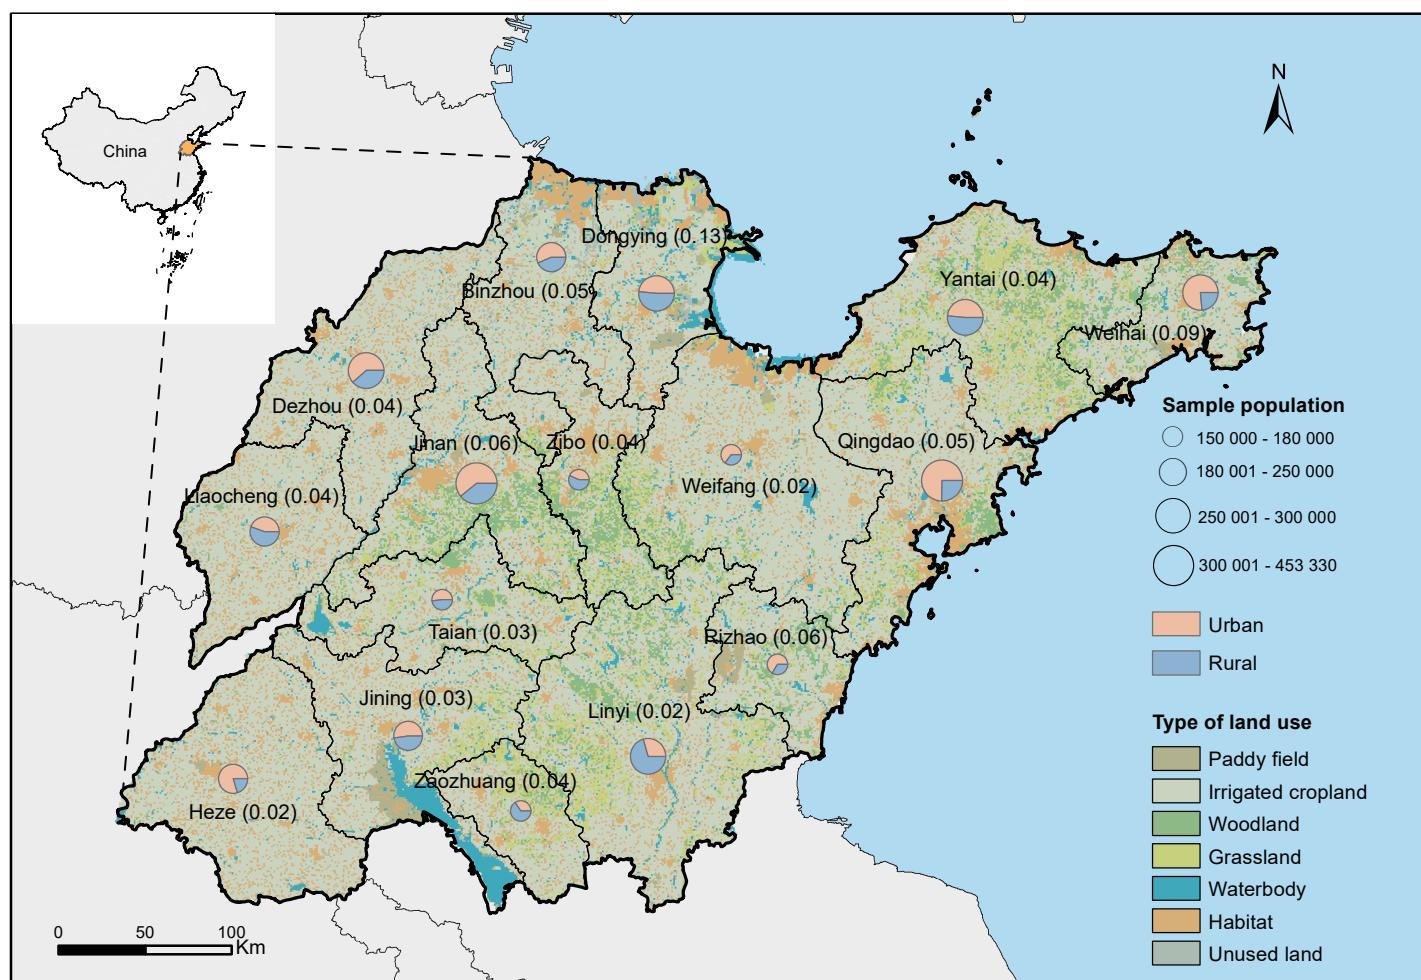

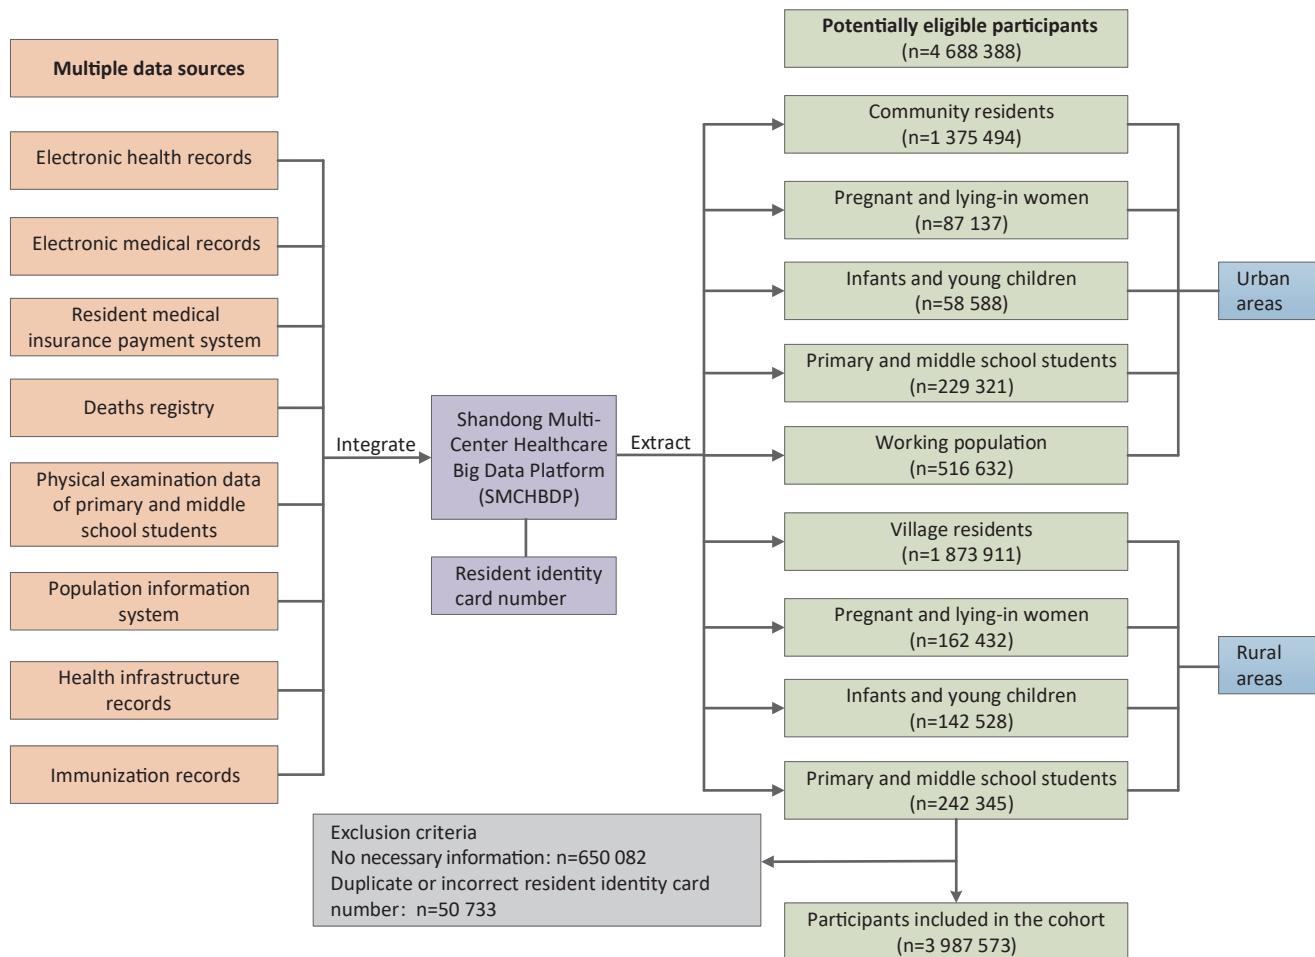

Figure S1: Geographical distribution of participants in Shandong province, China. Figures in brackets represent the sample proportion of each city (sample population divided by total population).

Text S1: Description and classification of 39 notifiable infectious diseases in China

The 39 notifiable infectious diseases are divided into the following three classes: class A, which includes plague and cholera; class B, which includes SARS, HIV infection, viral hepatitis, poliomyelitis, avian influenza H5N1, measles, haemorrhagic fever, rabies, epidemic encephalitis B, dengue, anthrax, bacillary and amoebic dysentery, pulmonary tuberculosis, typhoid and paratyphoid, epidemic cerebrospinal meningitis, whooping cough, diphtheria, tetanus neonatorum, scarlet fever, brucellosis, gonorrhoea, syphilis, leptospirosis, schistosomiasis, malaria, avian influenza H7N9; class C, which includes seasonal influenza, mumps, rubella, acute haemorrhagic conjunctivitis, leprosy, typhus fever, visceral leishmaniasis, echinococcosis, filariasis, hand, foot, and mouth disease, Other infectious diarrhoea (infectious diarrhoeal diseases other than cholera, bacterial and amoebic dysentery, typhoid and paratyphoid).

In particular, we divided viral hepatitis into hepatitis A, B, C, D, and E; bacterial and amoebic dysentery into two separate categories of bacterial dysentery and amoebic dysentery; typhoid and paratyphoid into two separate groups of typhoid and paratyphoid; and seasonal influenza into traditional seasonal influenza and influenza A H1N1.

Table S1

Characteristics of infectious diseases in Shandong province, China, from January 2013 to June 2017

Infectious diseases	Case number (n,%) *					Age of onset Median (IQR)	Incidence density (per 100 000 person-years)					Incidence density between 2013-2017 (per 100 000 person-years)
	Total	Male	Female	Urban	Rural		2013	2014	2015	2016	2017	
Respiratory	61951	31443 (50.75)	30508 (49.25)	37361 (60.31)	24590 (39.69)	51 (31-64)	201.00	227.54	495.83	538.3	572.77	405.00

*Total number of cases during January 2013 to June 2017.

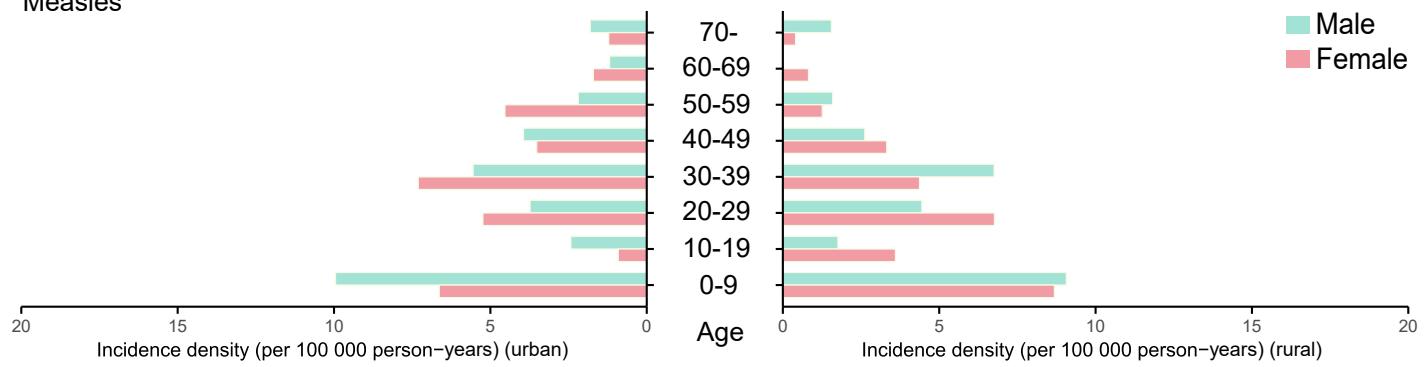

†Infectious diarrhoeal diseases other than cholera, bacterial dysentery, amoebic dysentery, typhoid, and paratyphoid.

HIV=human immunodeficiency virus, PIPSM=picornavirus infections presenting in the skin or mucous membranes.

