Receipt of Goal Concordant Care as Reported by Family Respondents			
	Receiving Goal Concordant Care	Receiving Goal Discordant Care	Missing
Intervention	16	8	14
Control	15	7	26
Overall	31	15	40

Goal concordance was defined as the following:

- If either Q1 or Q2 were missing then goal concordance status (GCS) was set as missing
- If the subject didn't know the answer to Q2 then GCS was set as missing
- If the subject didn't know the answer to Q1 but responded to Q2 then GCS was 'Discordant'
- If the subject responded the same to Q1 & Q2 then GCS was 'Concordant', otherwise is categorized as 'Discordant'
