 (60)	210 (62)
≤\$70,000	149 (40)	132 (38)
<b>Maternal smoking status</b>		
Smoked in pregnancy	42 (11)	39 (11)
Did not smoke in pregnancy	329 (89)	303 (89)
<b>PFAS concentrations (ng/mL) Median (25<sup>th</sup>, 75<sup>th</sup>) Median (25<sup>th</sup>, 75<sup>th</sup>)</b>		
PFOA	5.7 (4.1, 7.5)	5.2 (3.6, 7.2)
PFOS	25.6 (18.5, 34.5)	23.2 (16.9, 32.4)
PFHxS	2.3 (1.6, 3.8)	2.2 (1.5, 3.7)
PFNA	0.7 (0.5, 0.9)	0.6 (0.5, 0.9)

Note: PFOA, perfluorooctanoate; PFOS, perfluorooctane sulfonate; PFHxS, perfluorohexane sulfonate; PFNA, perfluorononanoate; mean and SD for child age at follow-up visit was 7.9 (0.8) years. No missing values (excluded in participant flow if missing exposure, outcome, covariate).

**Table S3.** Distribution of serum per- and polyfluoroalkyl substance (PFAS) concentrations (ng/mL) in pregnancy (n=291) in the HOME Study (Cincinnati, OH; Enrolled 2003-2006)

<b>PFAS</b>	<b>Minimum</b>	<b>25<sup>th</sup> Pctl</b>	<b>50<sup>th</sup> Pctl</b>	<b>75<sup>th</sup> Pctl</b>	<b>Maximum</b>
PFHxS	0.1	0.9	1.5	2.3	32.5
PFNA	0.3	0.7	0.9	1.2	2.9
PFOA	1.1	3.8	5.4	7.8	26.4
PFOS	1.4	9.6	13.7	18.0	57.2

**Table S4.** Pearson correlation between log<sub>2</sub>-transformed serum per- and polyfluoroalkyl substance (PFAS) concentrations (ng/mL) in pregnancy (n=291) in the HOME study (Cincinnati, OH; Enrolled 2003-2006).

	PFOA	PFOS	PFNA	PFHxS
PFOA	1.00	0.58	0.45	0.44
PFOS		1.00	0.50	0.63
PFNA			1.00	0.29
PFHxS				1.00

**Table S5.** Genes from statistically significant PFAS associated CpG sites and their potential human health implications in the HOME Study (Cincinnati, OH; Enrolled 2003-2006).

Gene	Description	PFAS	Phenotype
MAGI1	Membrane Associated Guanylate Kinase, WW and PDZ Domain Containing 1	PFOA	Breast cancer
KRT18	Keratin 18	PFOA	Prostate cancer; breast cancer-associated fibroblasts
SRPRB	Signal Recognition Particle Receptor Subunit Beta	PFOA	Pancreatic ductal adenocarcinoma
TNR	Tenascin R	PFOA	Neural development; brain cancer
SLC10A2	Solute Carrier Family 10 Member 2	PFOA	Alzheimer's disease; cholesterol metabolism
LOC102724050	Uncharacterized LOC102724050	PFOA	BMI
AGAP1	ArfGAP With GTPase Domain, Ankyrin Repeat and PH Domain 1	PFOA	Obesity; coronary artery disease
SERPINA5	Serpin Family A Member 5	PFOA	Kidney function; reproductive system; prostate cancers;
HPSE2	Heparanase 2 (Inactive)	PFOS	Breast cancer; type II diabetes mellitus
HIF1A	Hypoxia Inducible Factor 1 Subunit Alpha	PFNA	Pancreatic cancer; prostate cancer
C14orf101	Chromosome 14 Open Reading Frame 101	PFNA	Gastric cancer; non-Hodgkin lymphoma
RADIL	Rap Associating with DIL Domain	PFNA	Lung adenocarcinoma
DPAGT1	Dolichyl-Phosphate N-Acetylglucosaminephosphotransferase 1	PFNA	Neuromuscular transmission disorders
SLC6A2	Solute Carrier Family 6 Member 2	PFNA	ADHD; depression; bipolar disorder
TMEM56	Transmembrane Protein 56	PFNA	Neurodevelopmental disorders; bipolar disorder
RNF13	Ring Finger Protein 13	PFNA	Coronary artery disease; Parkinson's disease; pancreatic cancers
EPB41L3	Erythrocyte Membrane Protein Band 4.1 Like 3	PFNA	Kidney function; prostate cancer; gastric cancer;
VIPR1	Vasoactive Intestinal Peptide Receptor 1	PFHxS	Inflammatory bowel disease; lung adenocarcinoma; hepatocellular carcinoma;
CDSN; PSORS1C1	Corneodesmosin; Psoriasis Susceptibility 1 Candidate 1	PFHxS	Psoriasis susceptibility; rheumatoid arthritis