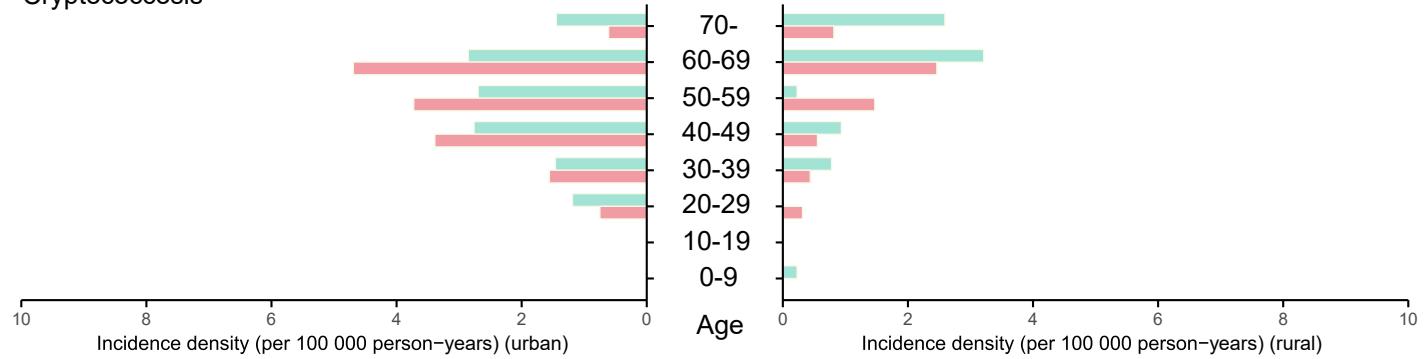

Respiratory

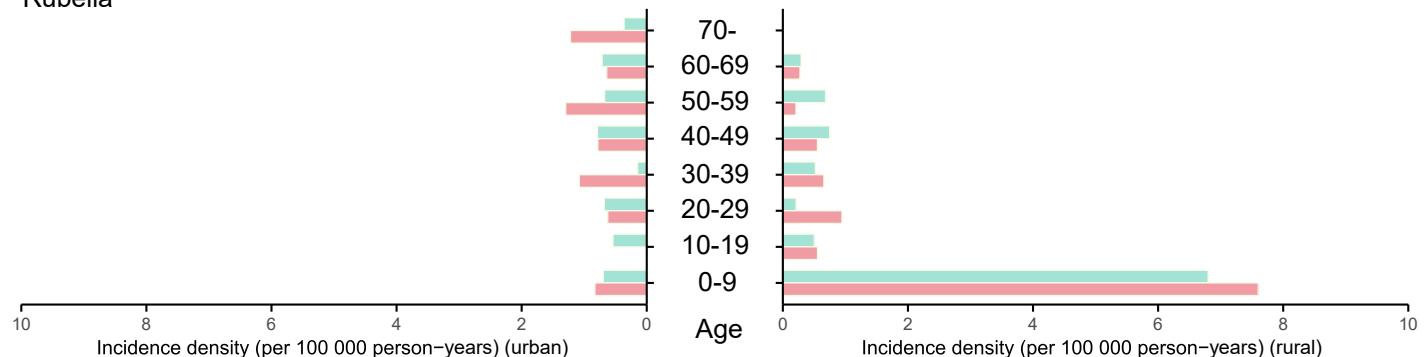

Measles

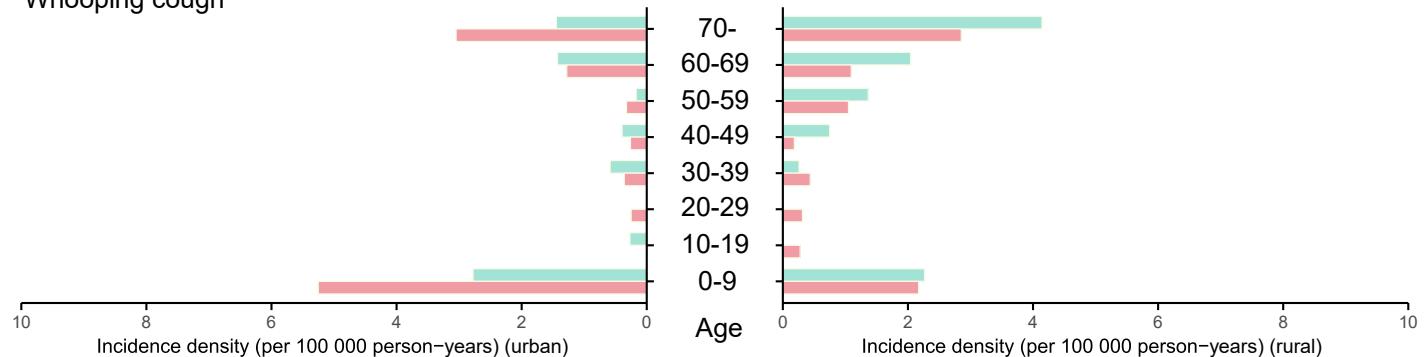

Cryptococcosis

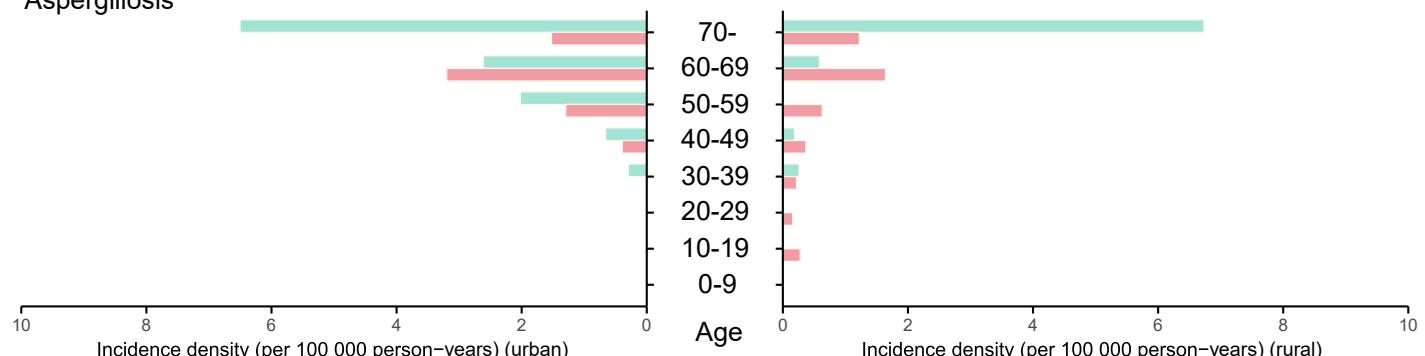

Rubella

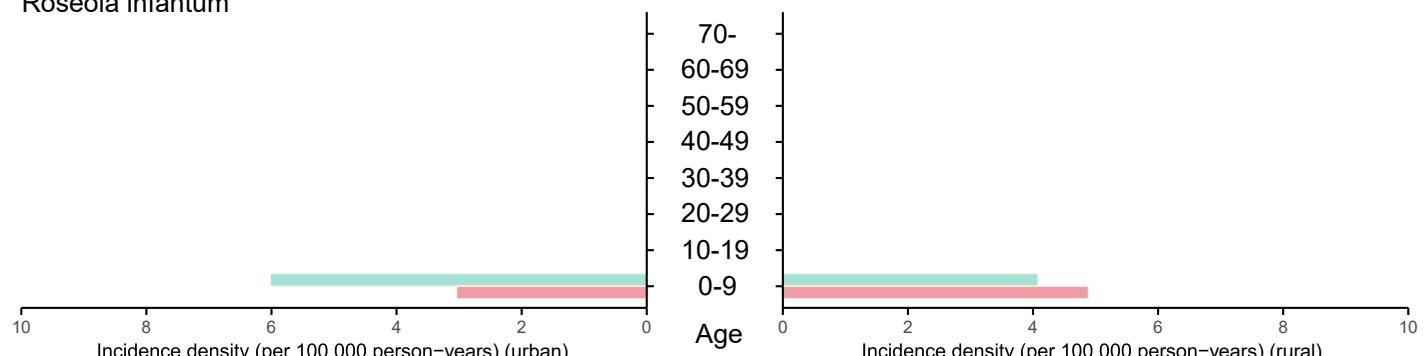

Whooping cough

Aspergillosis

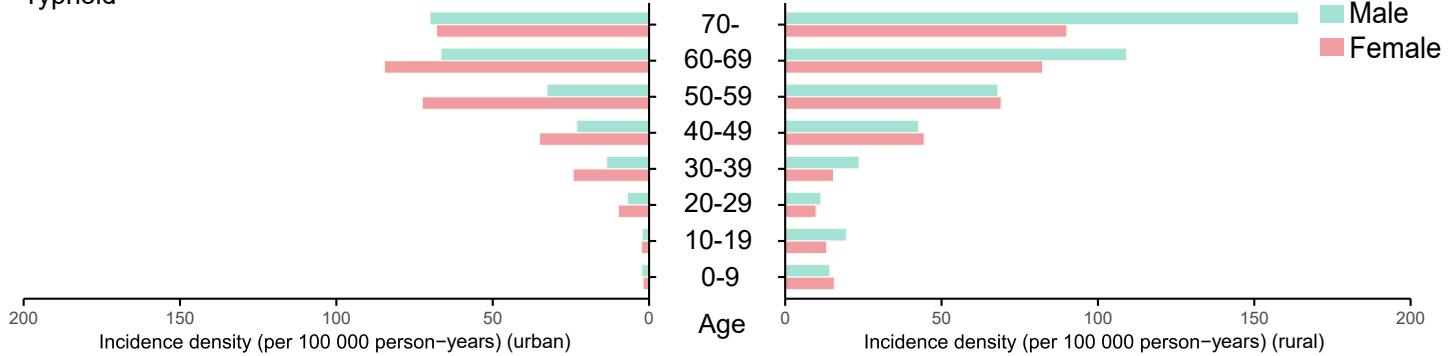

Roseola infantum

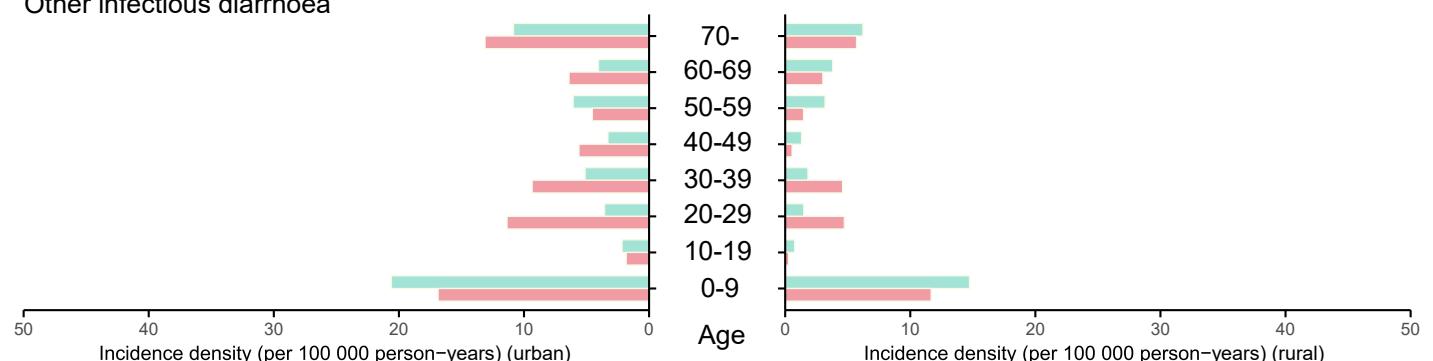

Gastrointestinal

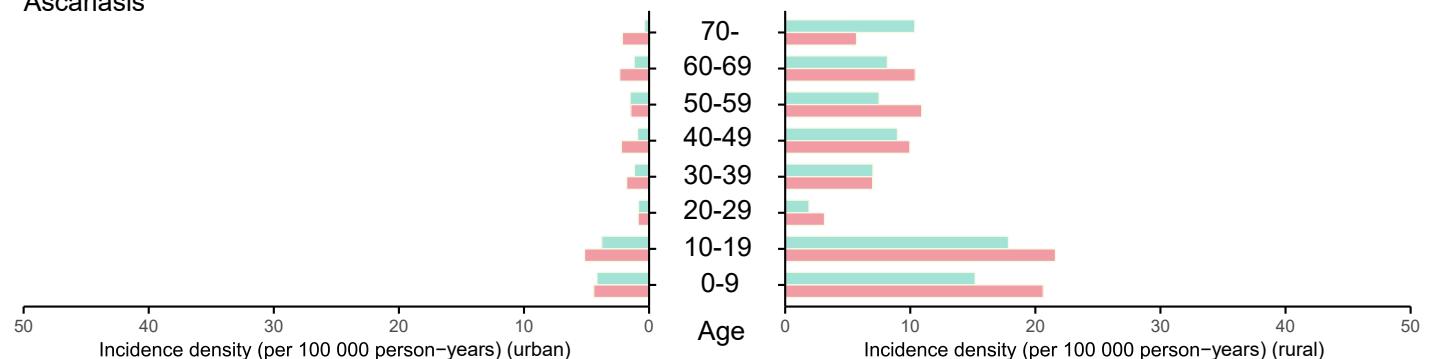

Typhoid

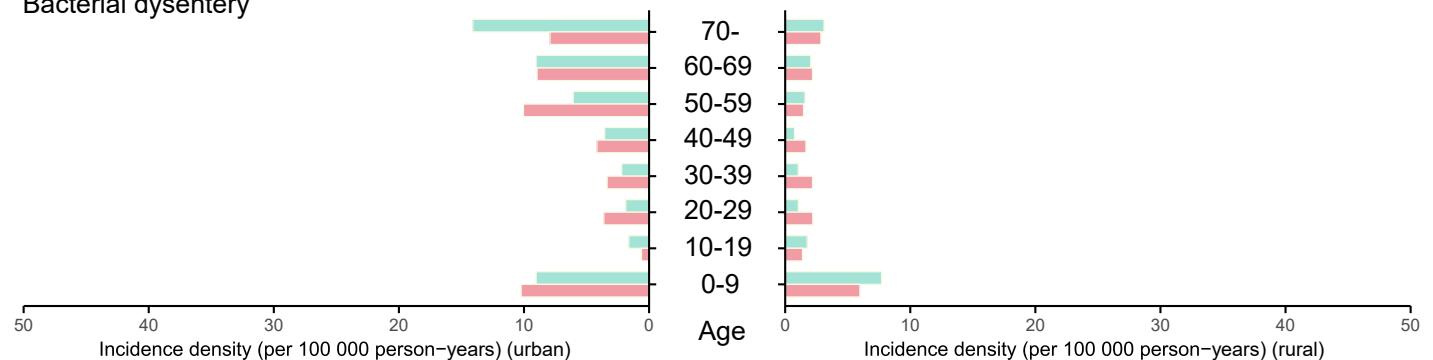

Other infectious diarrhoea

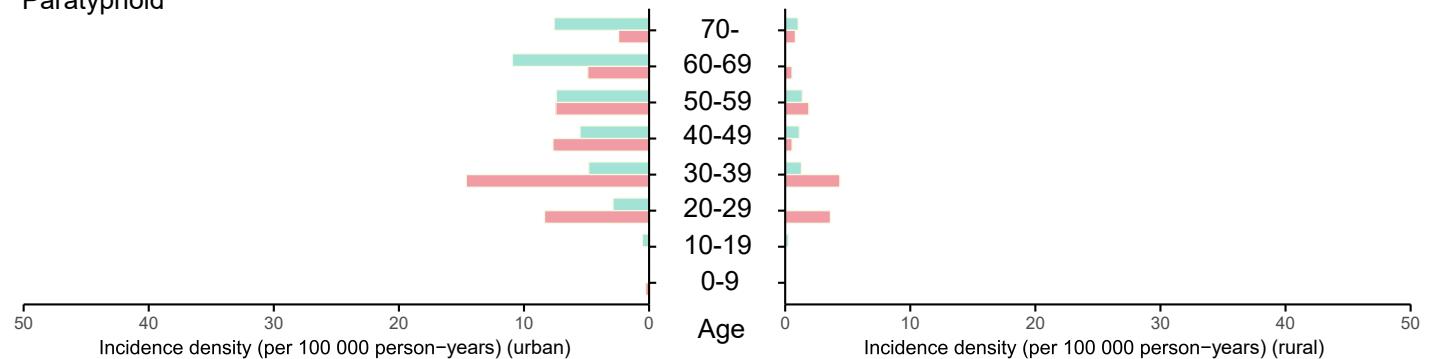

Ascariasis

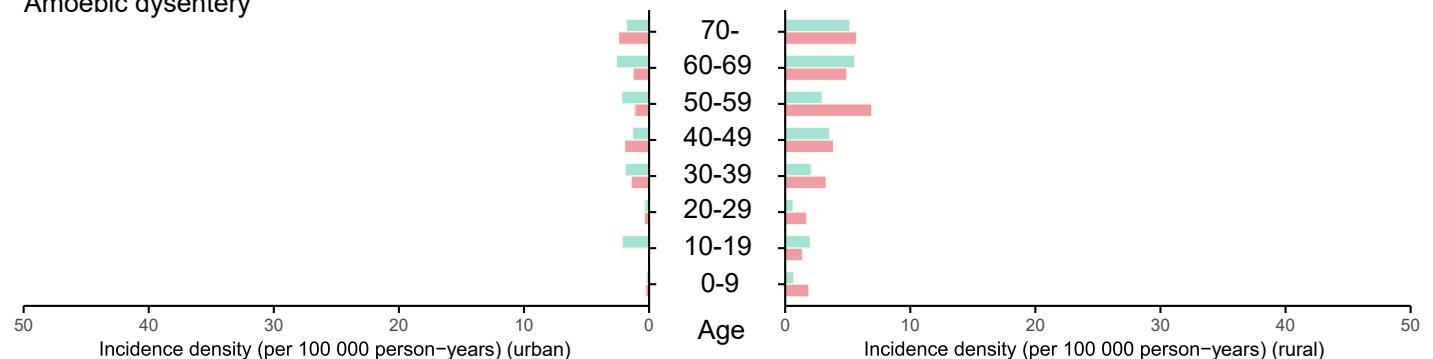

Bacterial dysentery

