

**Figure S1.** Antimetabolite drugs intake (A) and water intake (B) during the study period. MTX, methotrexate; MMF, mycophenolate mofetil; DeH2O, dehydration threshold. Statistical significance compared to baseline (first week). \*\*\* $p < 0.001$ , \*\*\*\* $p < 0.0001$ . Cohorts of 6 to 10 mice per treatment repeated twice.
