

Figure S1. Validation of different designed siRNA for IL-1R8 silencing **A-** Schematic representation of IL-1R8 mRNA sites targeted by the selected siRNA (siRNA 1-6). The image has been generated using the SnapGene software. **B-** Flow-cytometric analysis of IL-2-cultured NK cells 24h after electroporation using control FITC labeled- siRNA. **C-** Percentage of IL1R8 Expression in siRNA-transfected IL-2-cultured NK cells (relative to mock-transfected cells).