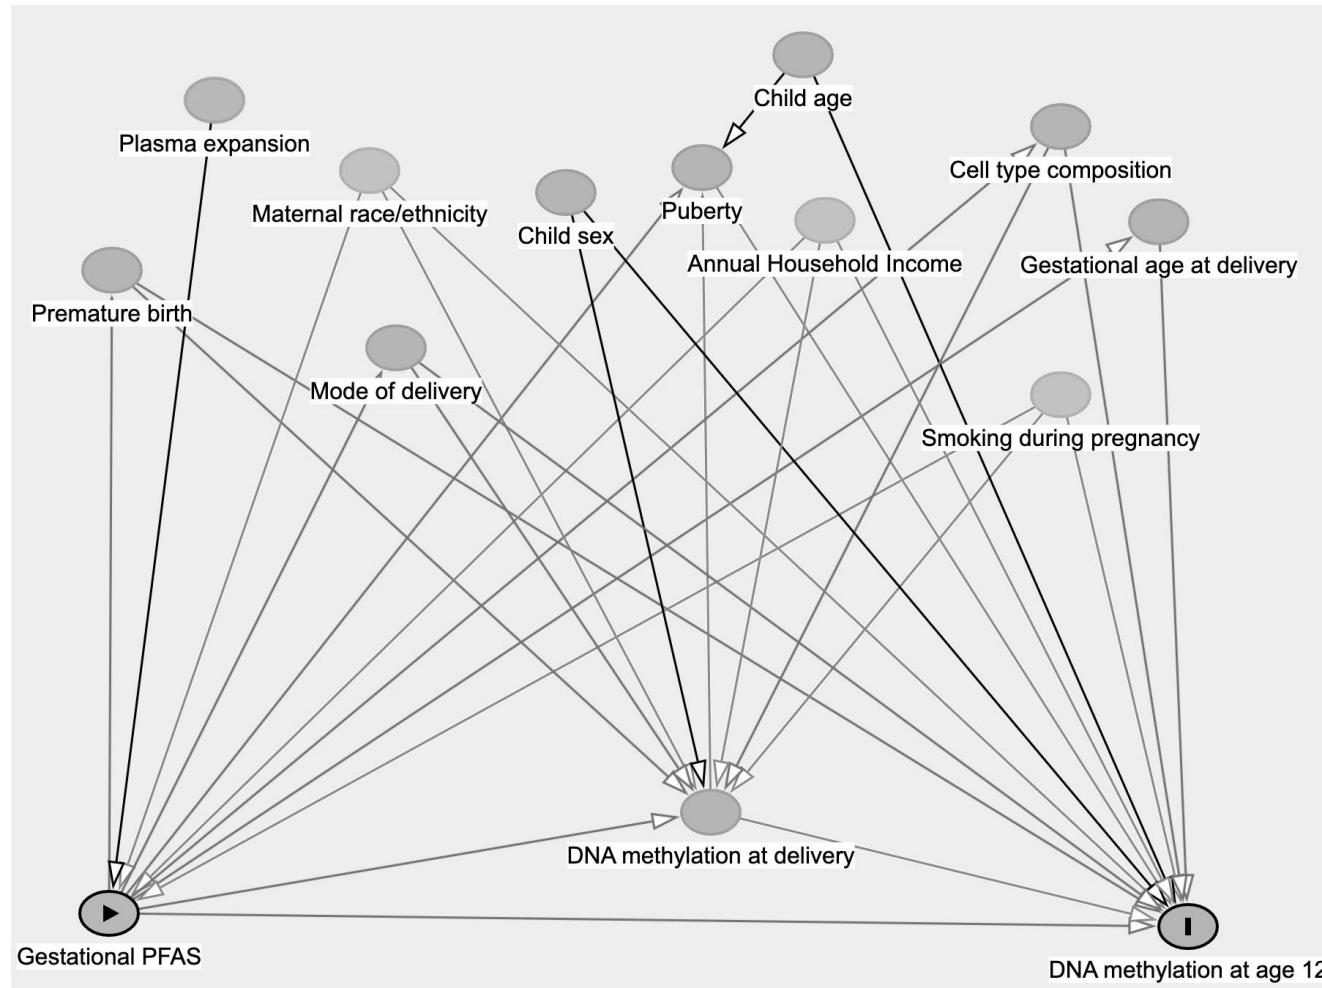

**Table S6.** A list of CpGs with p-value  $\leq 0.001$  provided by prior studies with the same direction of association and p-value  $< 0.05$  observed in the HOME Study (Cincinnati, OH; Enrolled 2003-2006)

Note: PFOA, perfluorooctanoate; PFOS, perfluorooctane sulfonate; PFHxS, perfluorohexane sulfonate; PFNA, perfluorononanoate; -, not annotated to any known gene; NA, not available in 450K microarray; Chr, chromosome; Body, between the ATG and stop codon; 5'UTR, between the TSS and the ATG start site; 1stExon, the first exon of the gene; TSS, transcription start site; TSS1500, 1500 bases from TSS; FDR, false discovery rate. Statistically significant CpG sites were defined as having FDR q-value <0.05 (PFOA, PFOS, and PFHxS) or 0.01 (PFNA); CpG sites were annotated to a promoter region if they were assigned to TSS200 or TSS1500. All models were adjusted for child age and sex, annual household income, maternal smoking during pregnancy and race, and cell type composition. \*Only q-values are available for Xu's study. CpGs with the same direction of effect and a P-value < 0.05 are shown.