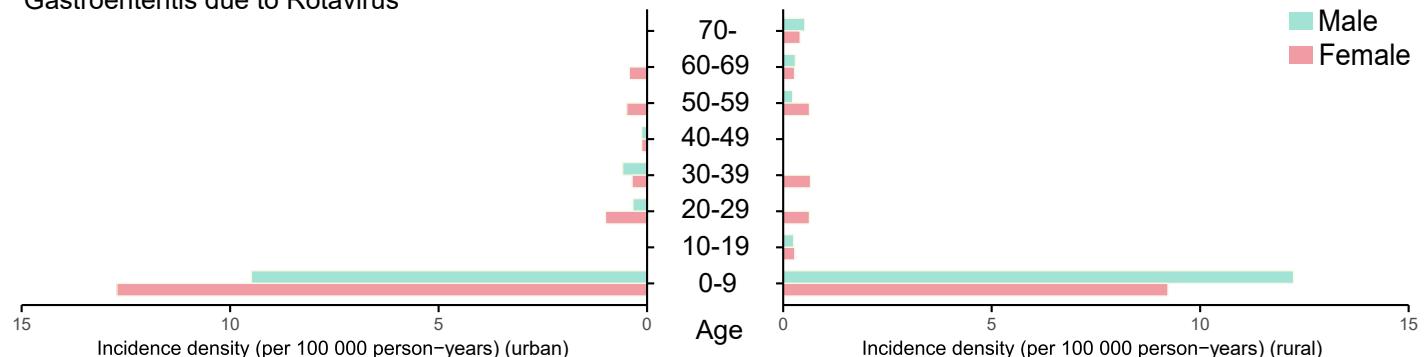

Paratyphoid

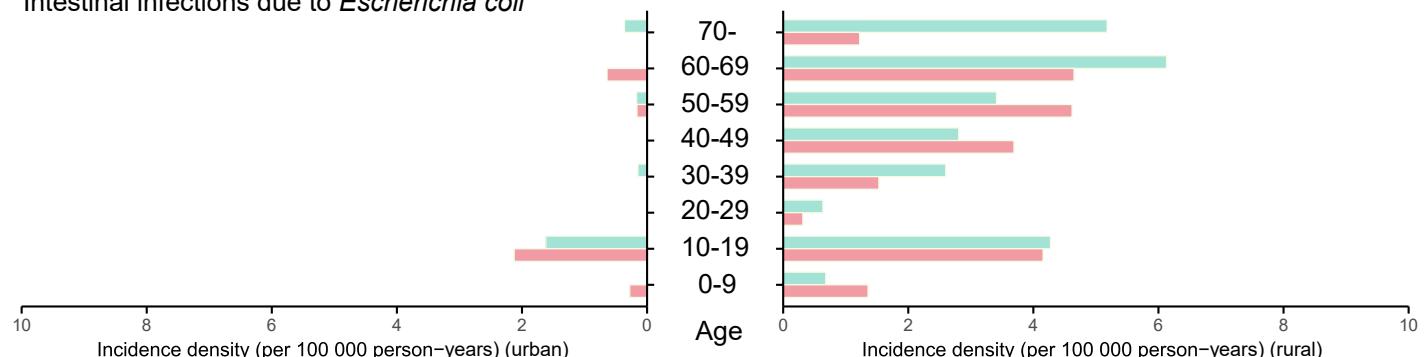

Amoebic dysentery

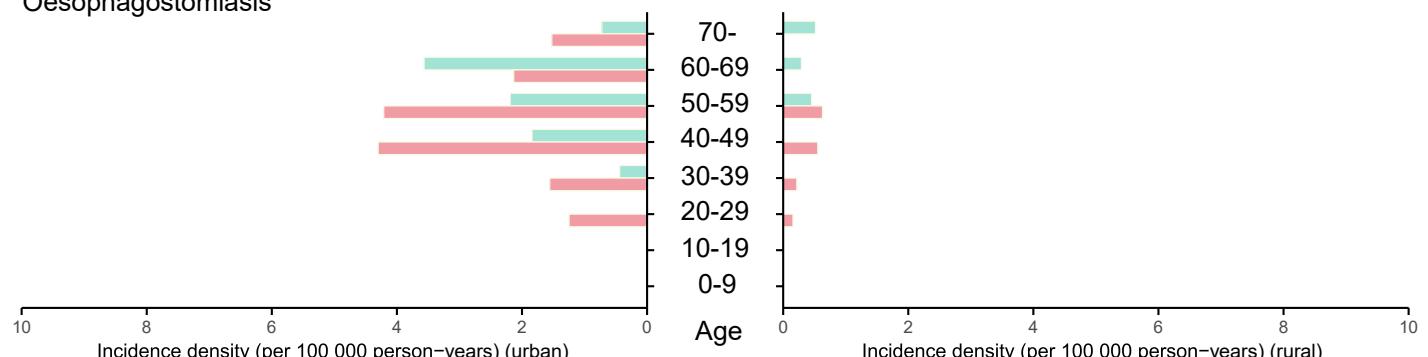

Gastroenteritis due to Rotavirus

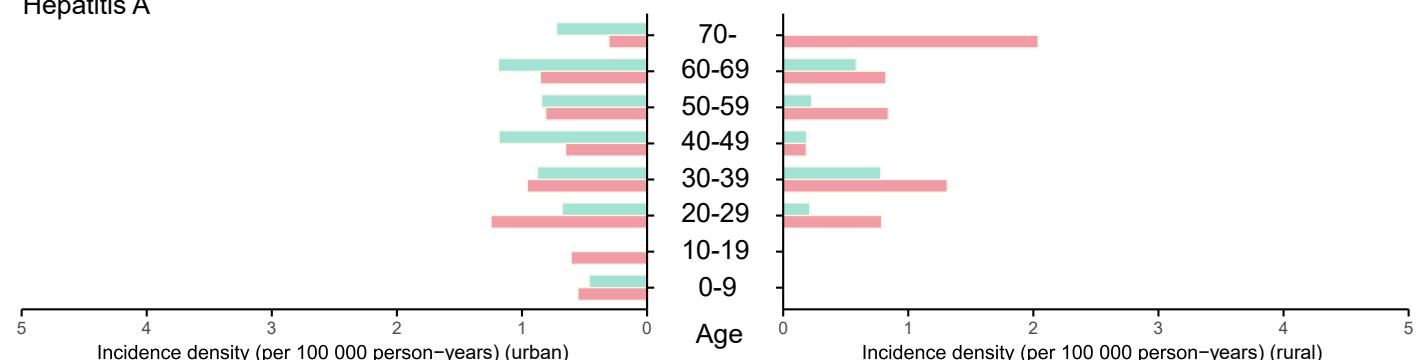

Intestinal infections due to *Escherichia coli*

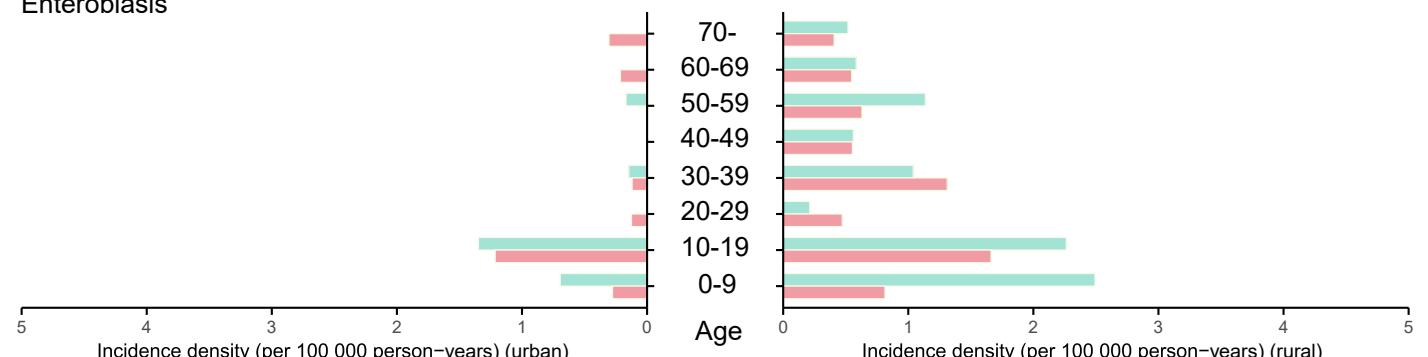

Oesophagostomiasis

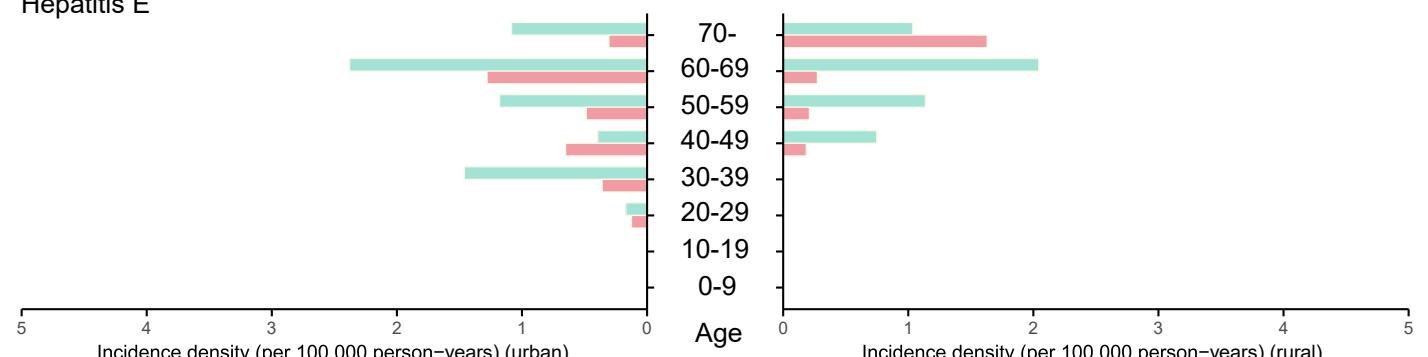

Hepatitis A

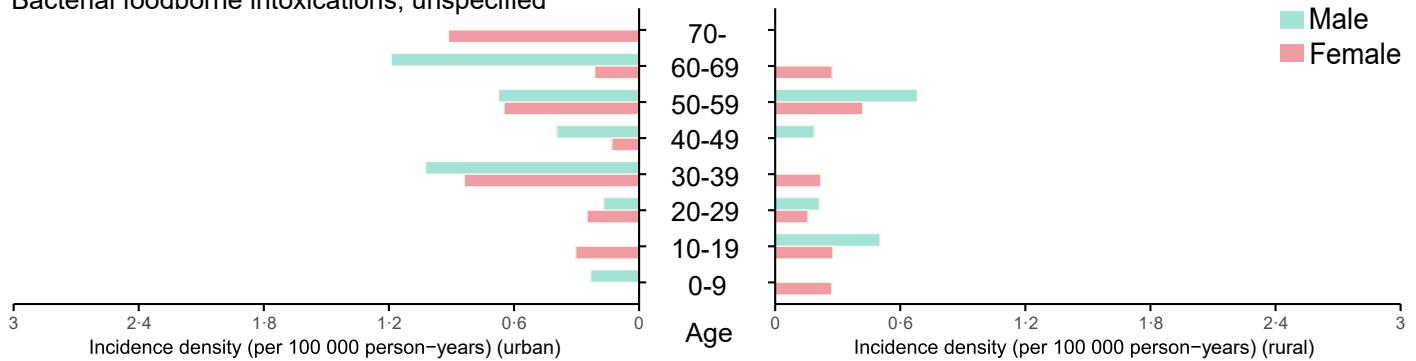

Enterobiasis

Hepatitis E

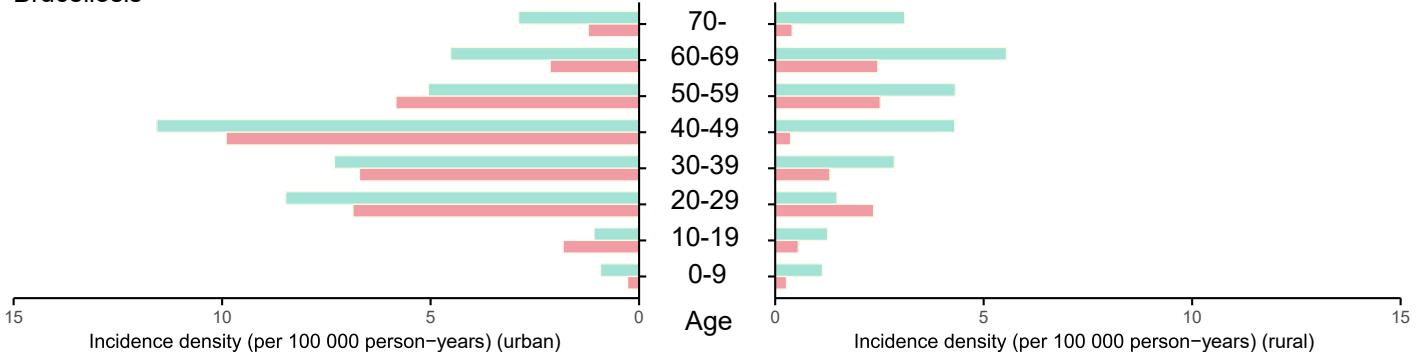

Bacterial foodborne intoxications, unspecified

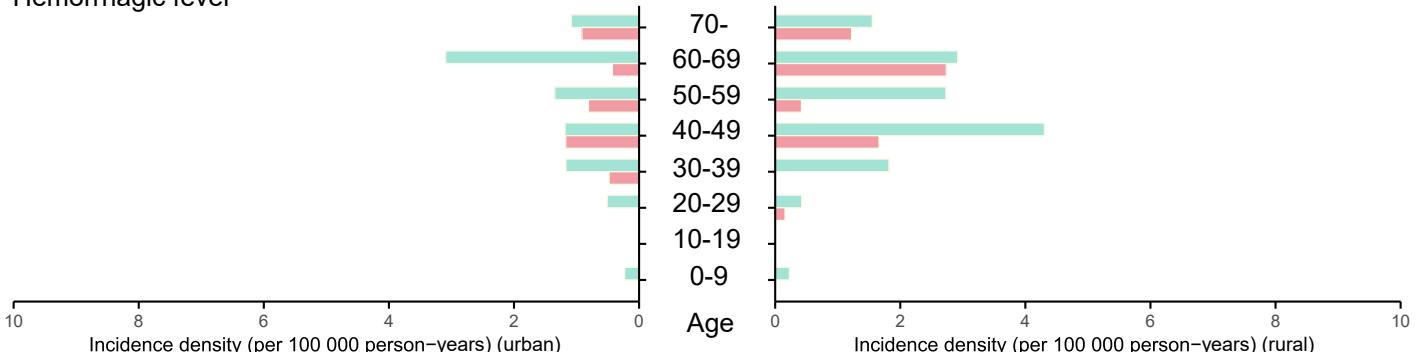

Vector-borne

Brucellosis

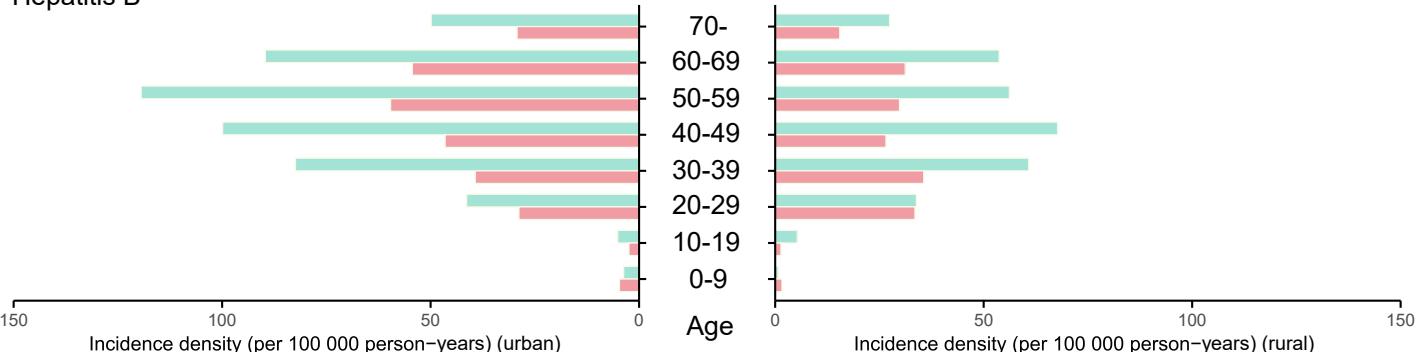

