FIGURE S2. Classification of measures

FOOD ENVIRONMENT

Neighbourhood definition
Retail, residential, school, work, activity spaces, routes or various combinations of these

Food outlet type
Healthy (absence = FD) versus unhealthy (abundance = FS)
e.g. supermarket, convenience, fast-food, restaurants, farmers market

METHODOLOGY

Point of origin
Address, centroid (geographic or population-weighted), postal code

Definition of access
Absolute or relative

Level of measurement
Individual- or area-level

Measures

Distance
- Euclidean
- Network

Approach
- Proximity
- Buffer
  - Counts
  - Availability
  - Density
    - Absolute
      e.g. per square km
    - Relative
      e.g. healthier retailers relative to all
- Kernel