**Figure S1.** Directed acyclic graph of potential confounders of the associations between serum PFAS concentrations in pregnancy and DNA methylation at birth and age 12 years in the HOME Study (Cincinnati, OH; Enrolled 2003-2006)

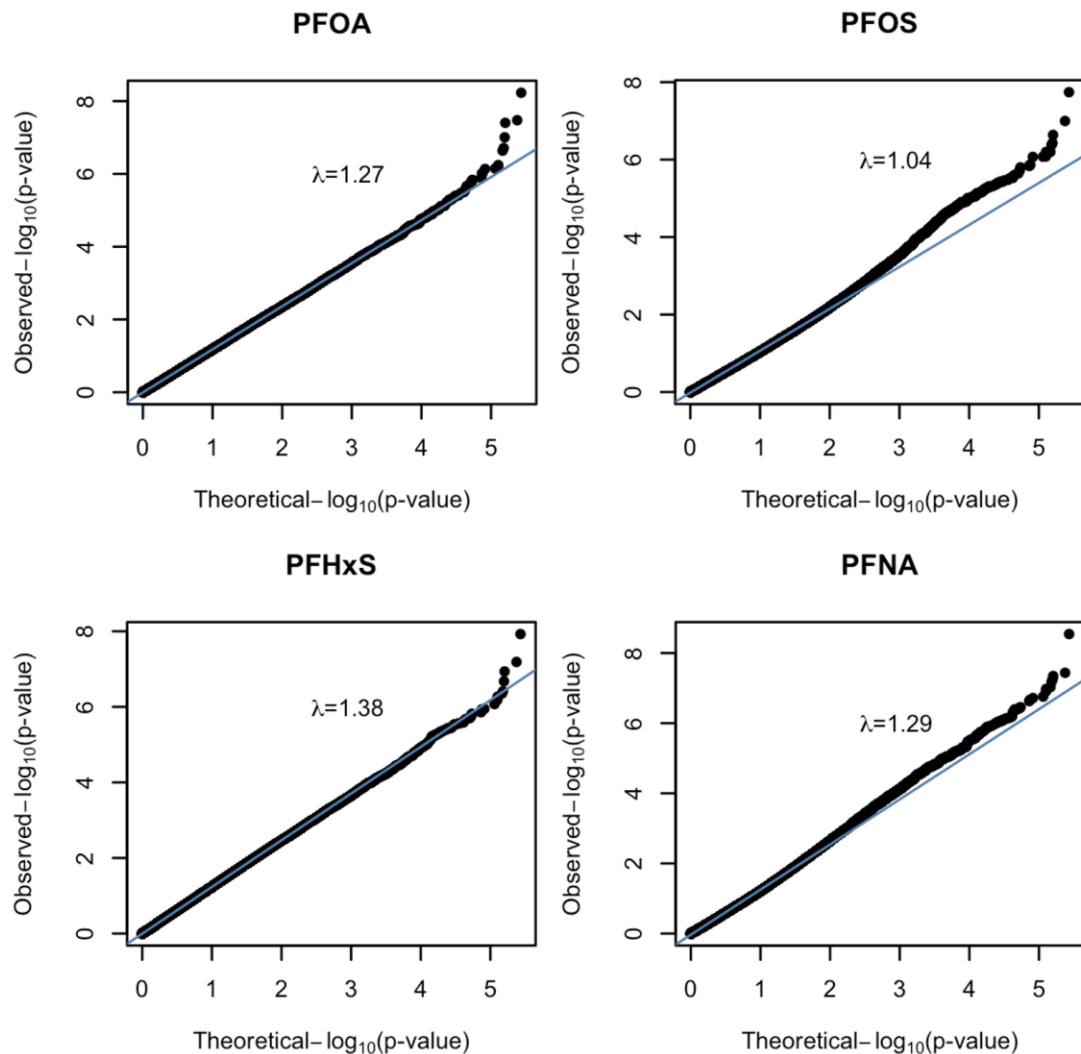

**Figure S2.** Box plot of serum per- and polyfluoroalkyl substance (PFAS) concentrations (ng/mL) in pregnancy in the HOME Study (Cincinnati, OH; Enrolled 2003-2006)

Note: PFOA, perfluorooctanoate; PFOS, perfluorooctane sulfonate; PFHxS, perfluorohexane sulfonate; PFNA, perfluorononanoate; FDR, false discovery rate; Dots placed past the line edges indicate outliers.

**Figure S3.** Quantile-quantile plots for the associations between gestational PFAS concentrations and repeated measures of DNA methylation in the HOME Study (Cincinnati, OH; Enrolled 2003-2006)

Note: PFOA, perfluorooctanoate; PFOS, perfluorooctane sulfonate; PFHxS, perfluorohexane sulfonate; PFNA, perfluorononanoate. Adjusted for child age and sex, annual household income, maternal smoking during pregnancy and race, and cell type composition.