Hemorrhagic fever

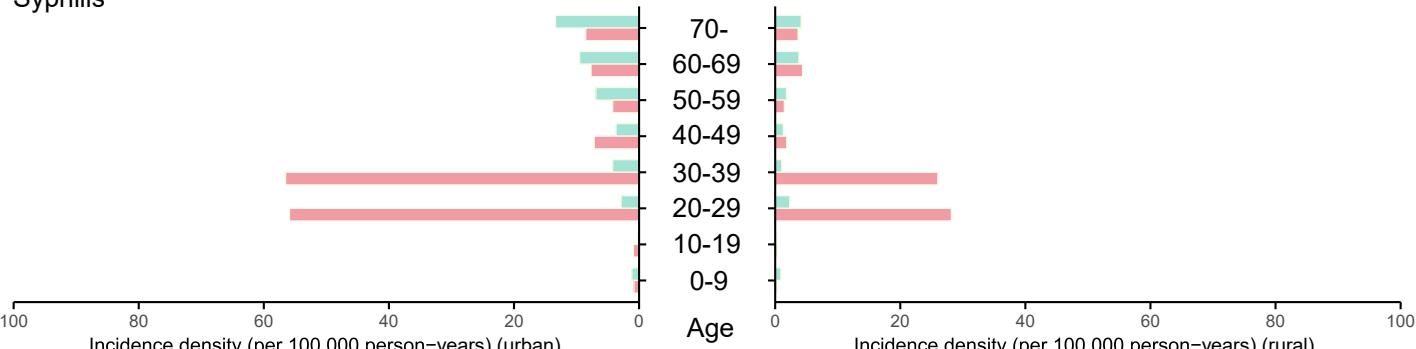

Blood-transmitted and sex-transmitted

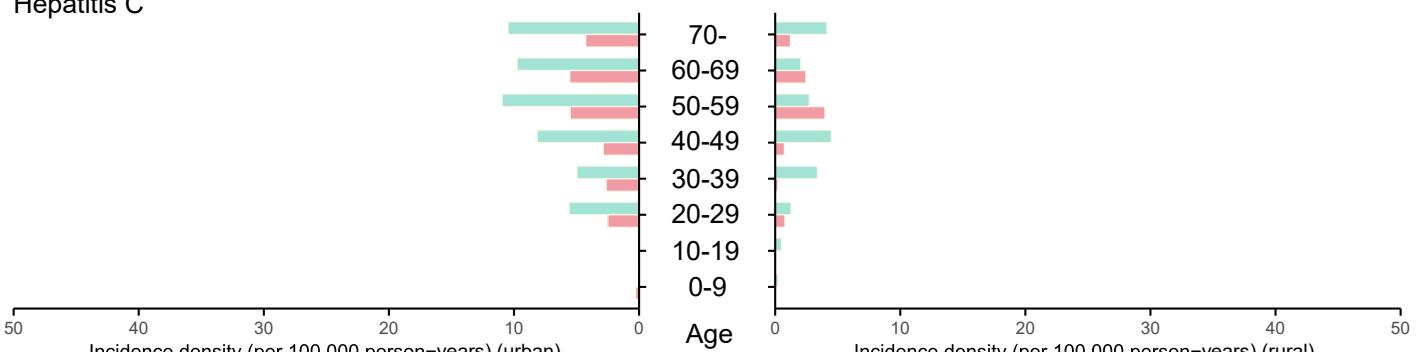

Hepatitis B

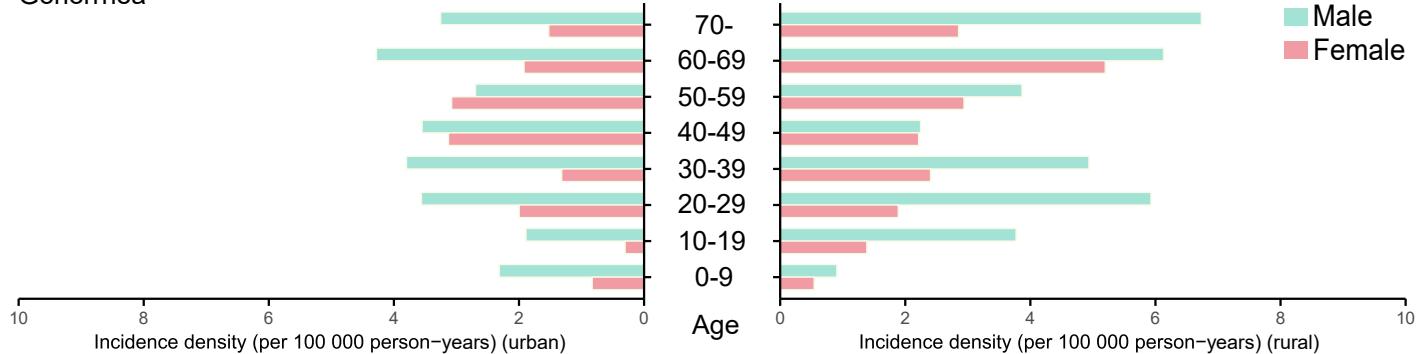

Syphilis

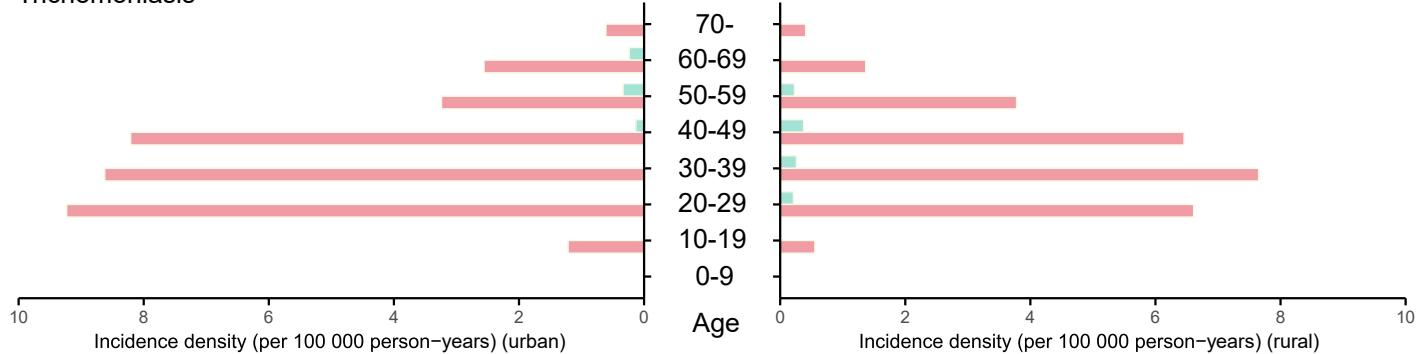

Hepatitis C

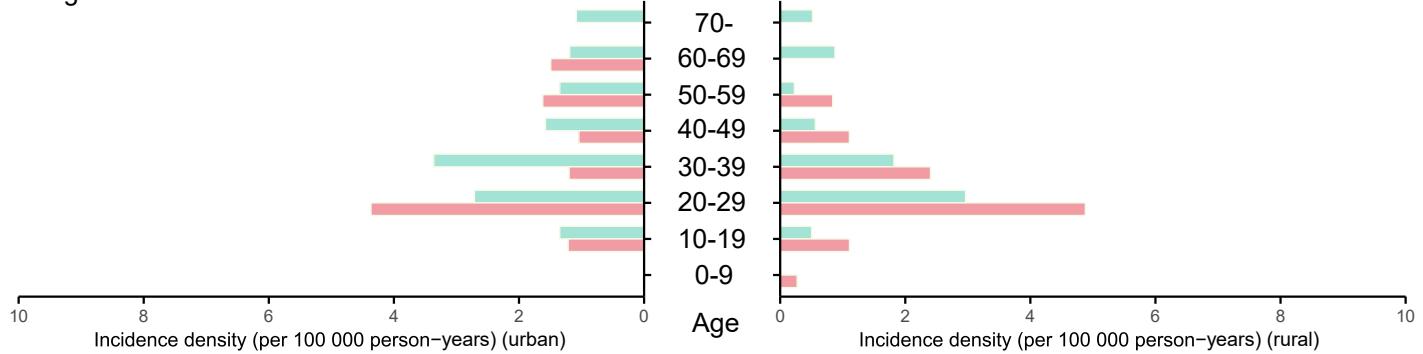

Gonorrhea

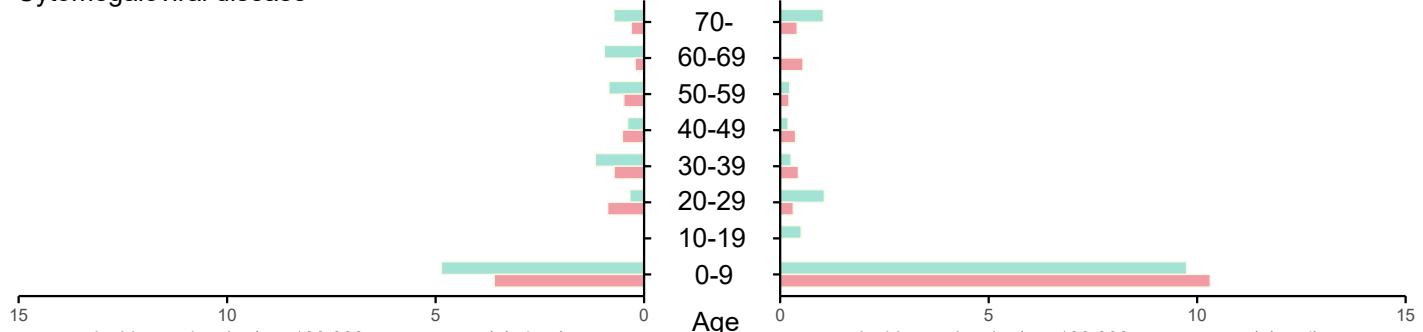

Trichomoniasis

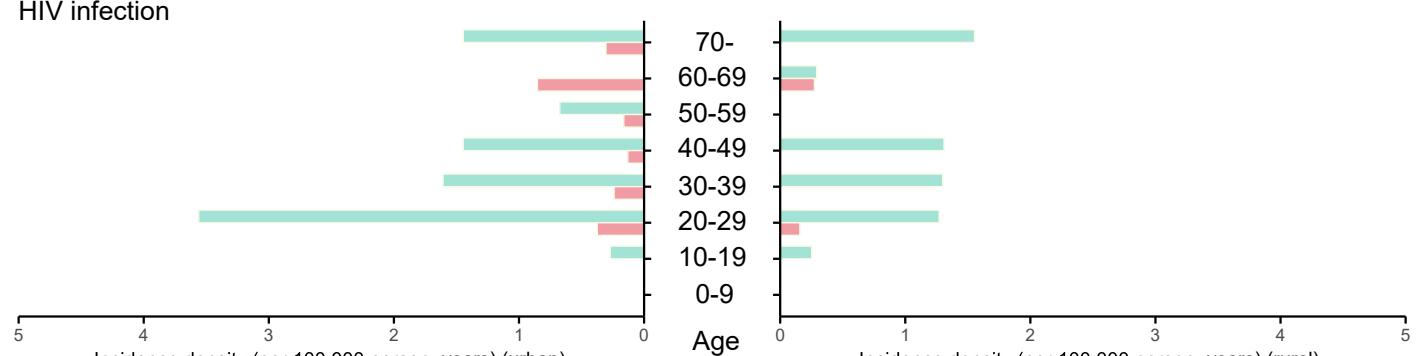

Anogenital warts

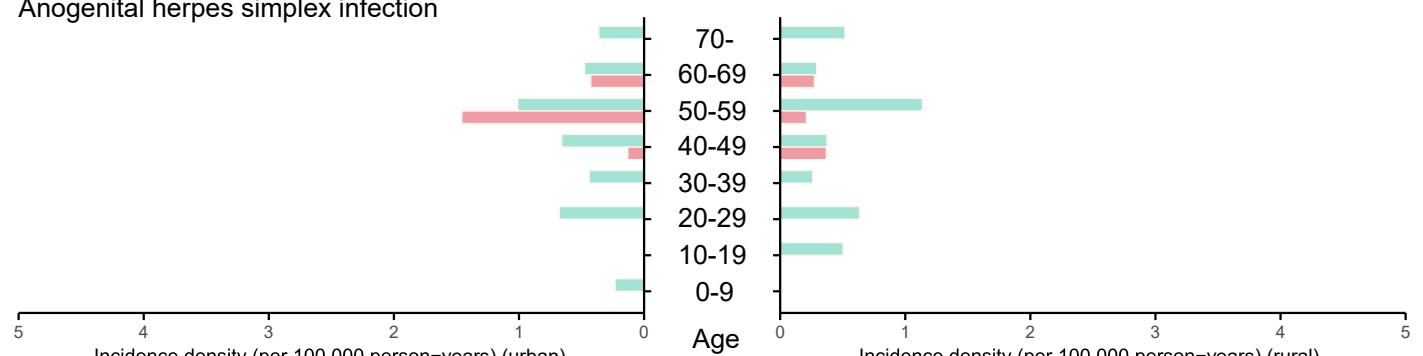

Cytomegaloviral disease

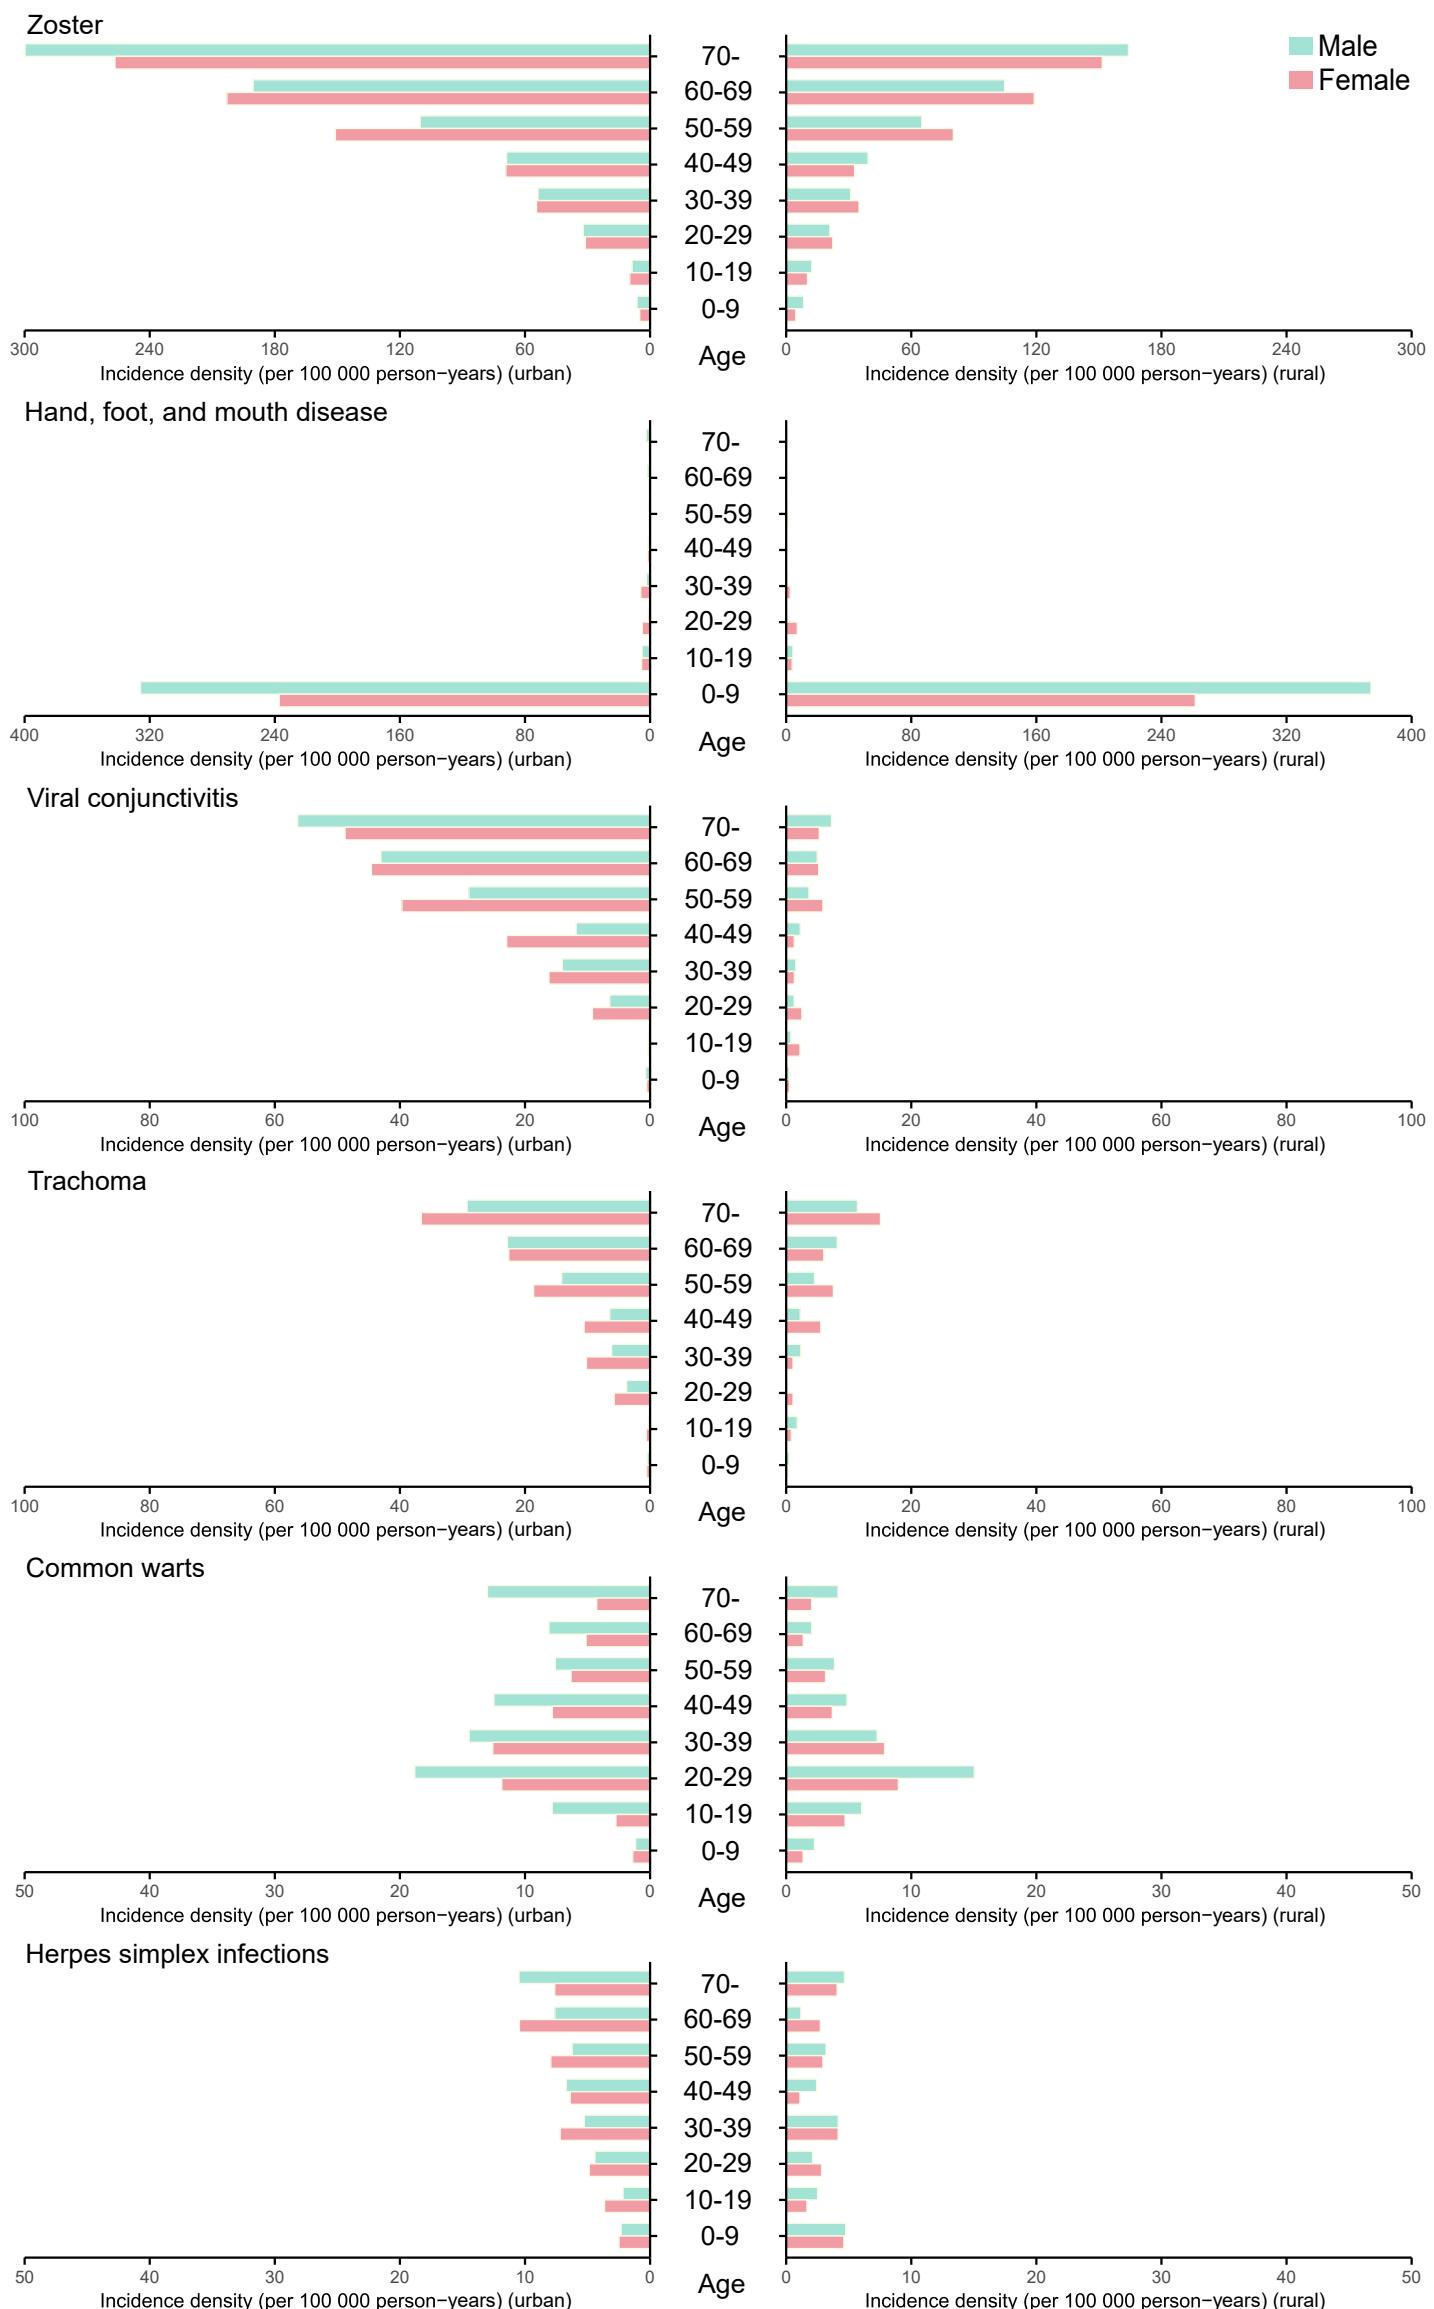

HIV infection

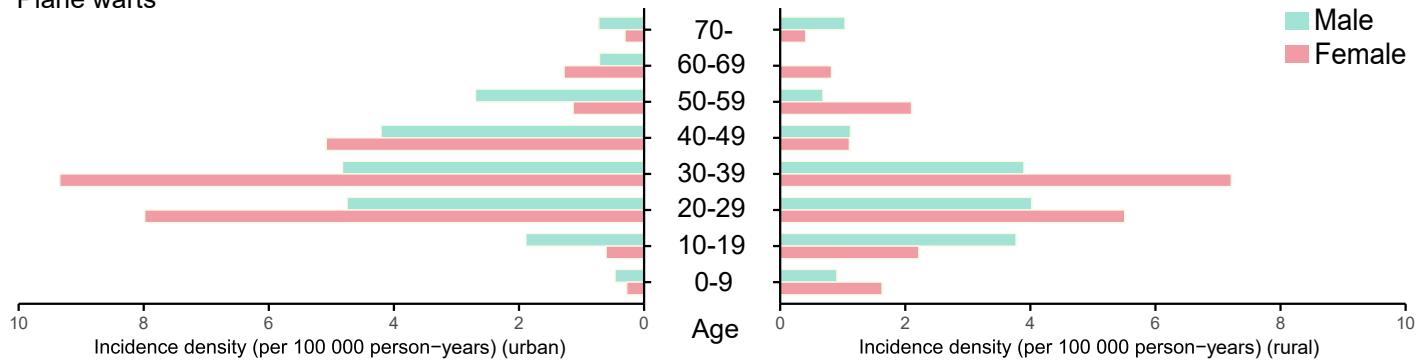

Anogenital herpes simplex infection

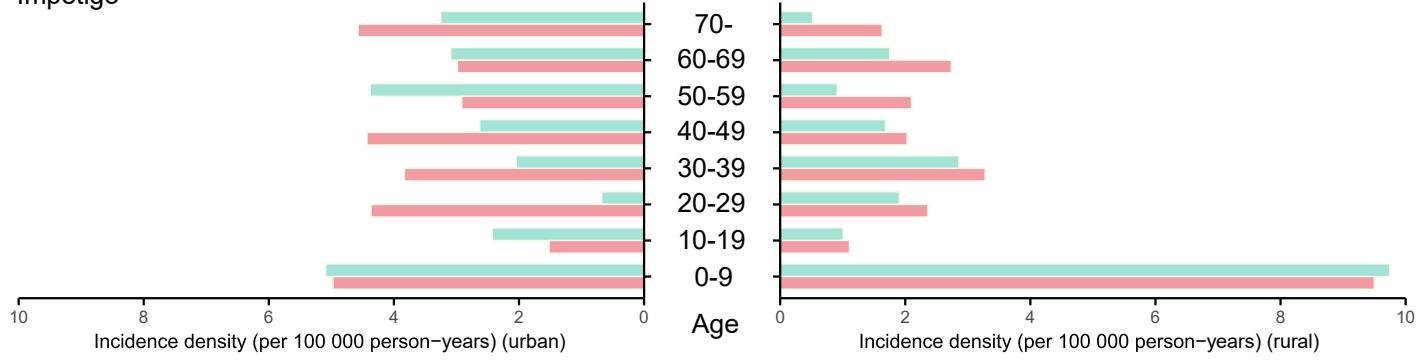

Mucocutaneous

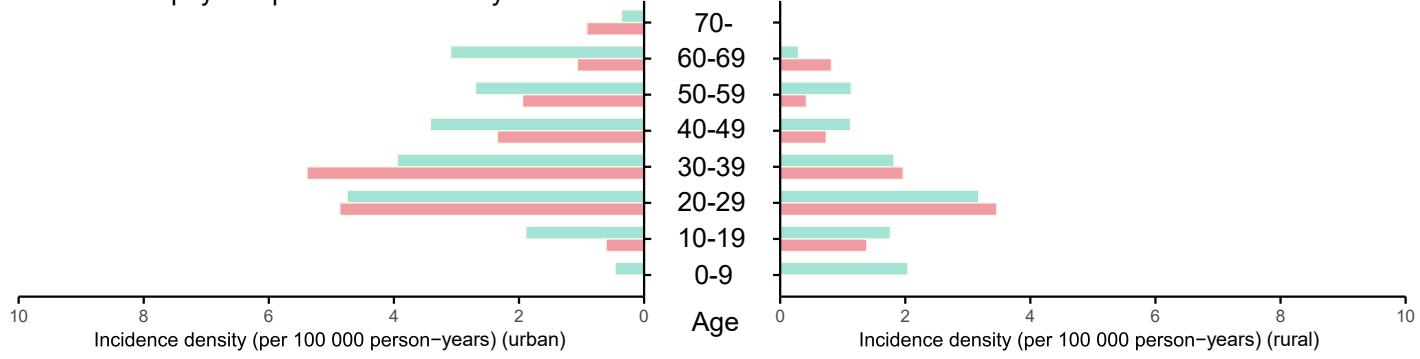

Plane warts

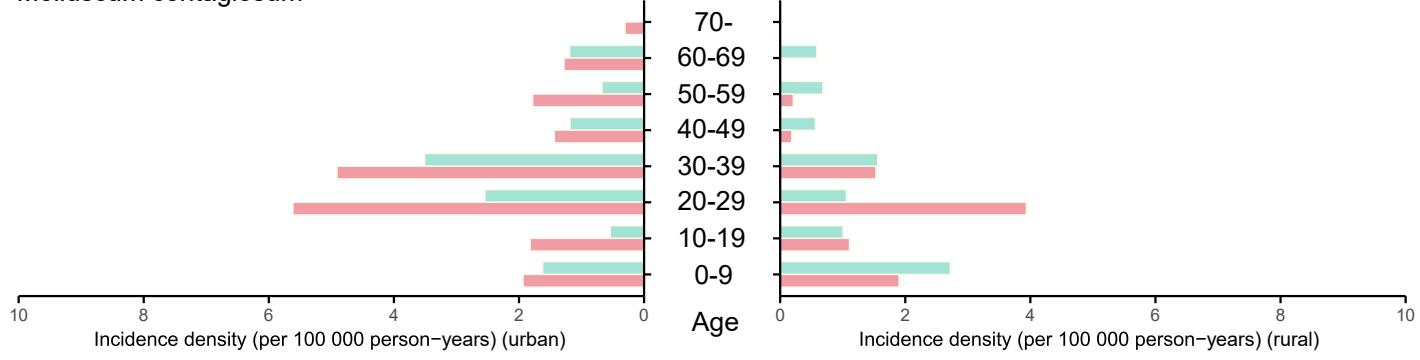

Impetigo

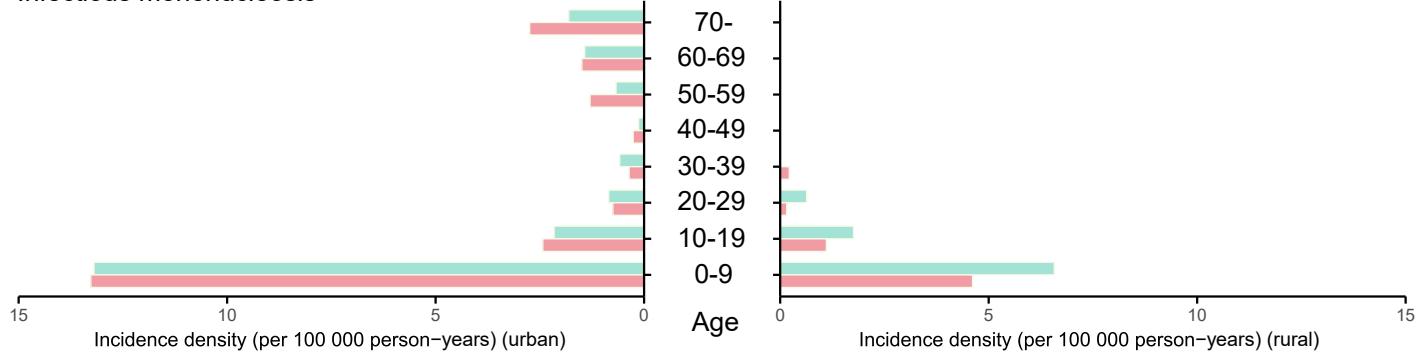

Non-dermatophyte superficial dermatomycoses

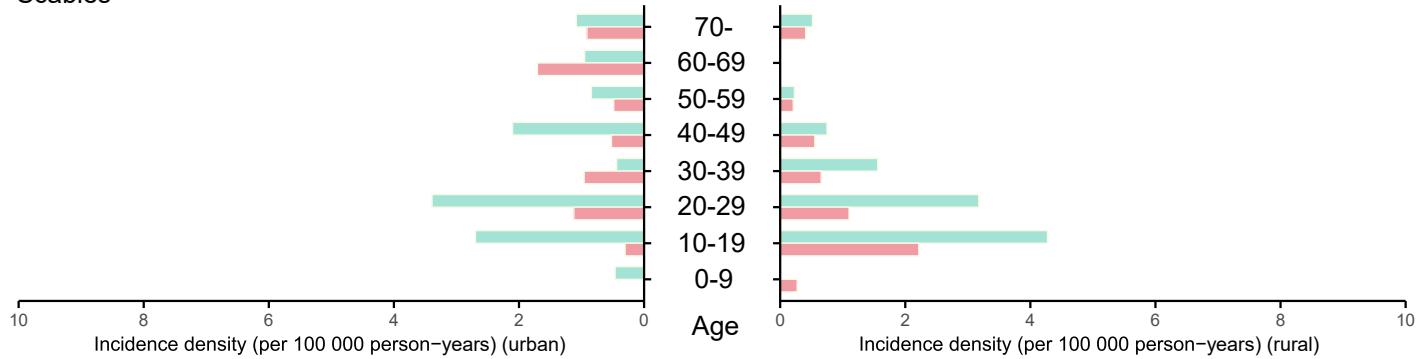

Molluscum contagiosum

Infectious mononucleosis

Scabies

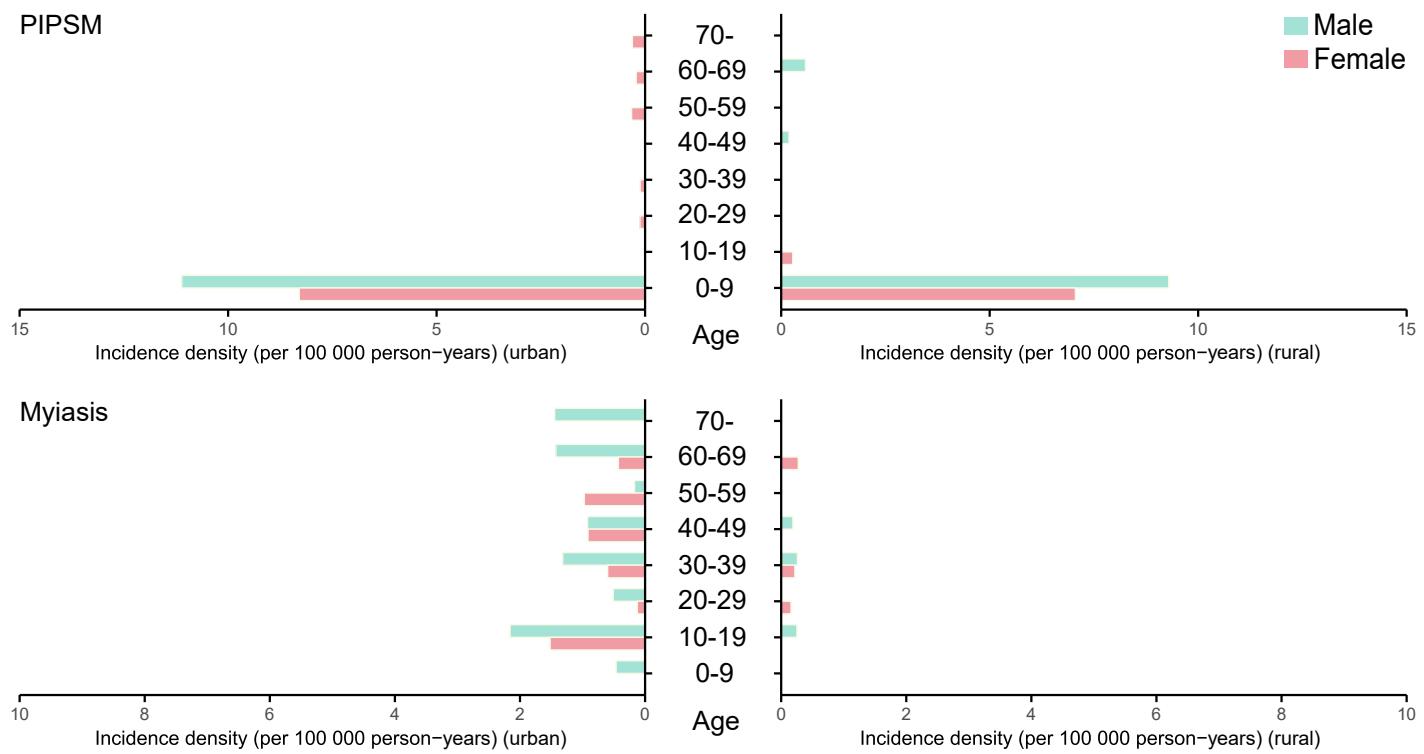

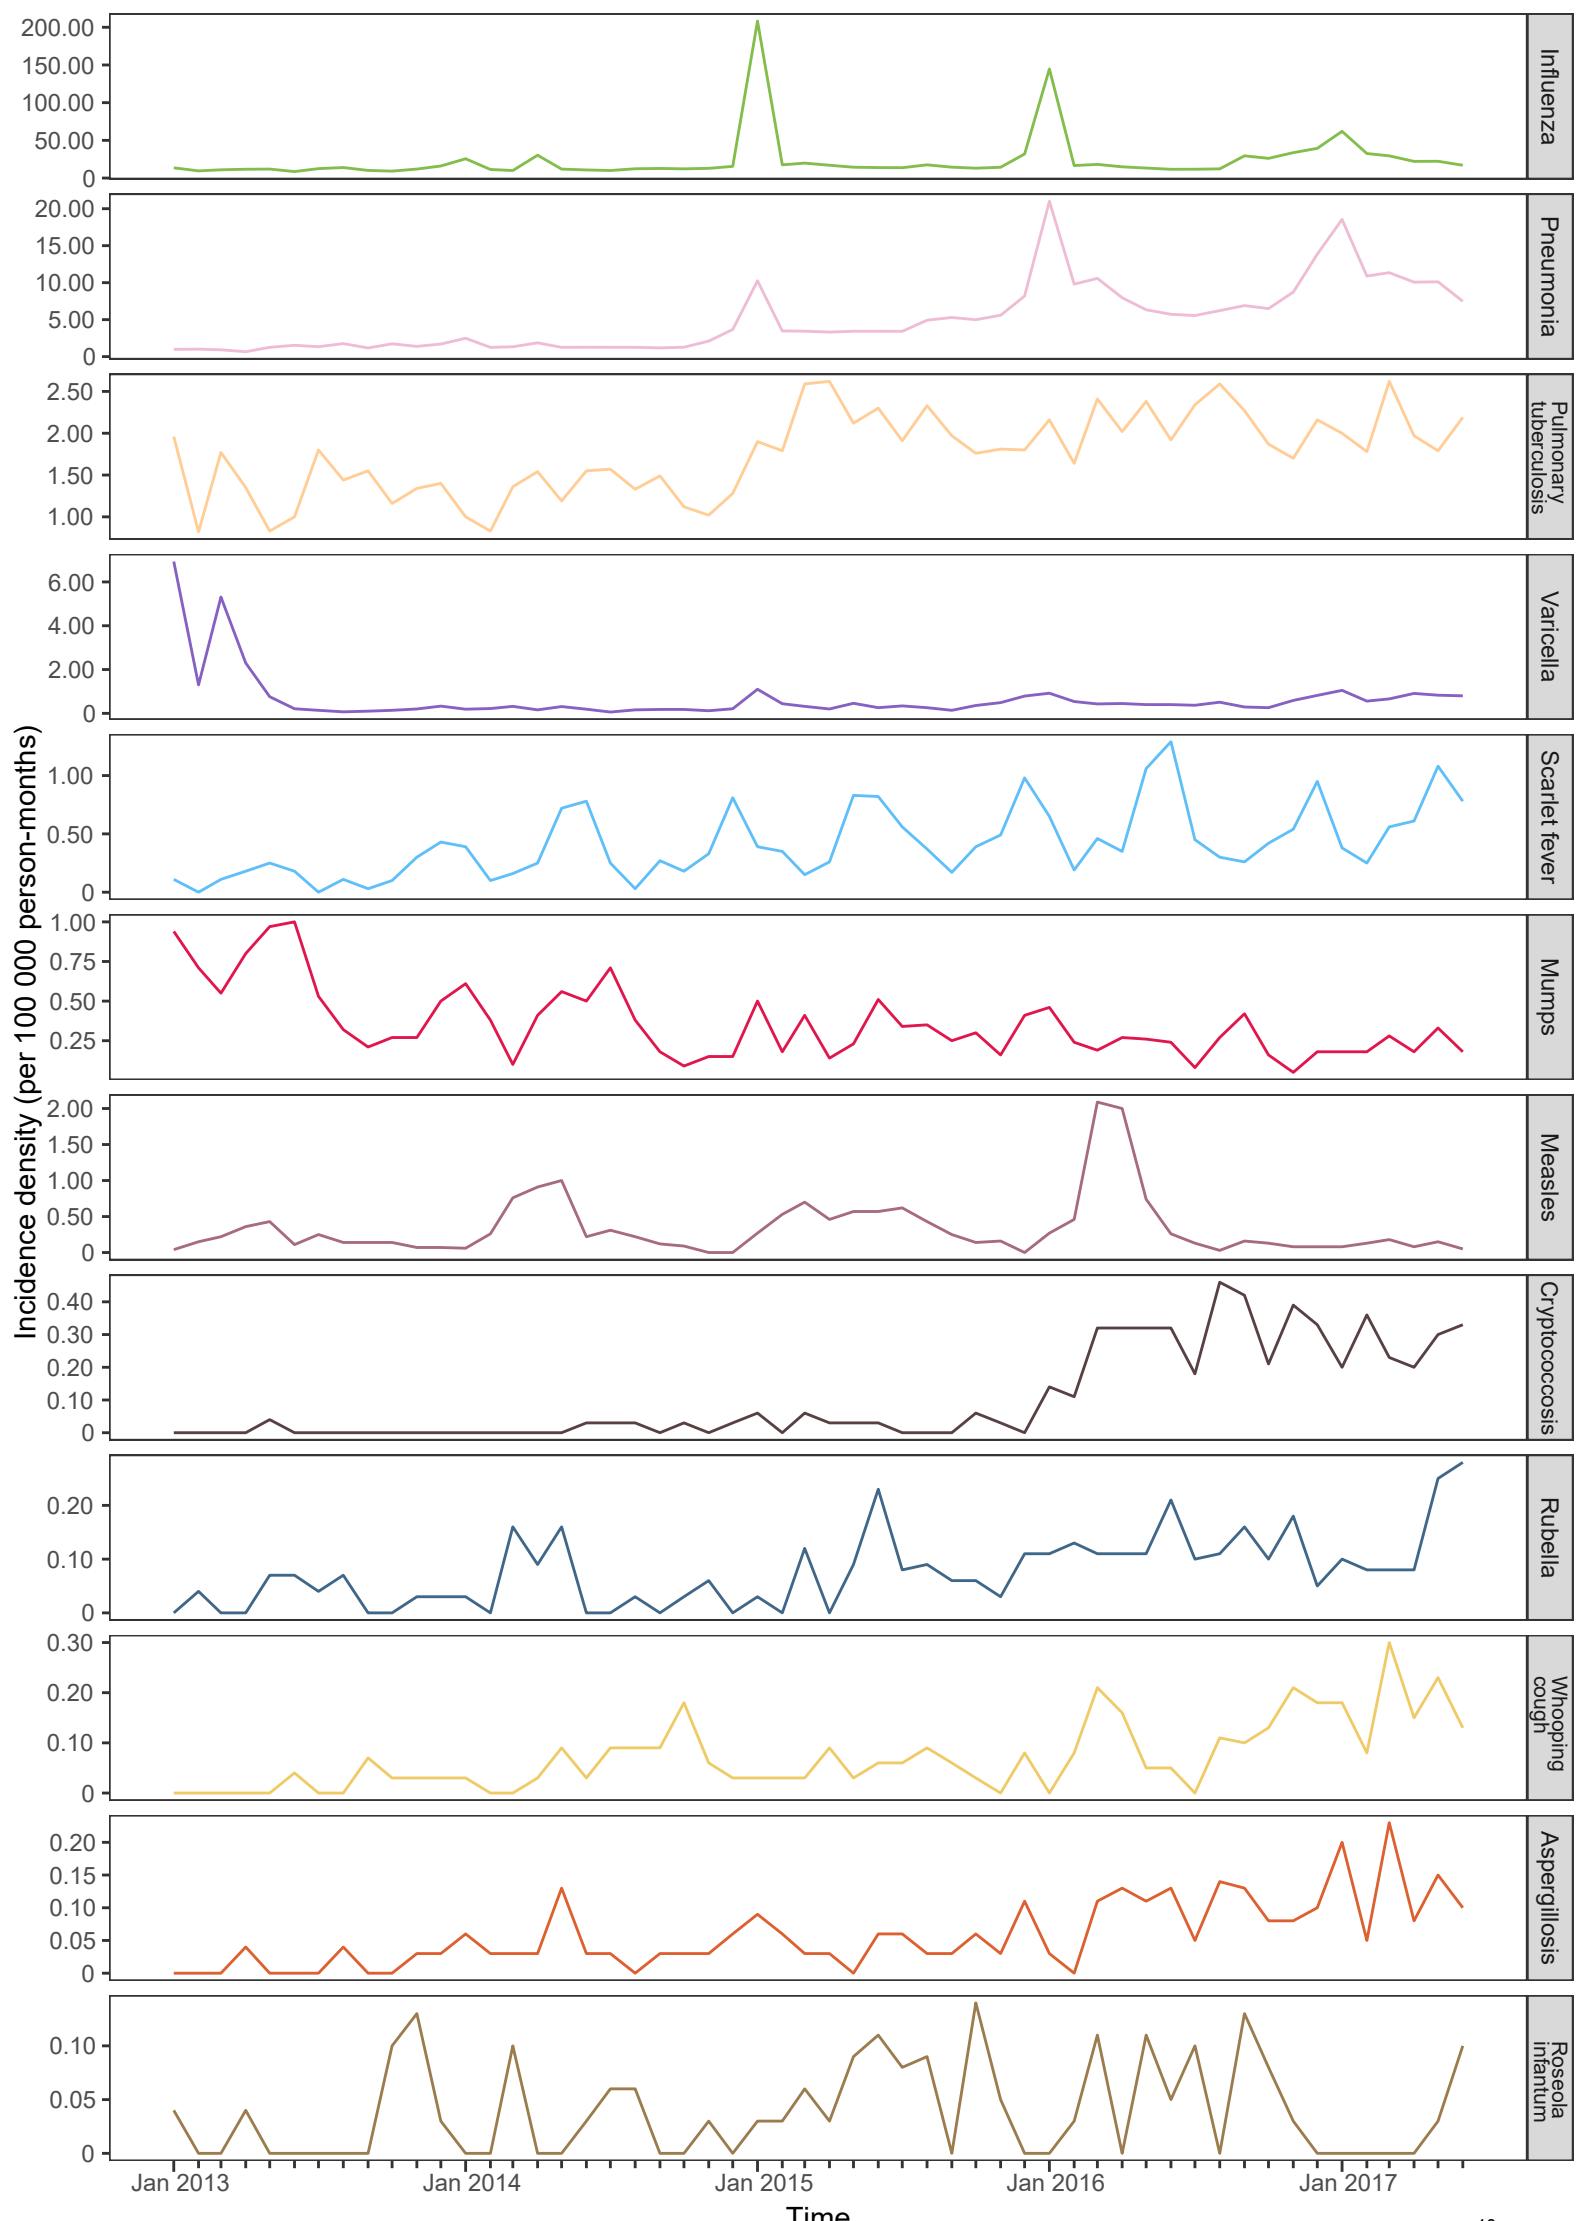

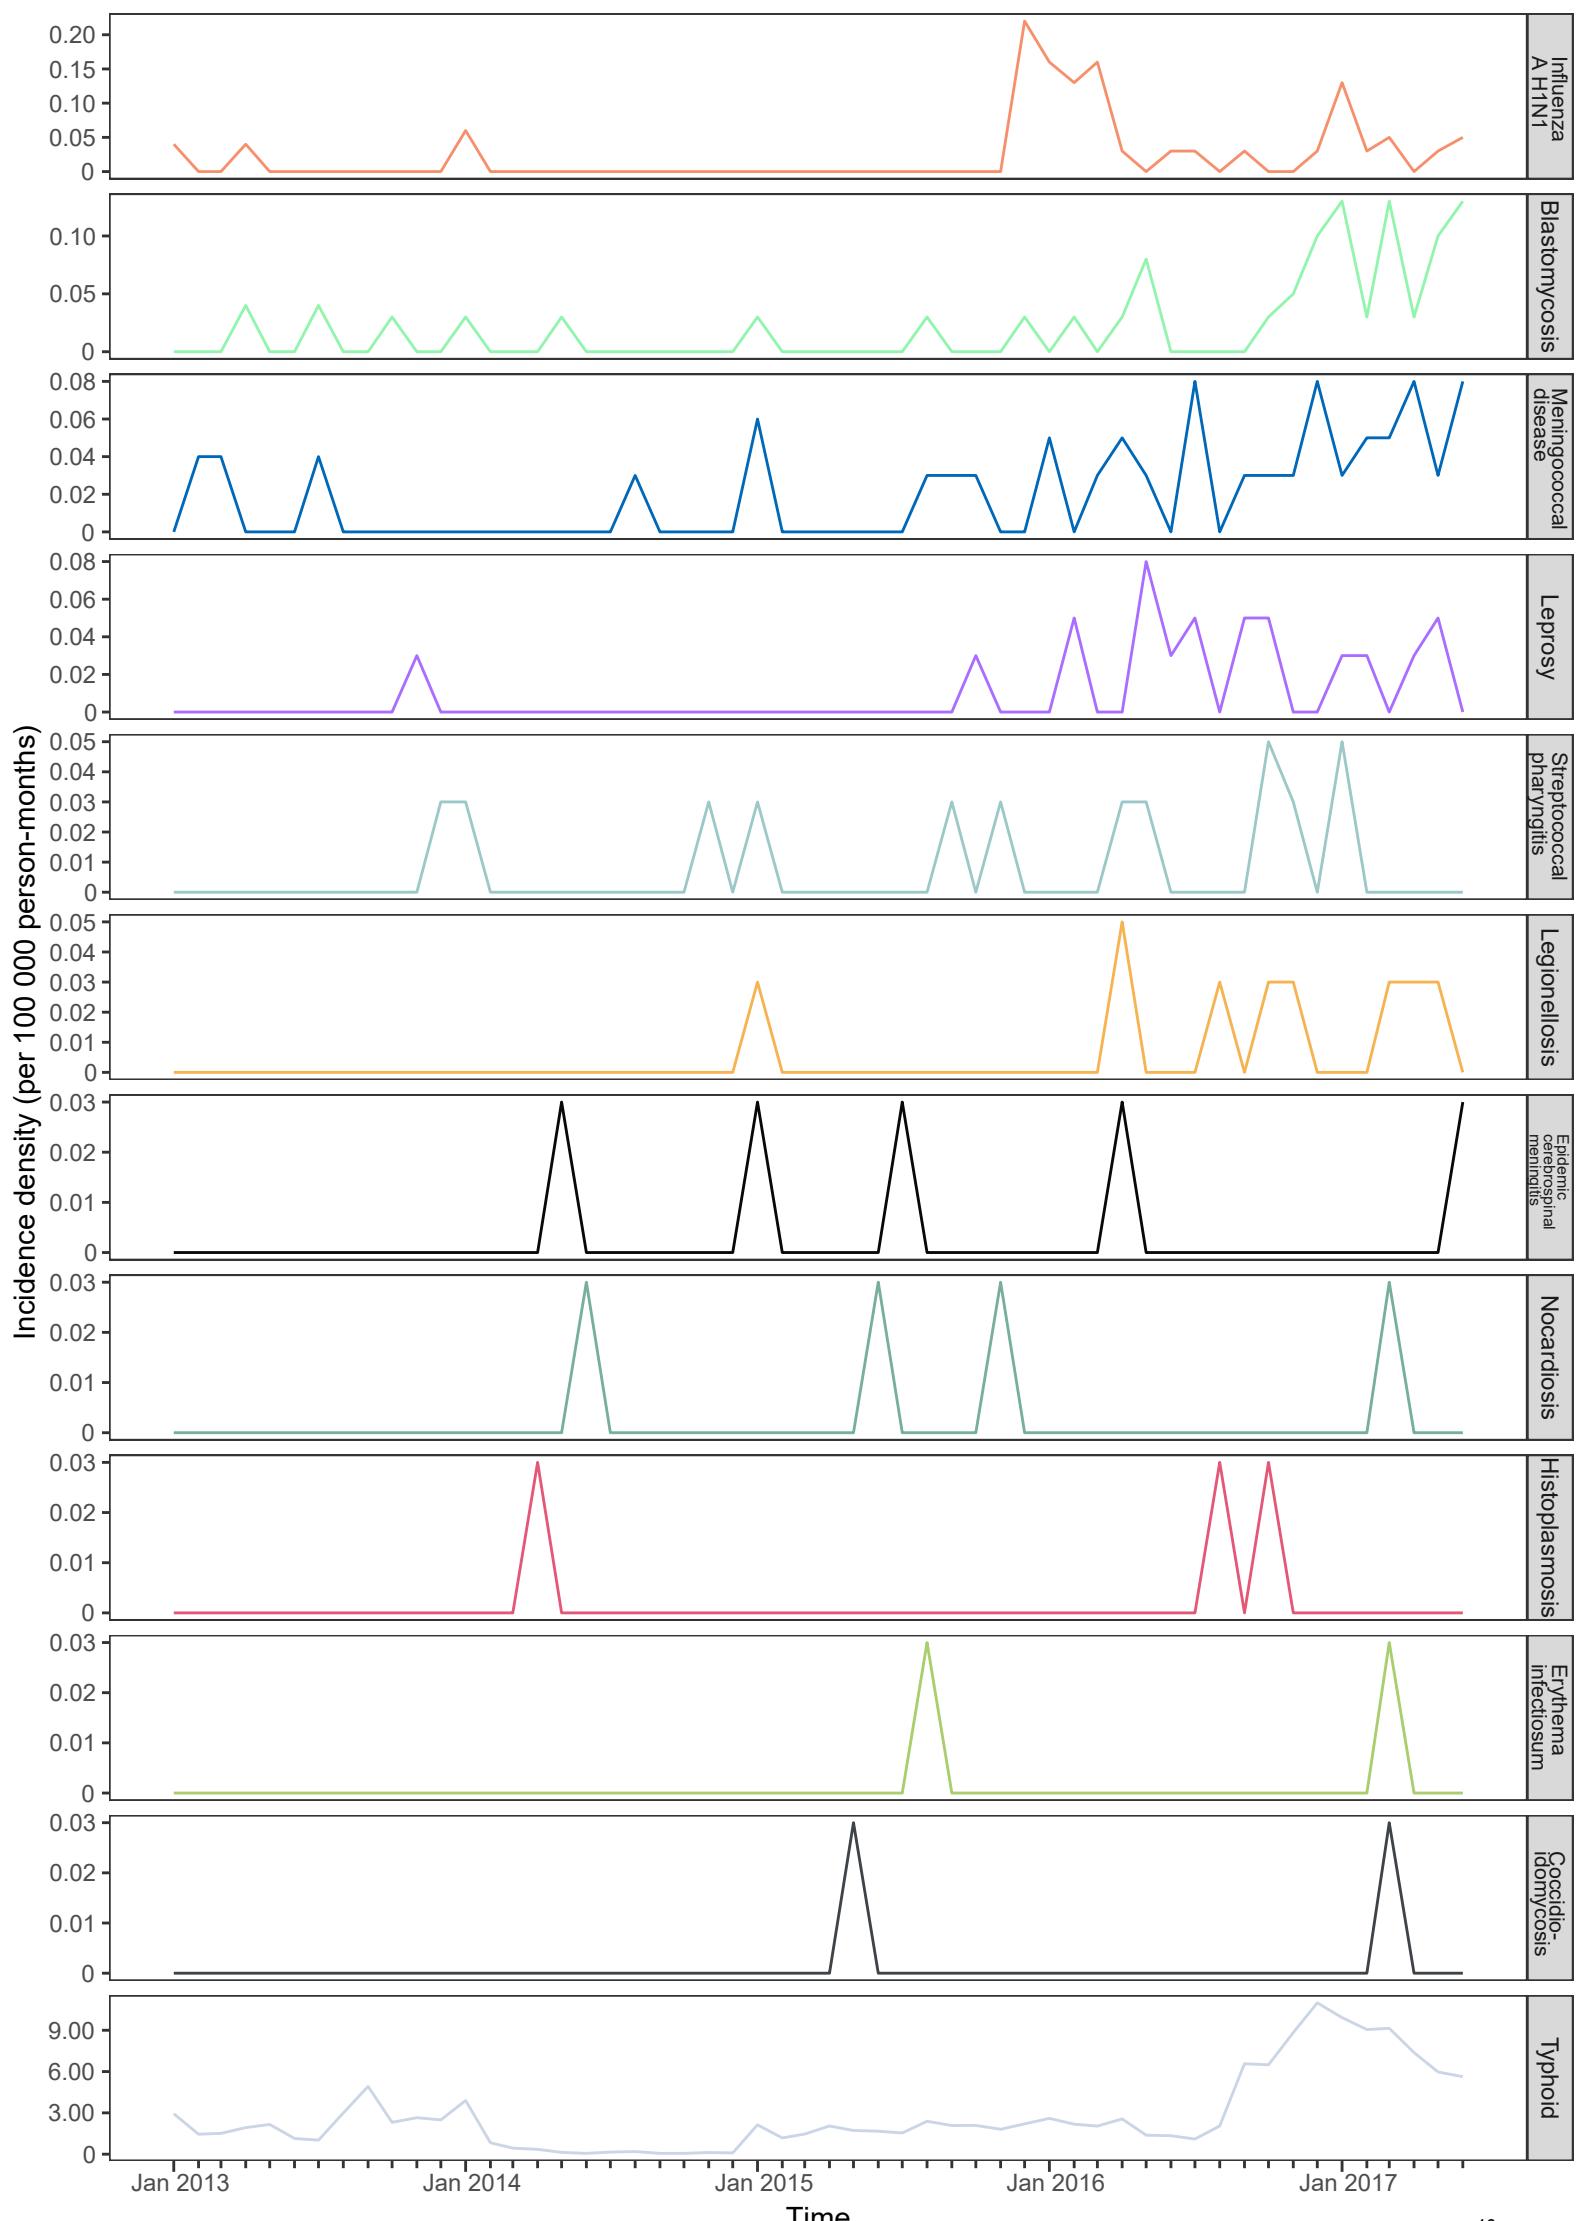

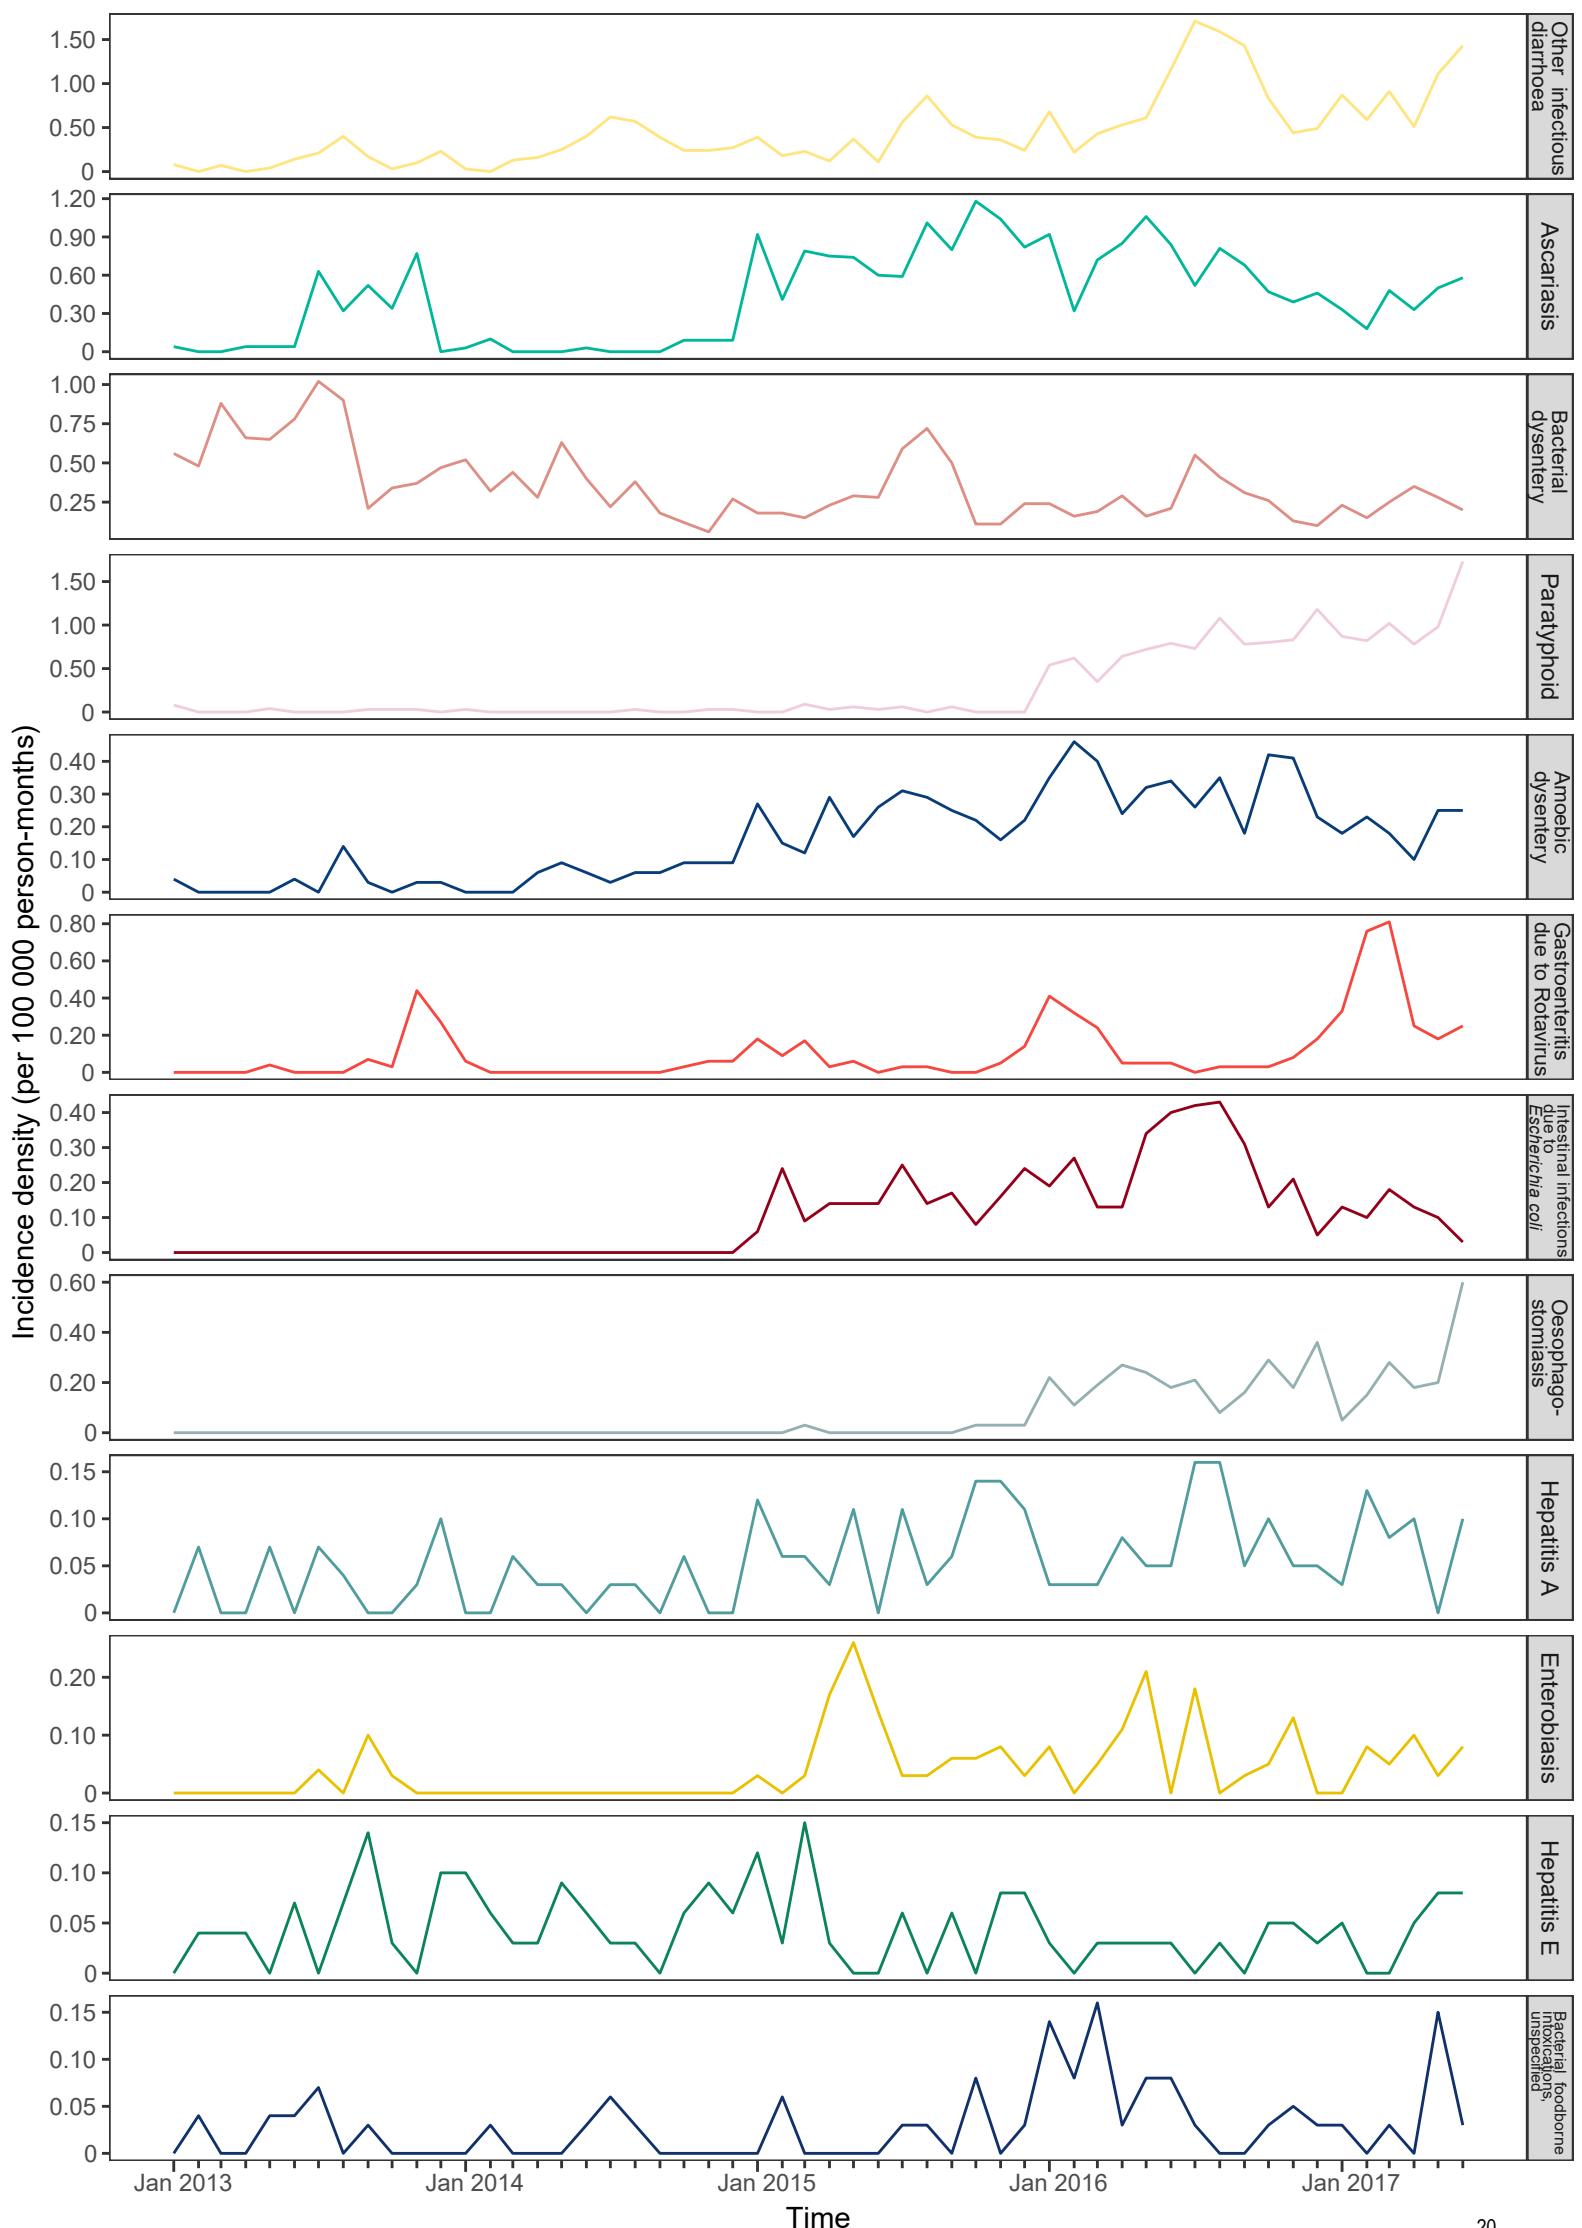

Figure S2: Age and sex differences related to the incidence density of the top 50 infectious diseases across different geographical regions (urban vs. rural dimension).

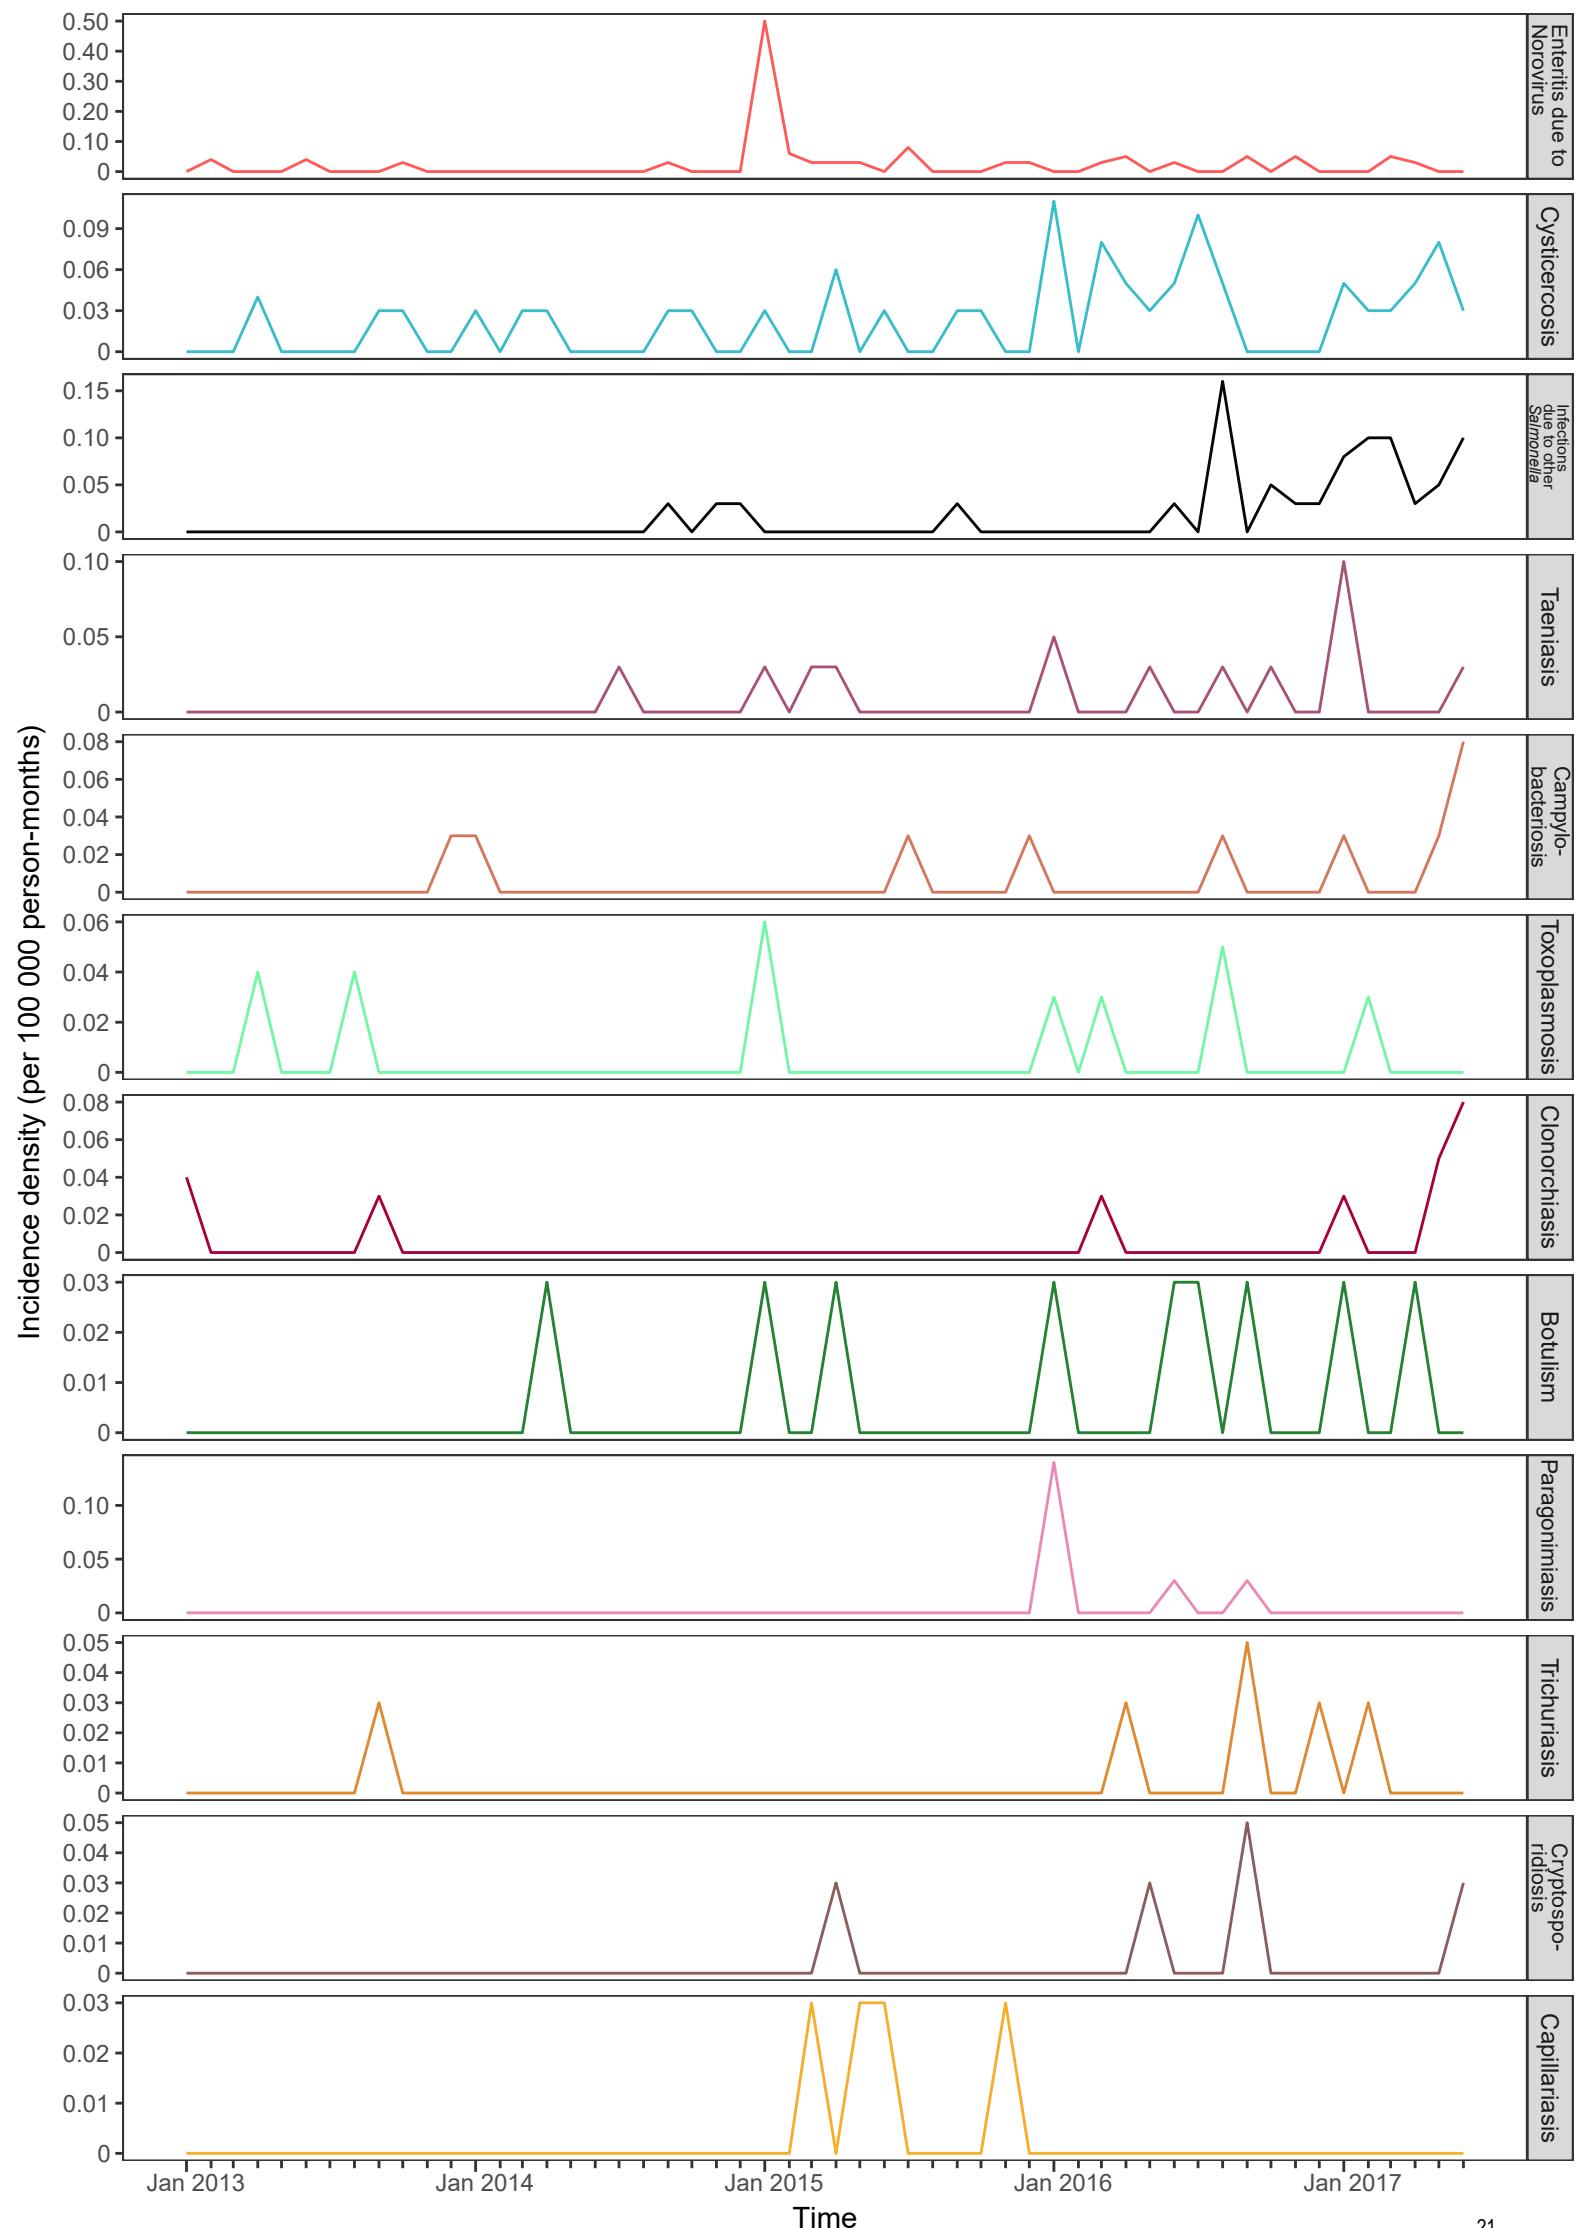

All infectious diseases with more than 50 cases (50 out of 130 infectious diseases) are shown.

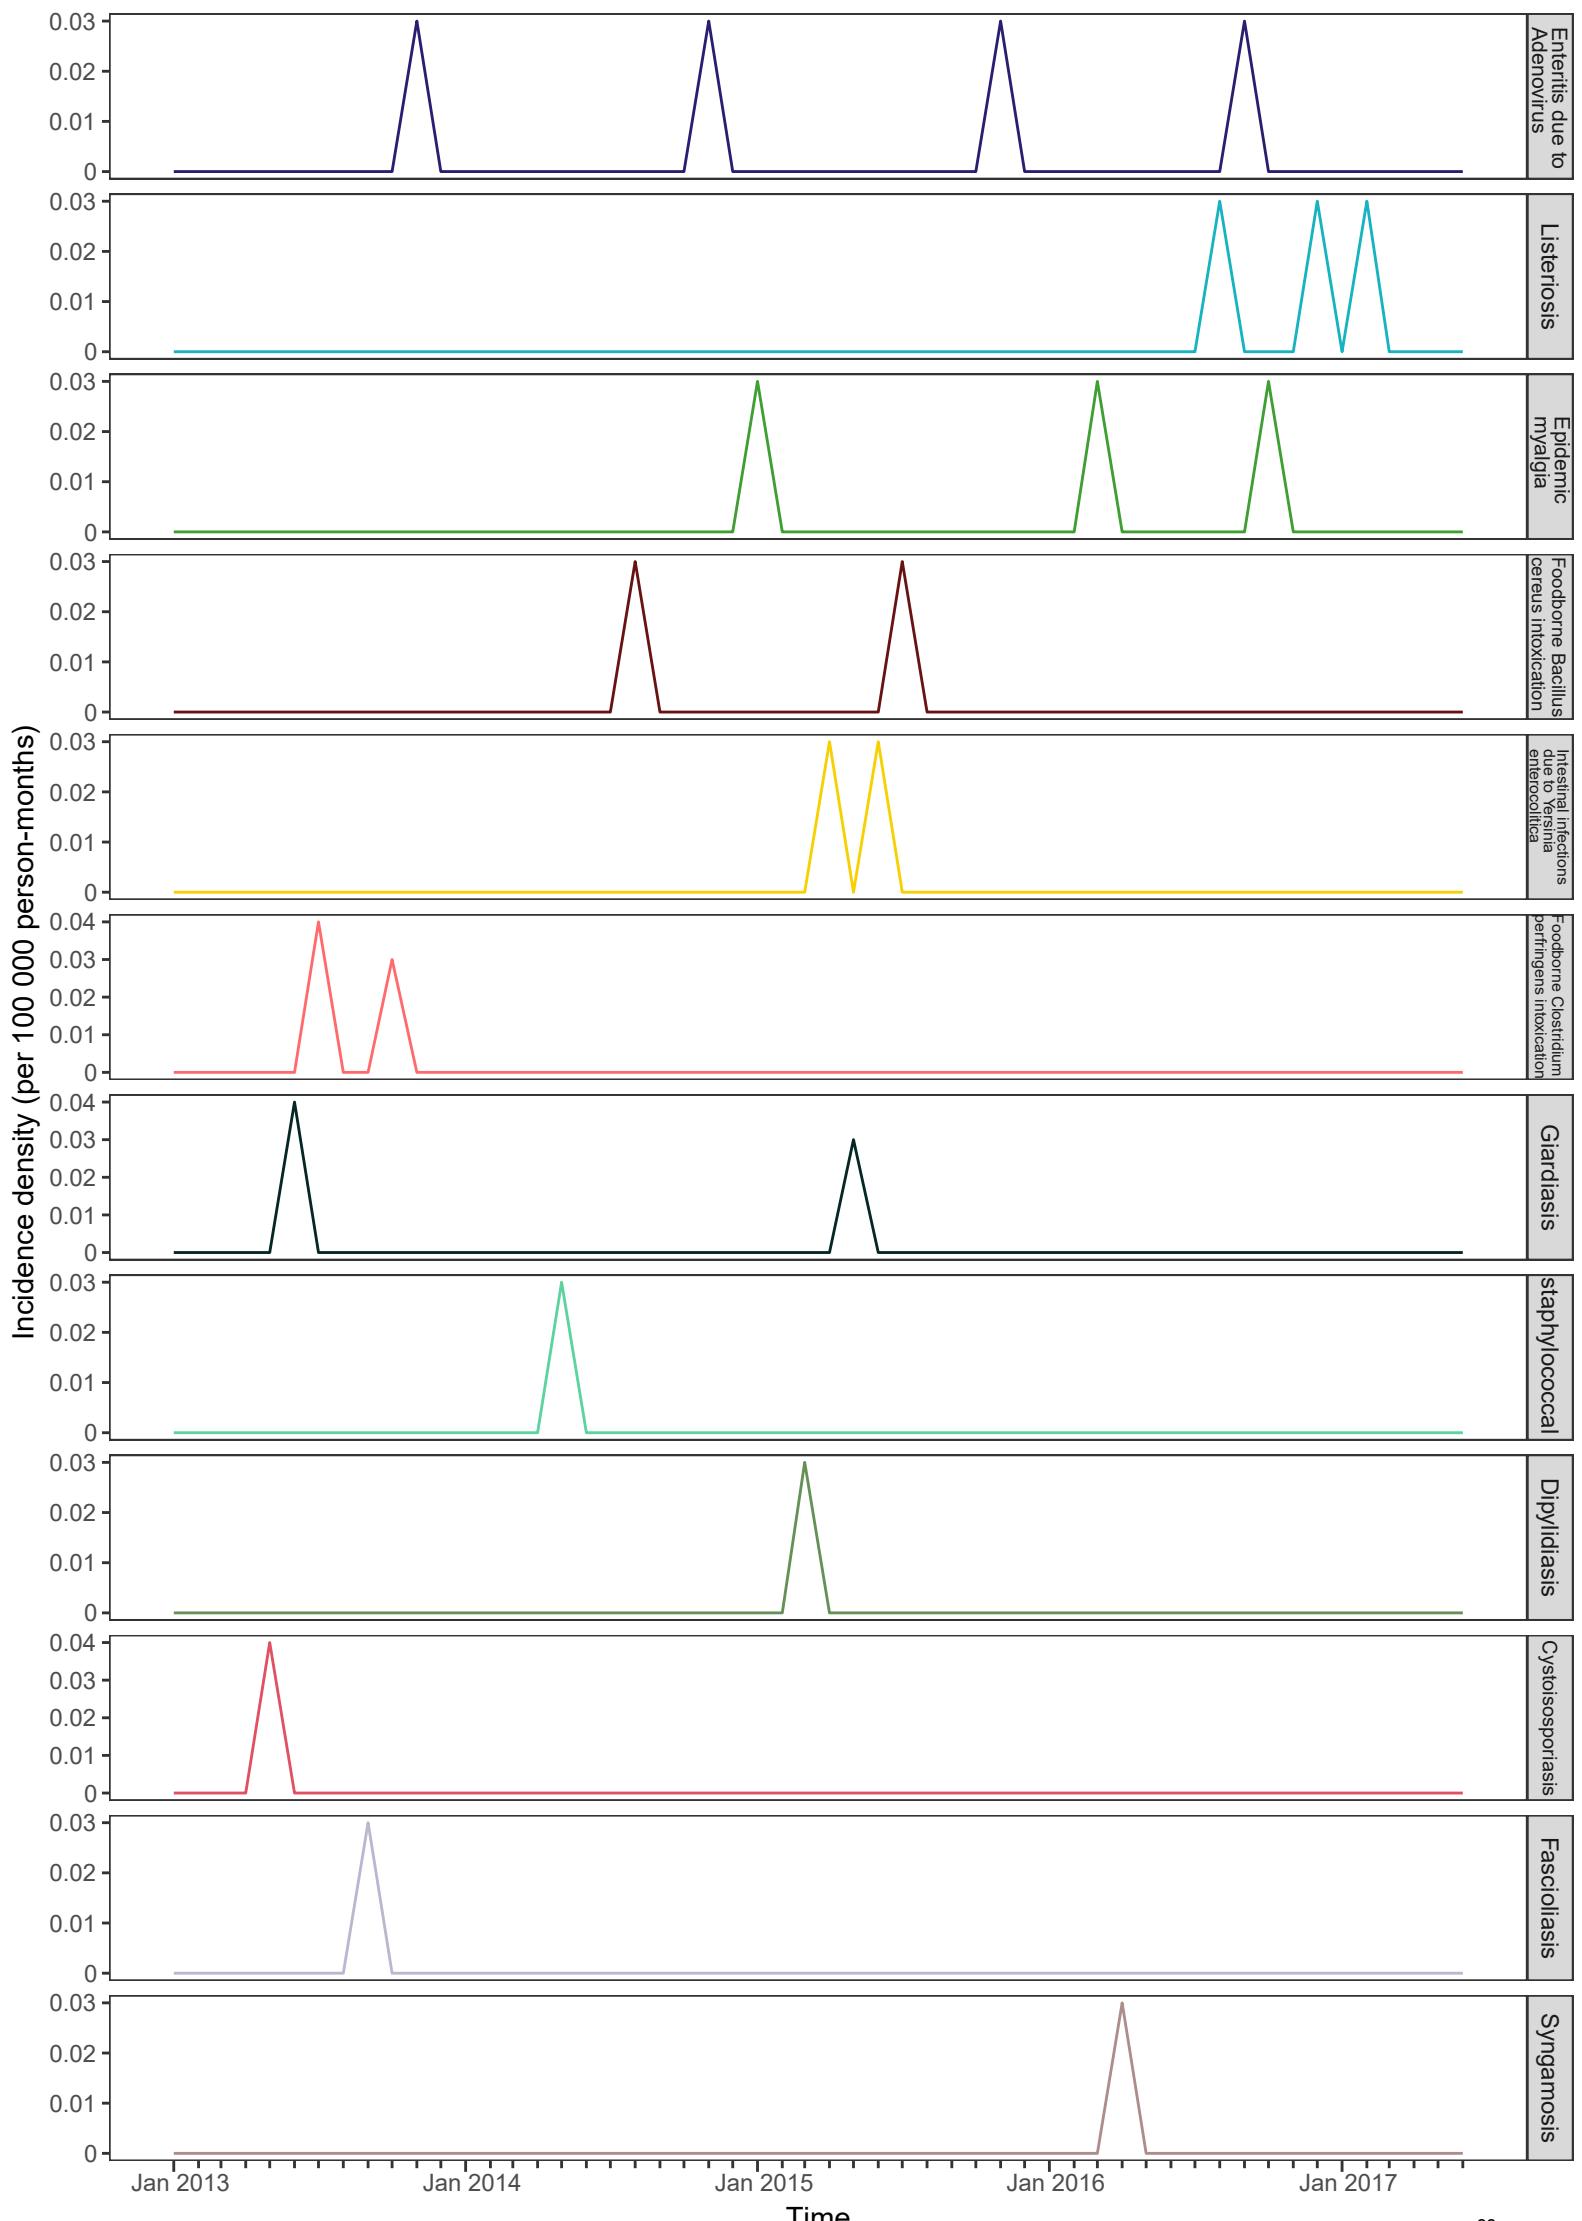

HIV=human immunodeficiency virus, PIPSM=picornavirus infections presenting in the skin or mucous membranes.

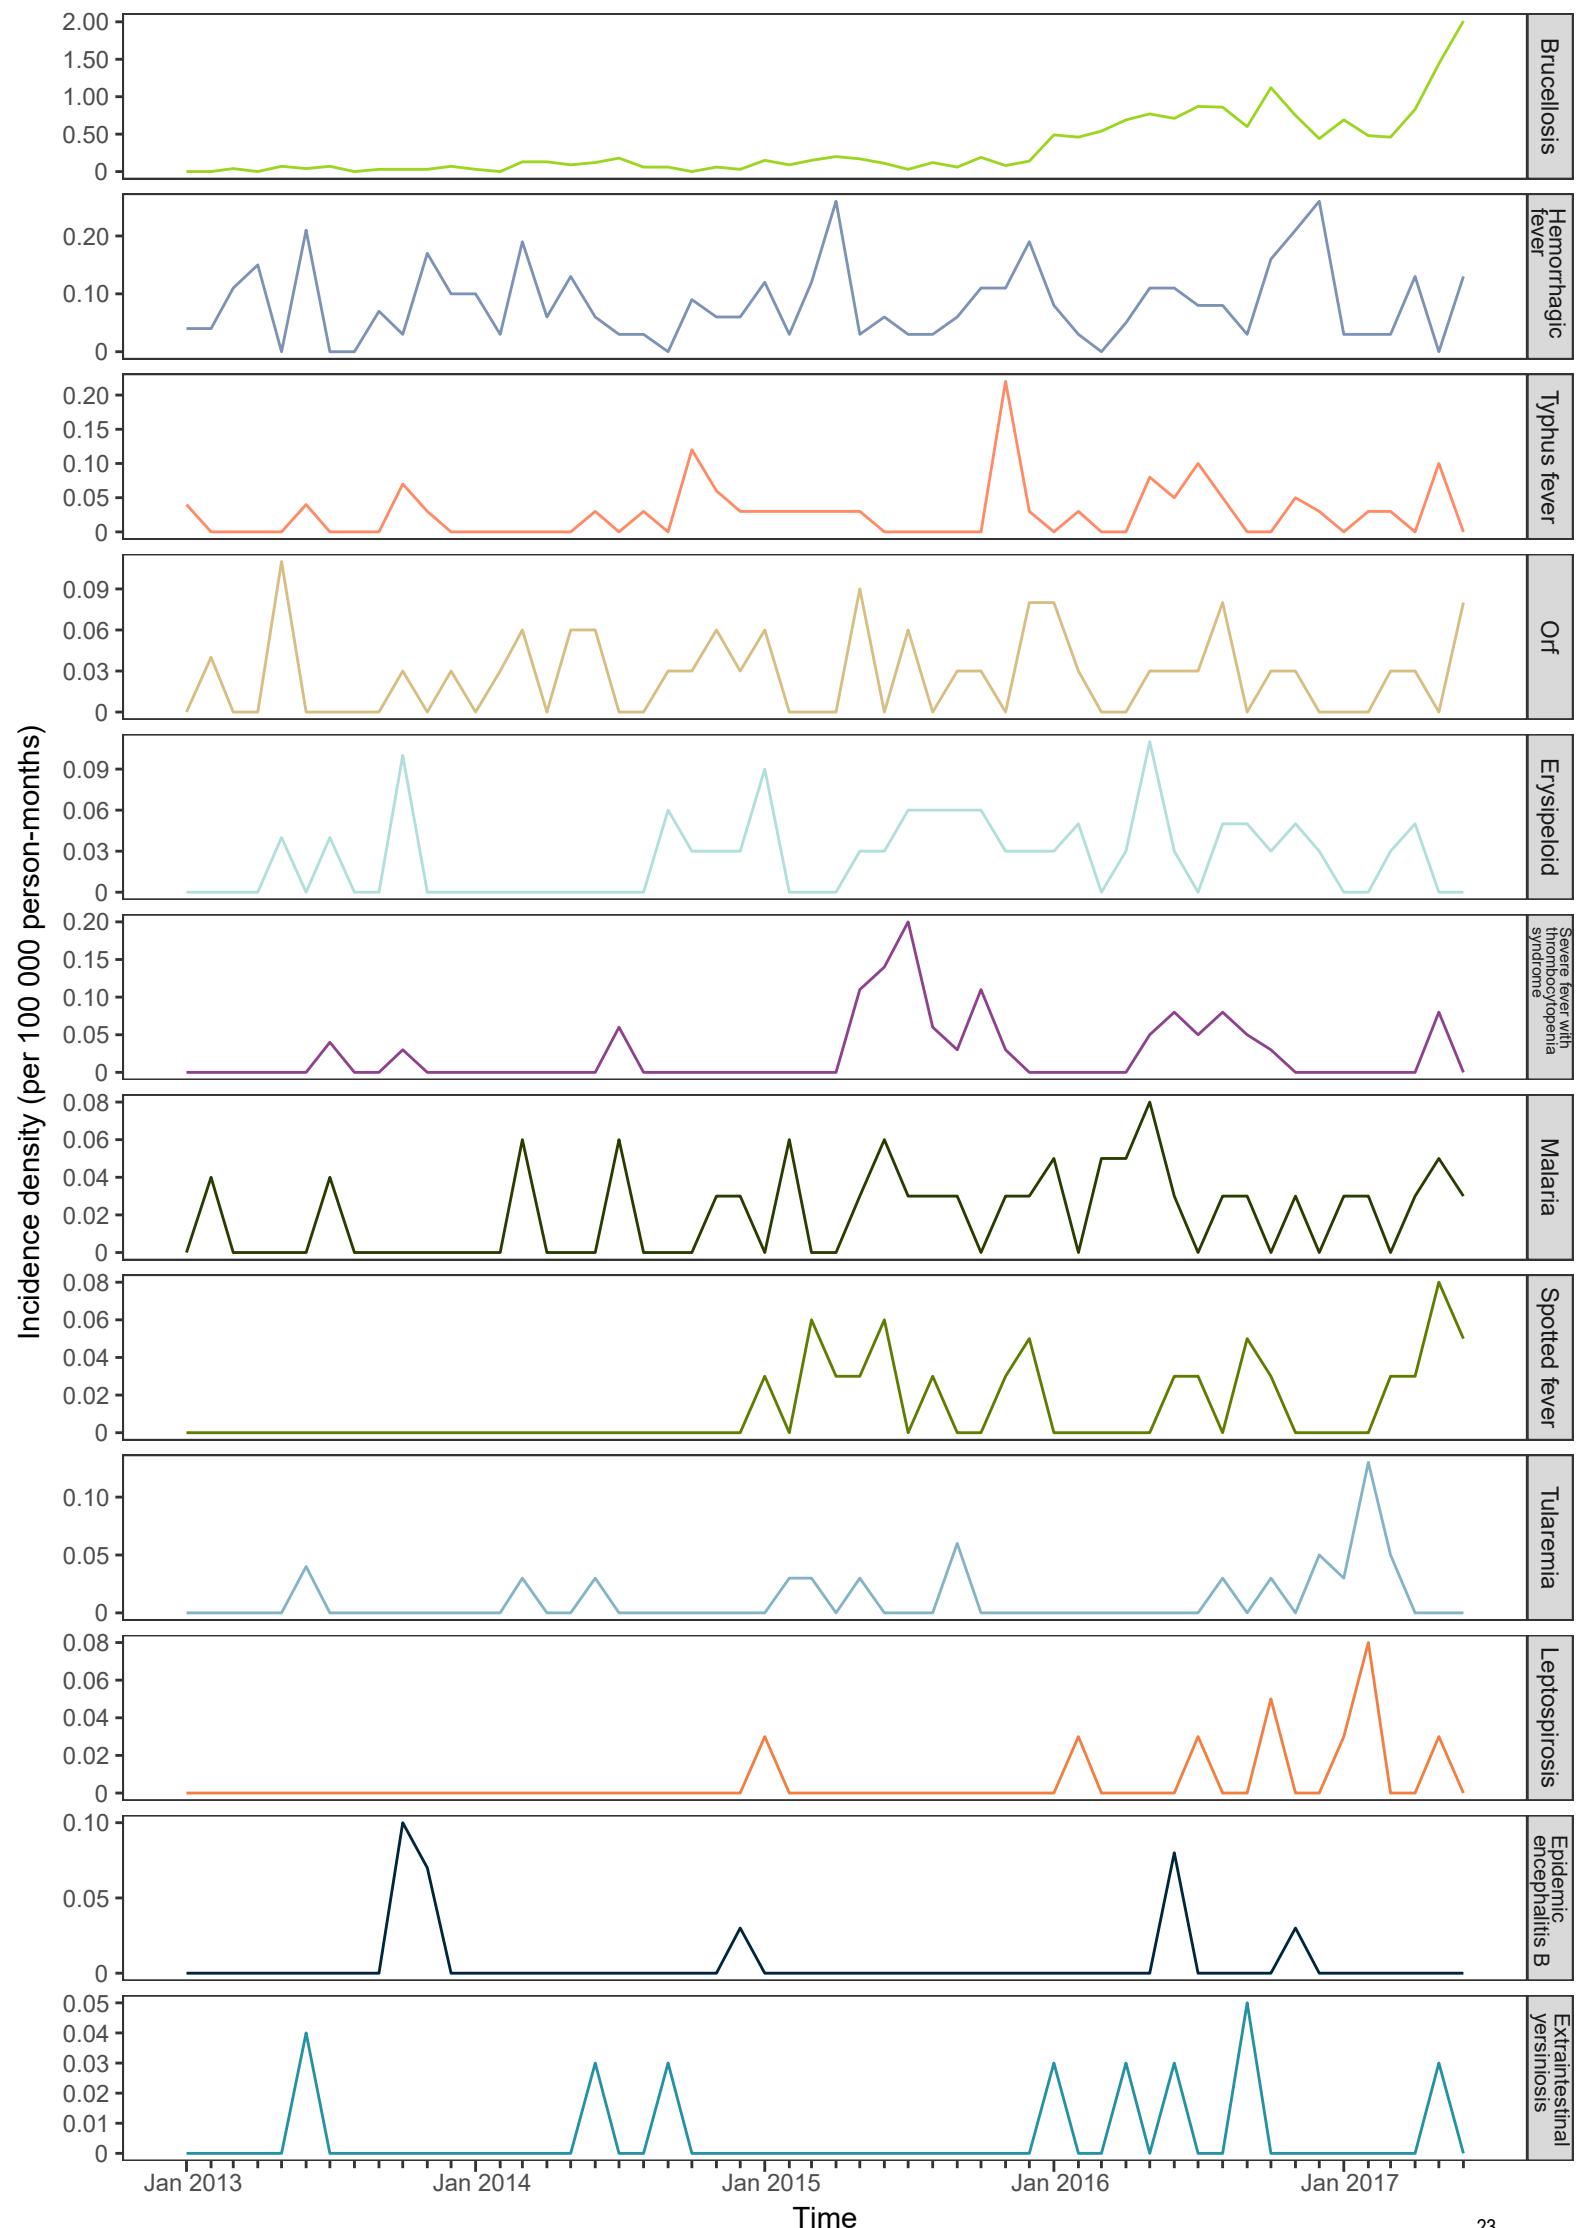

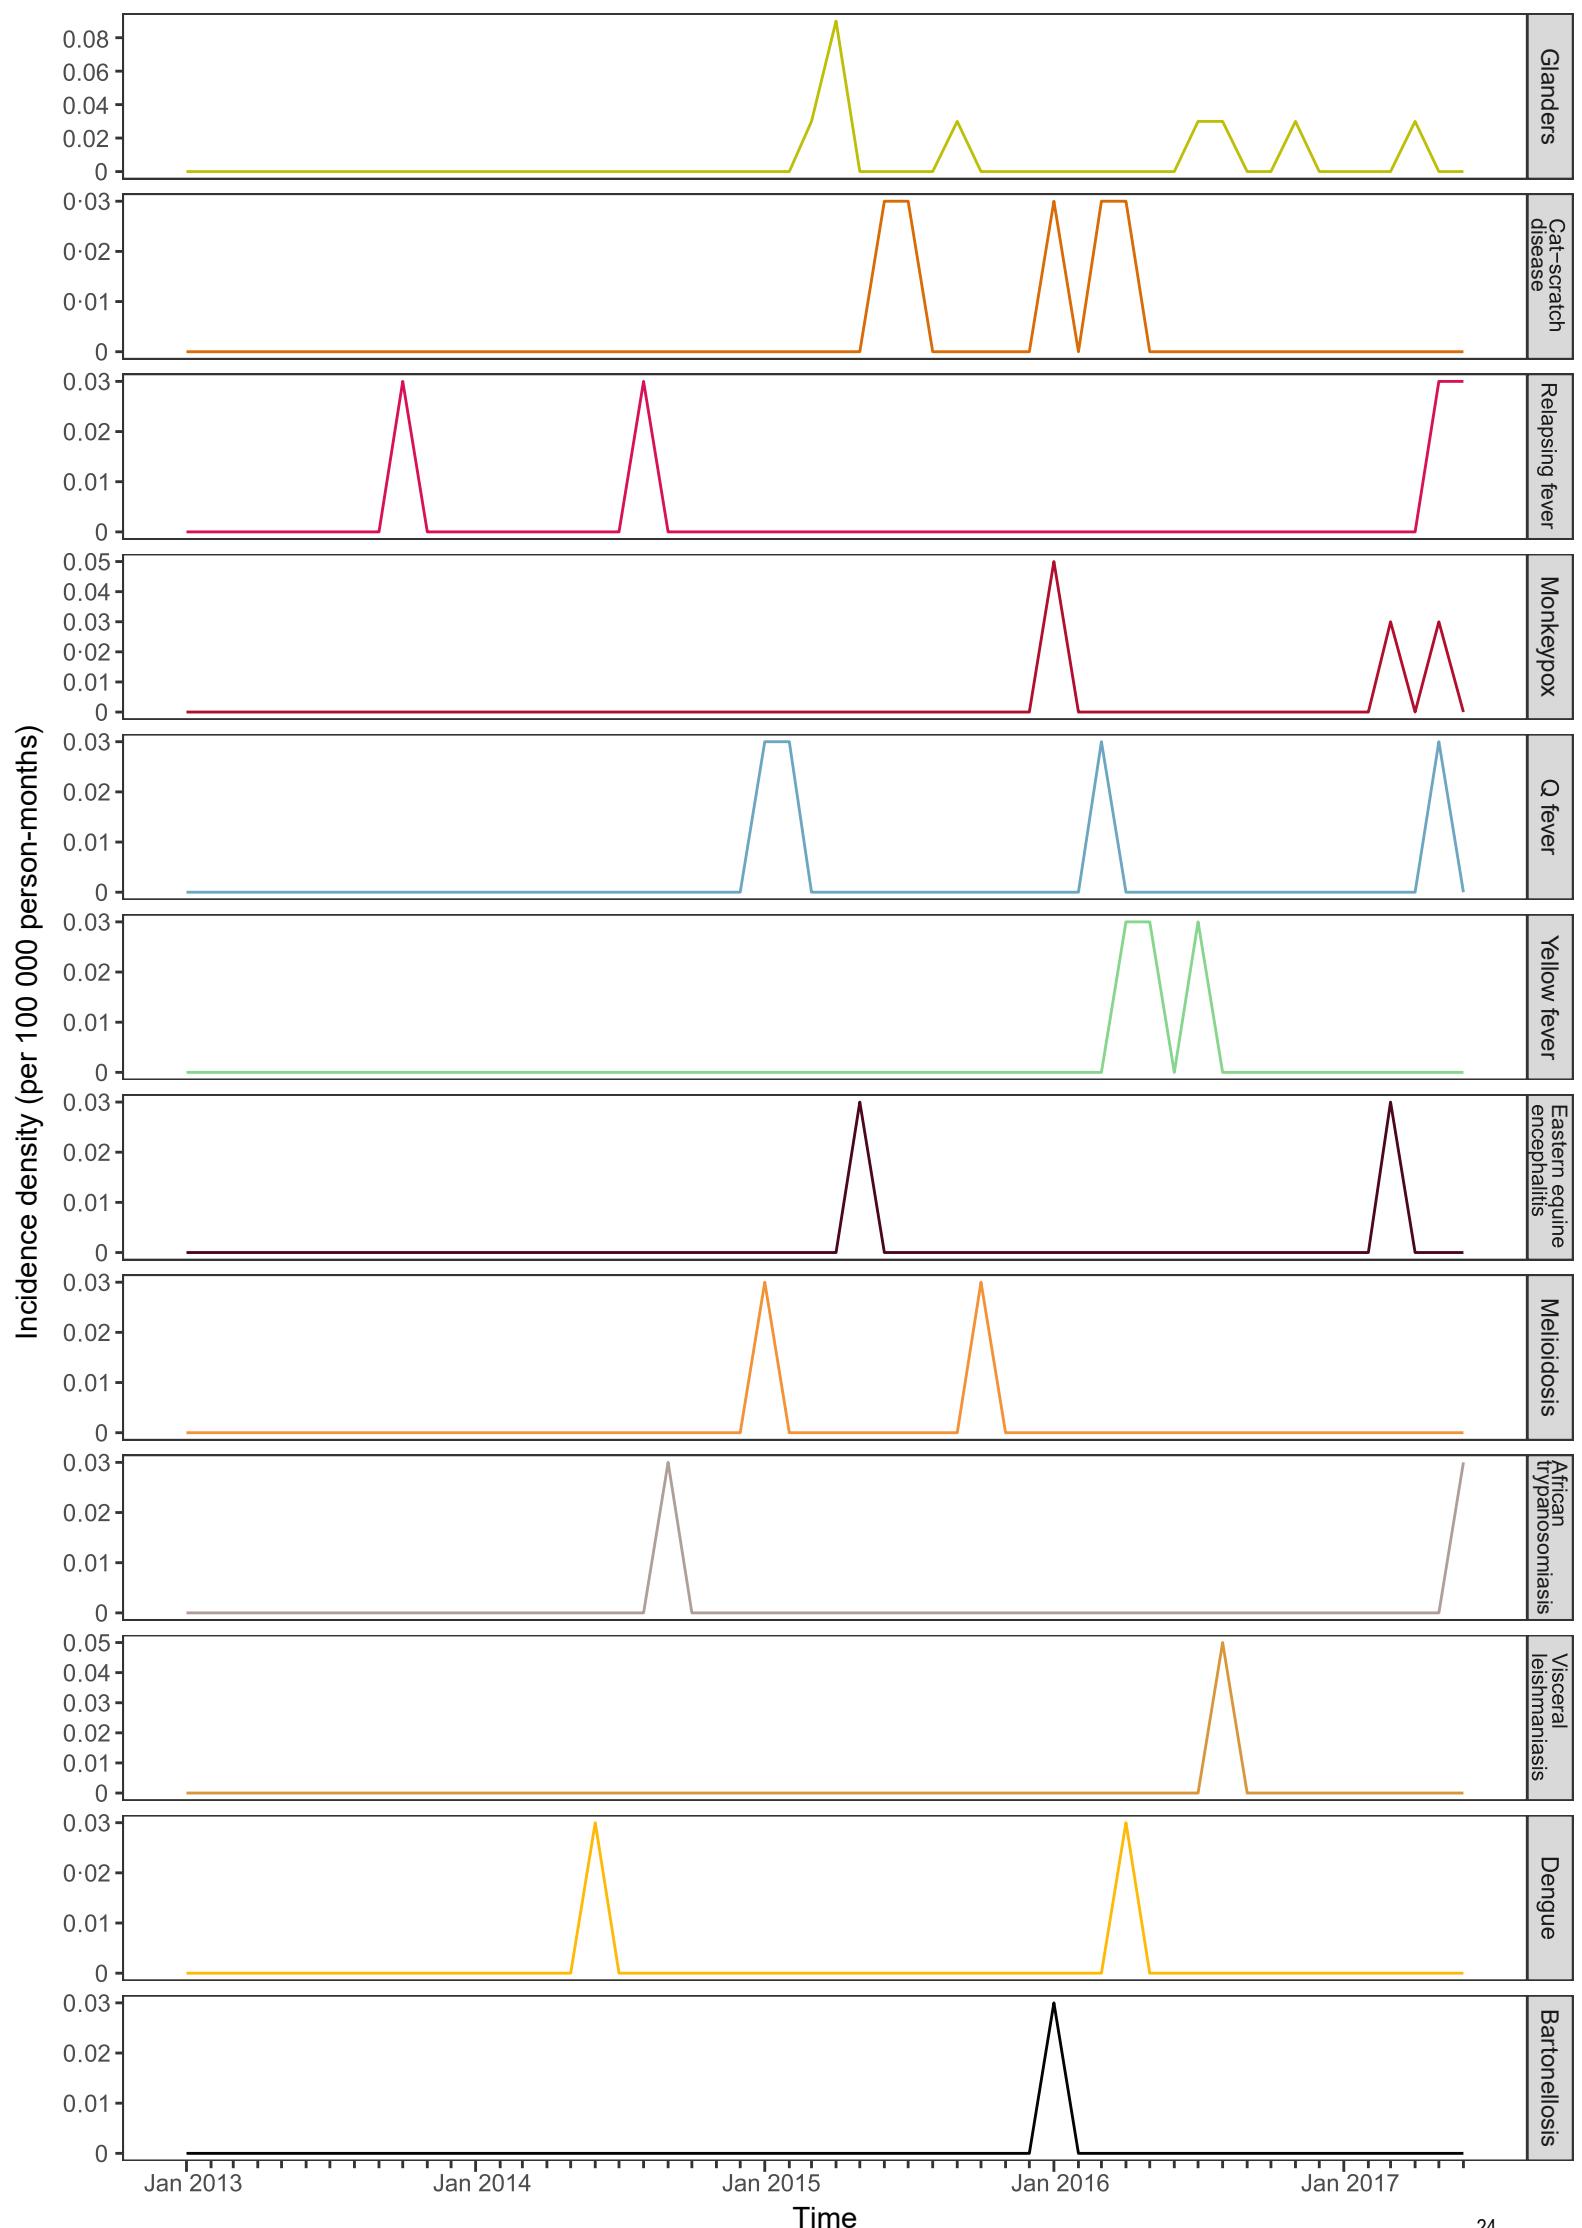

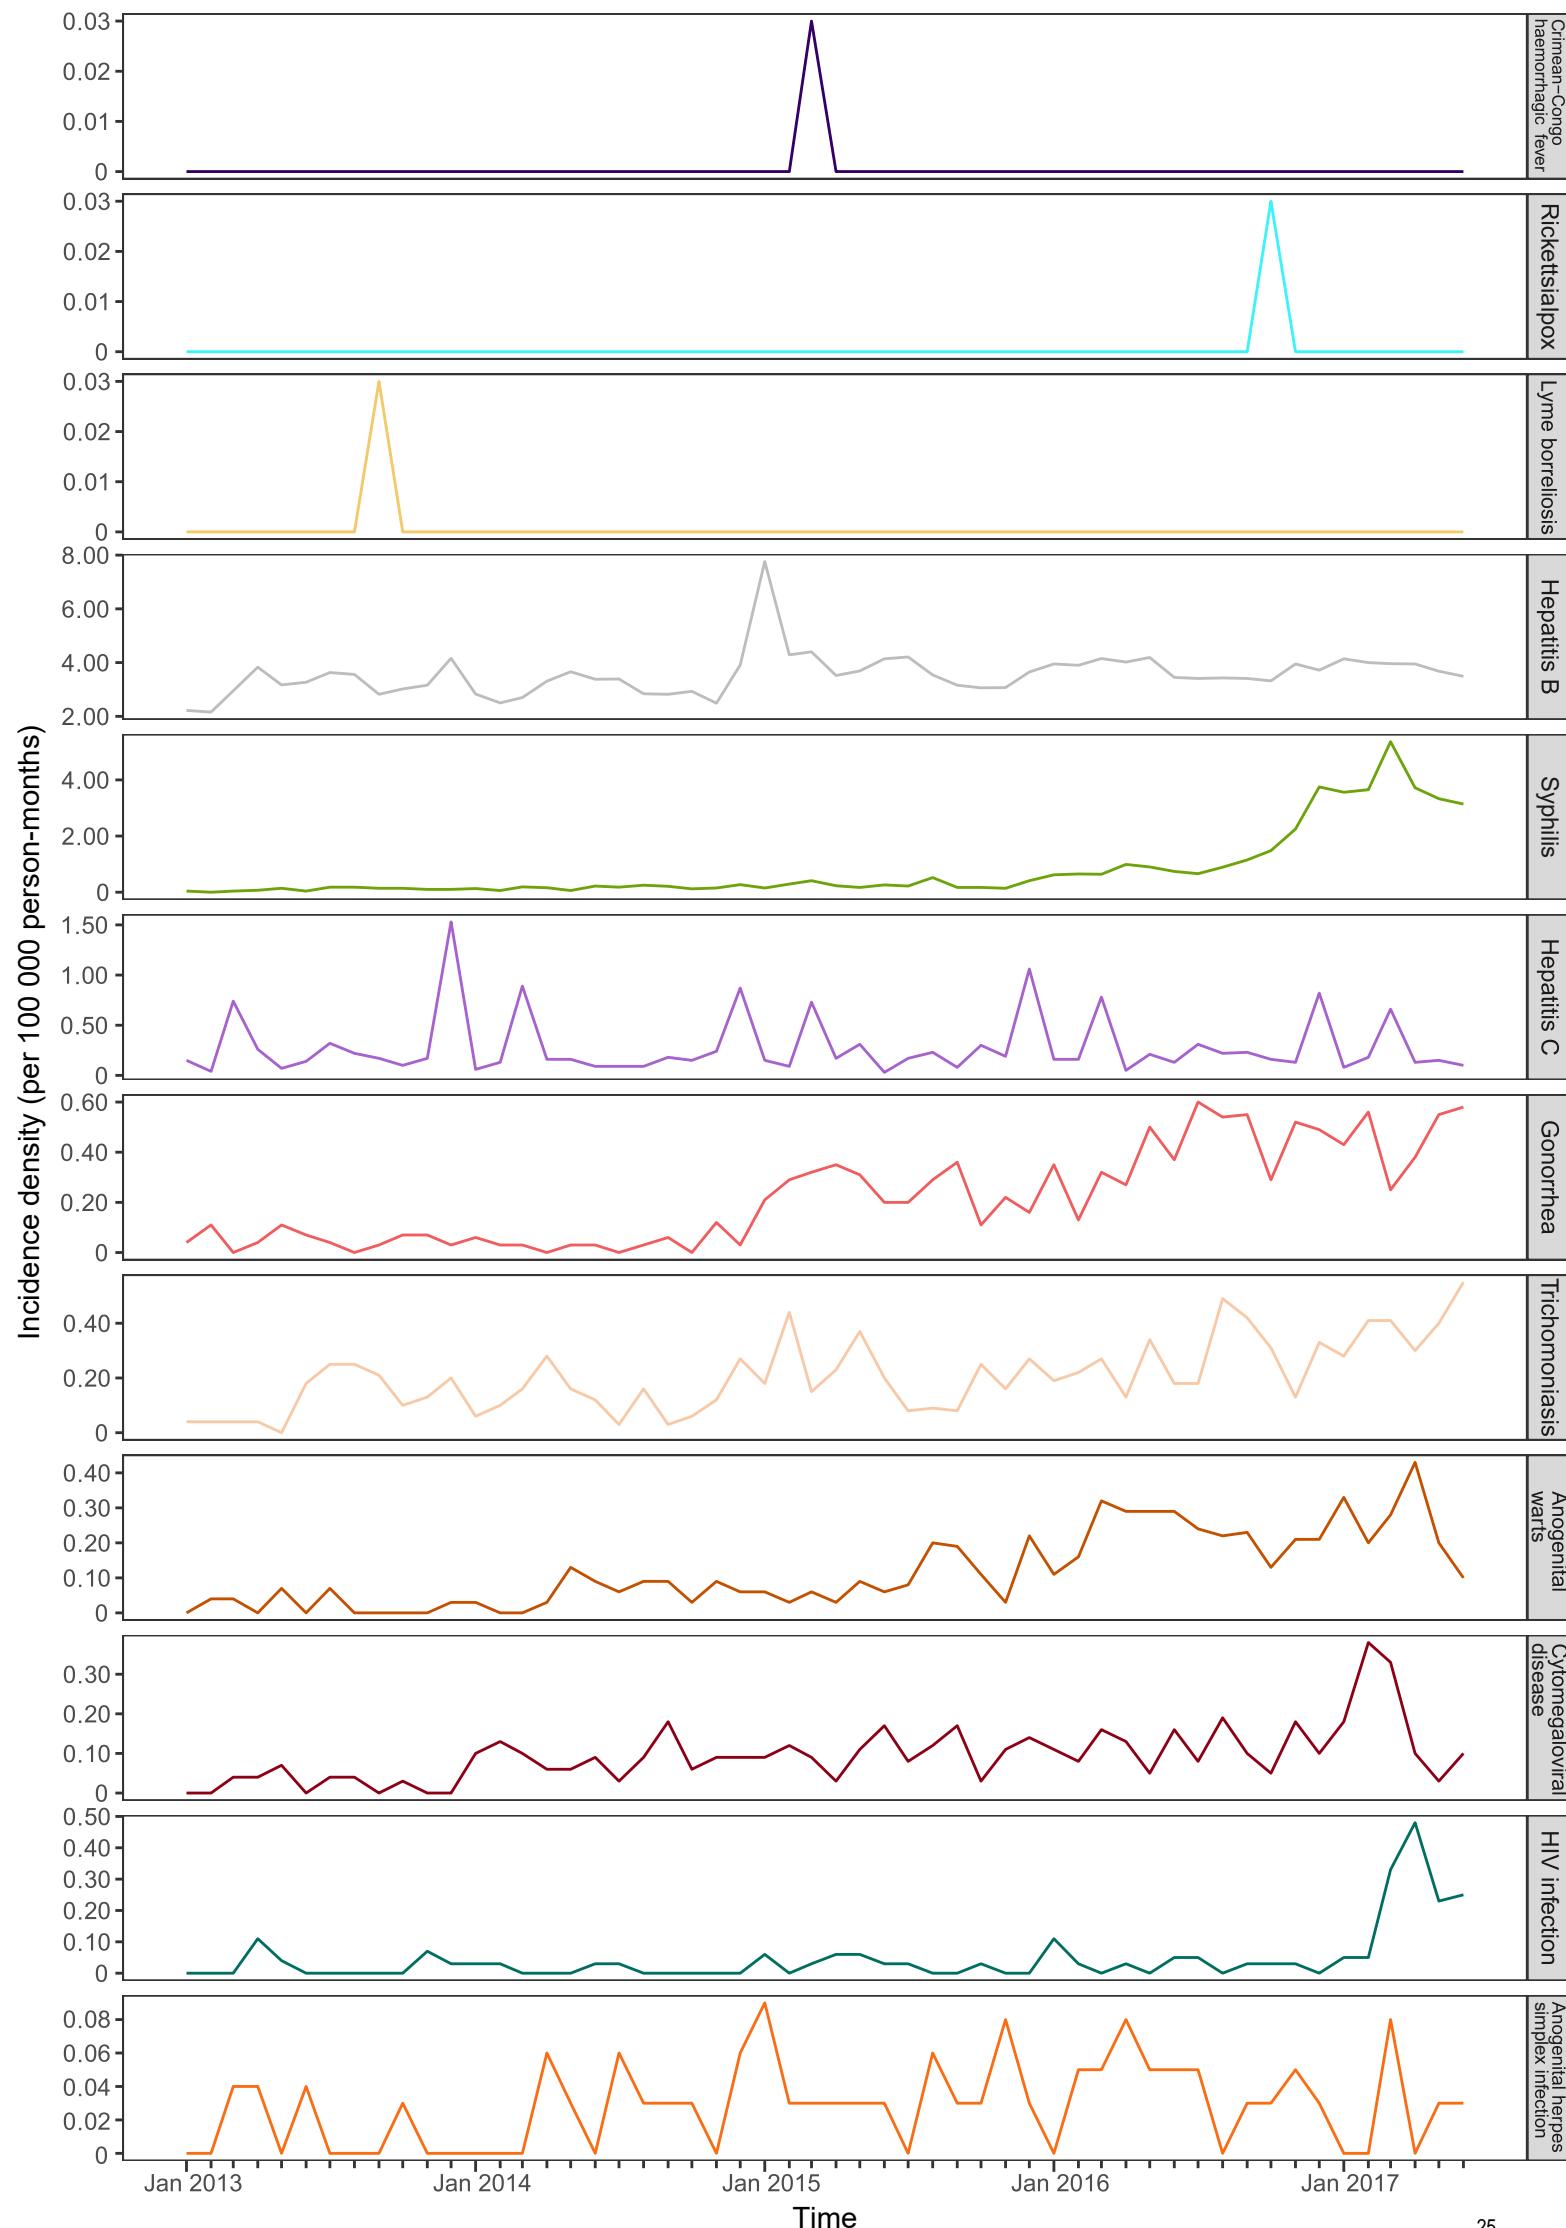

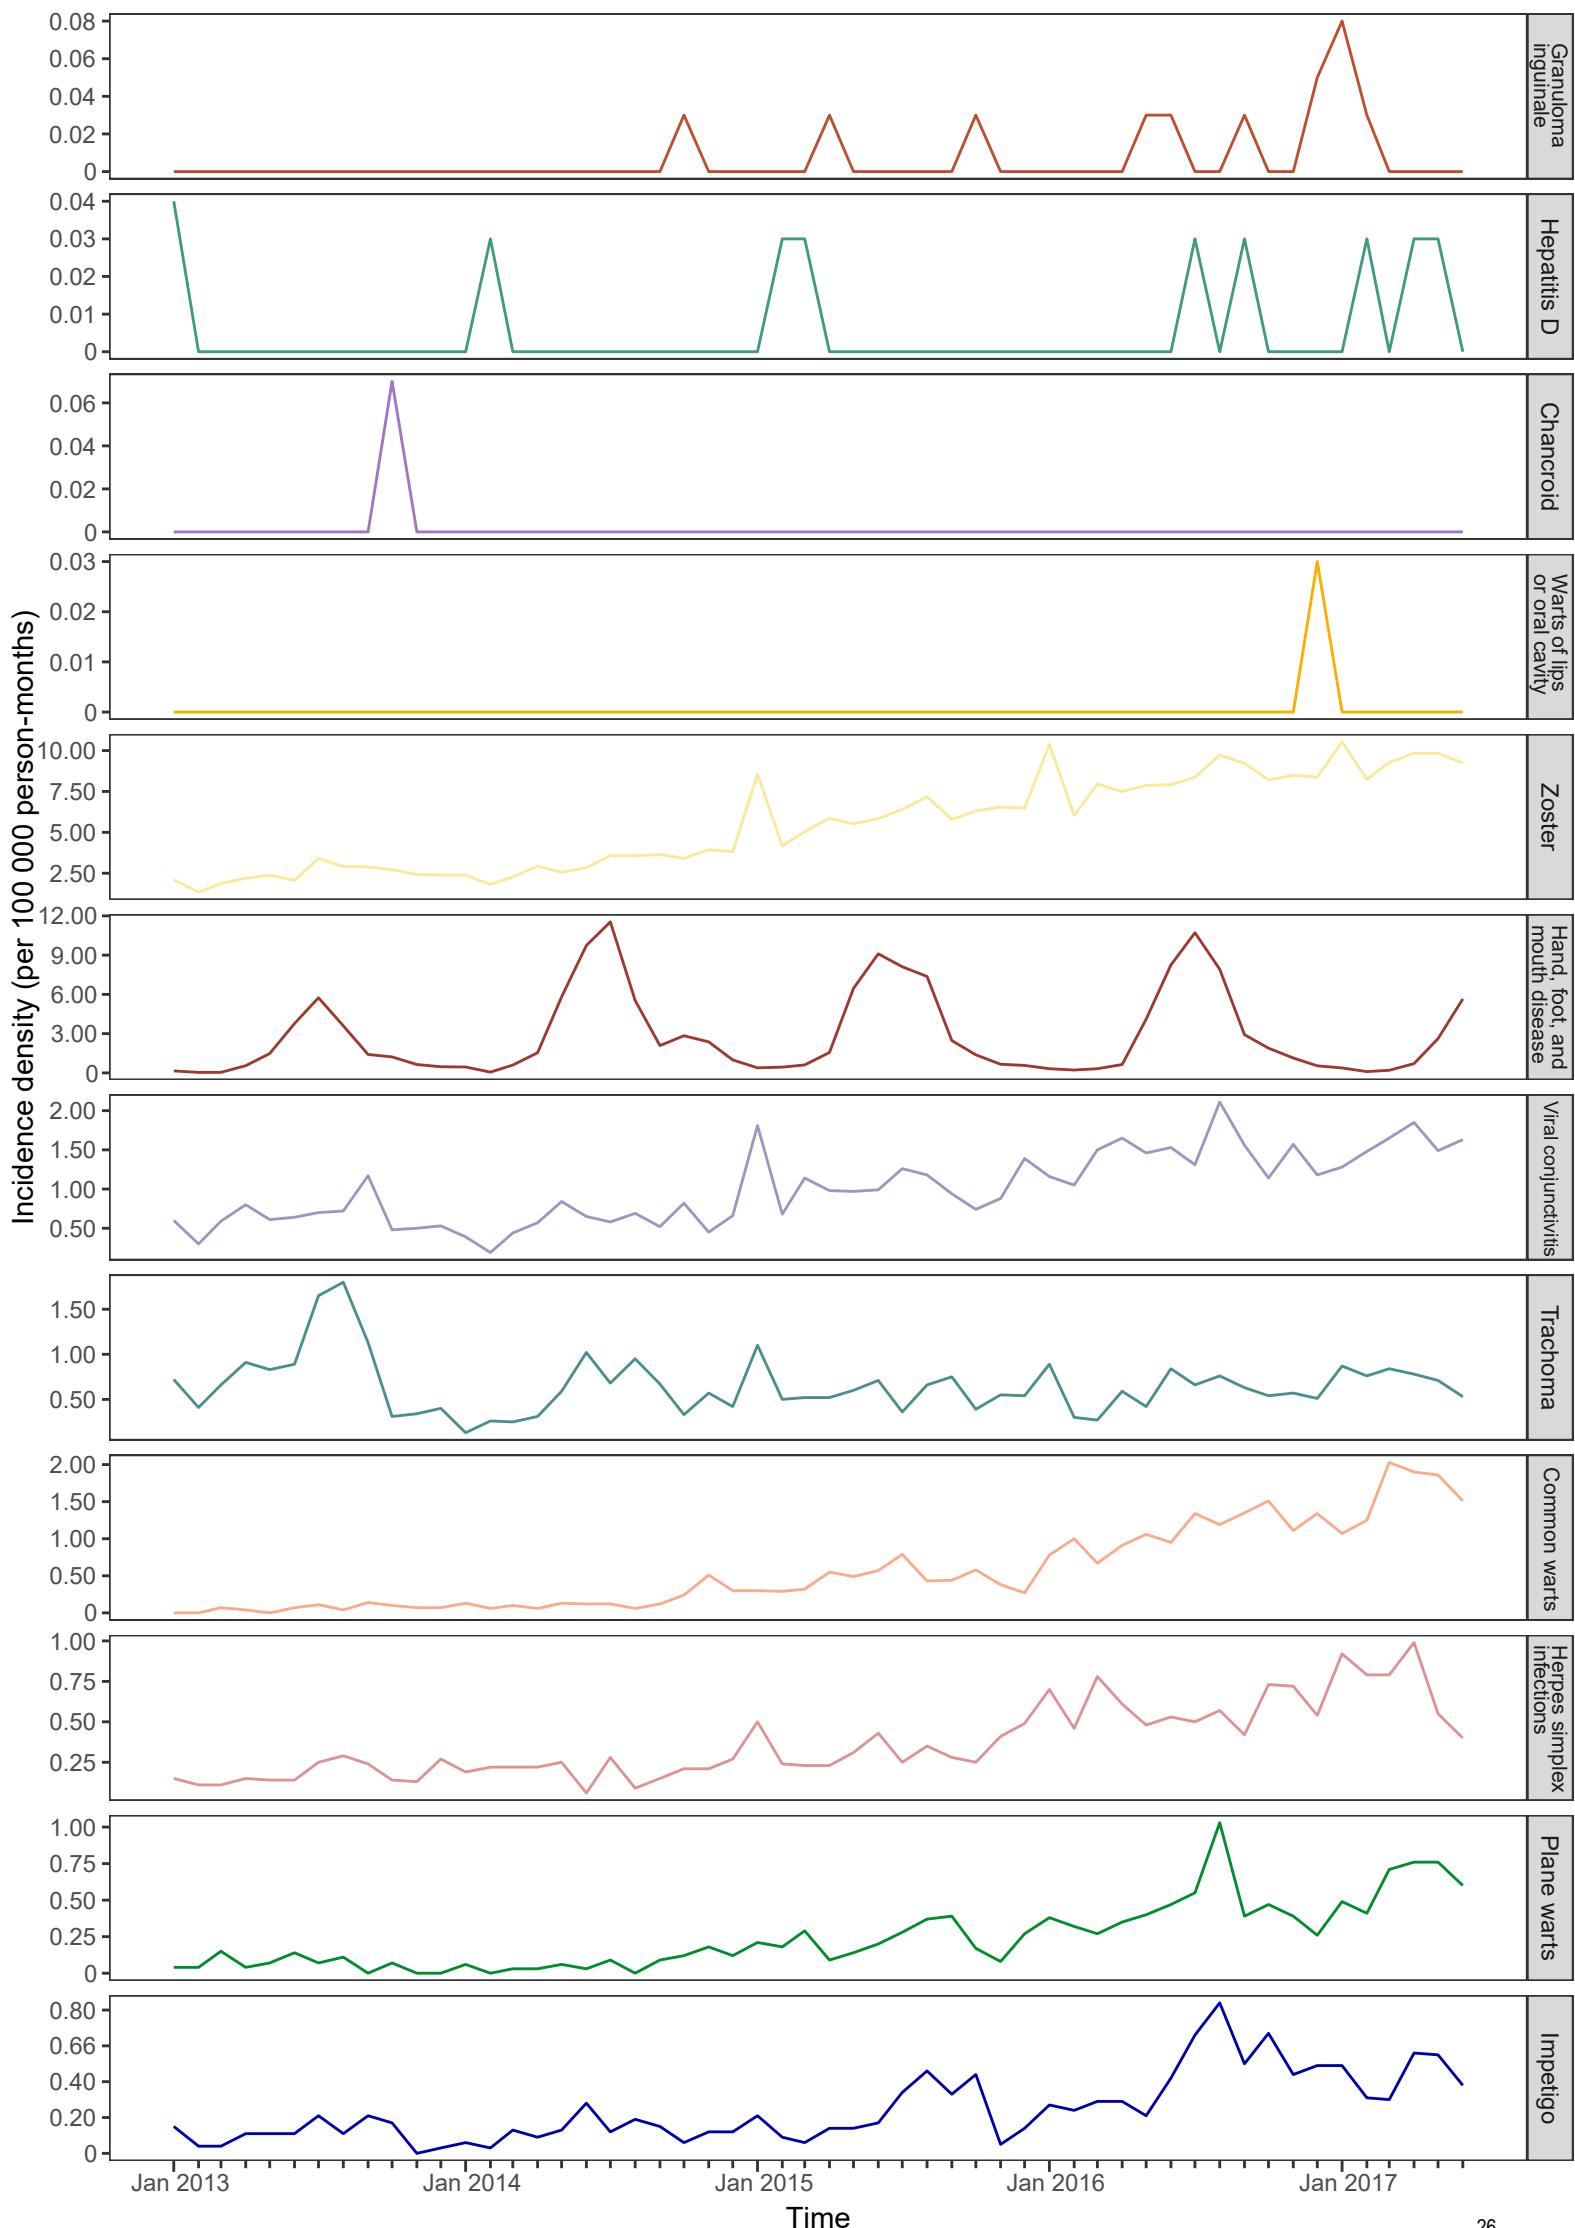

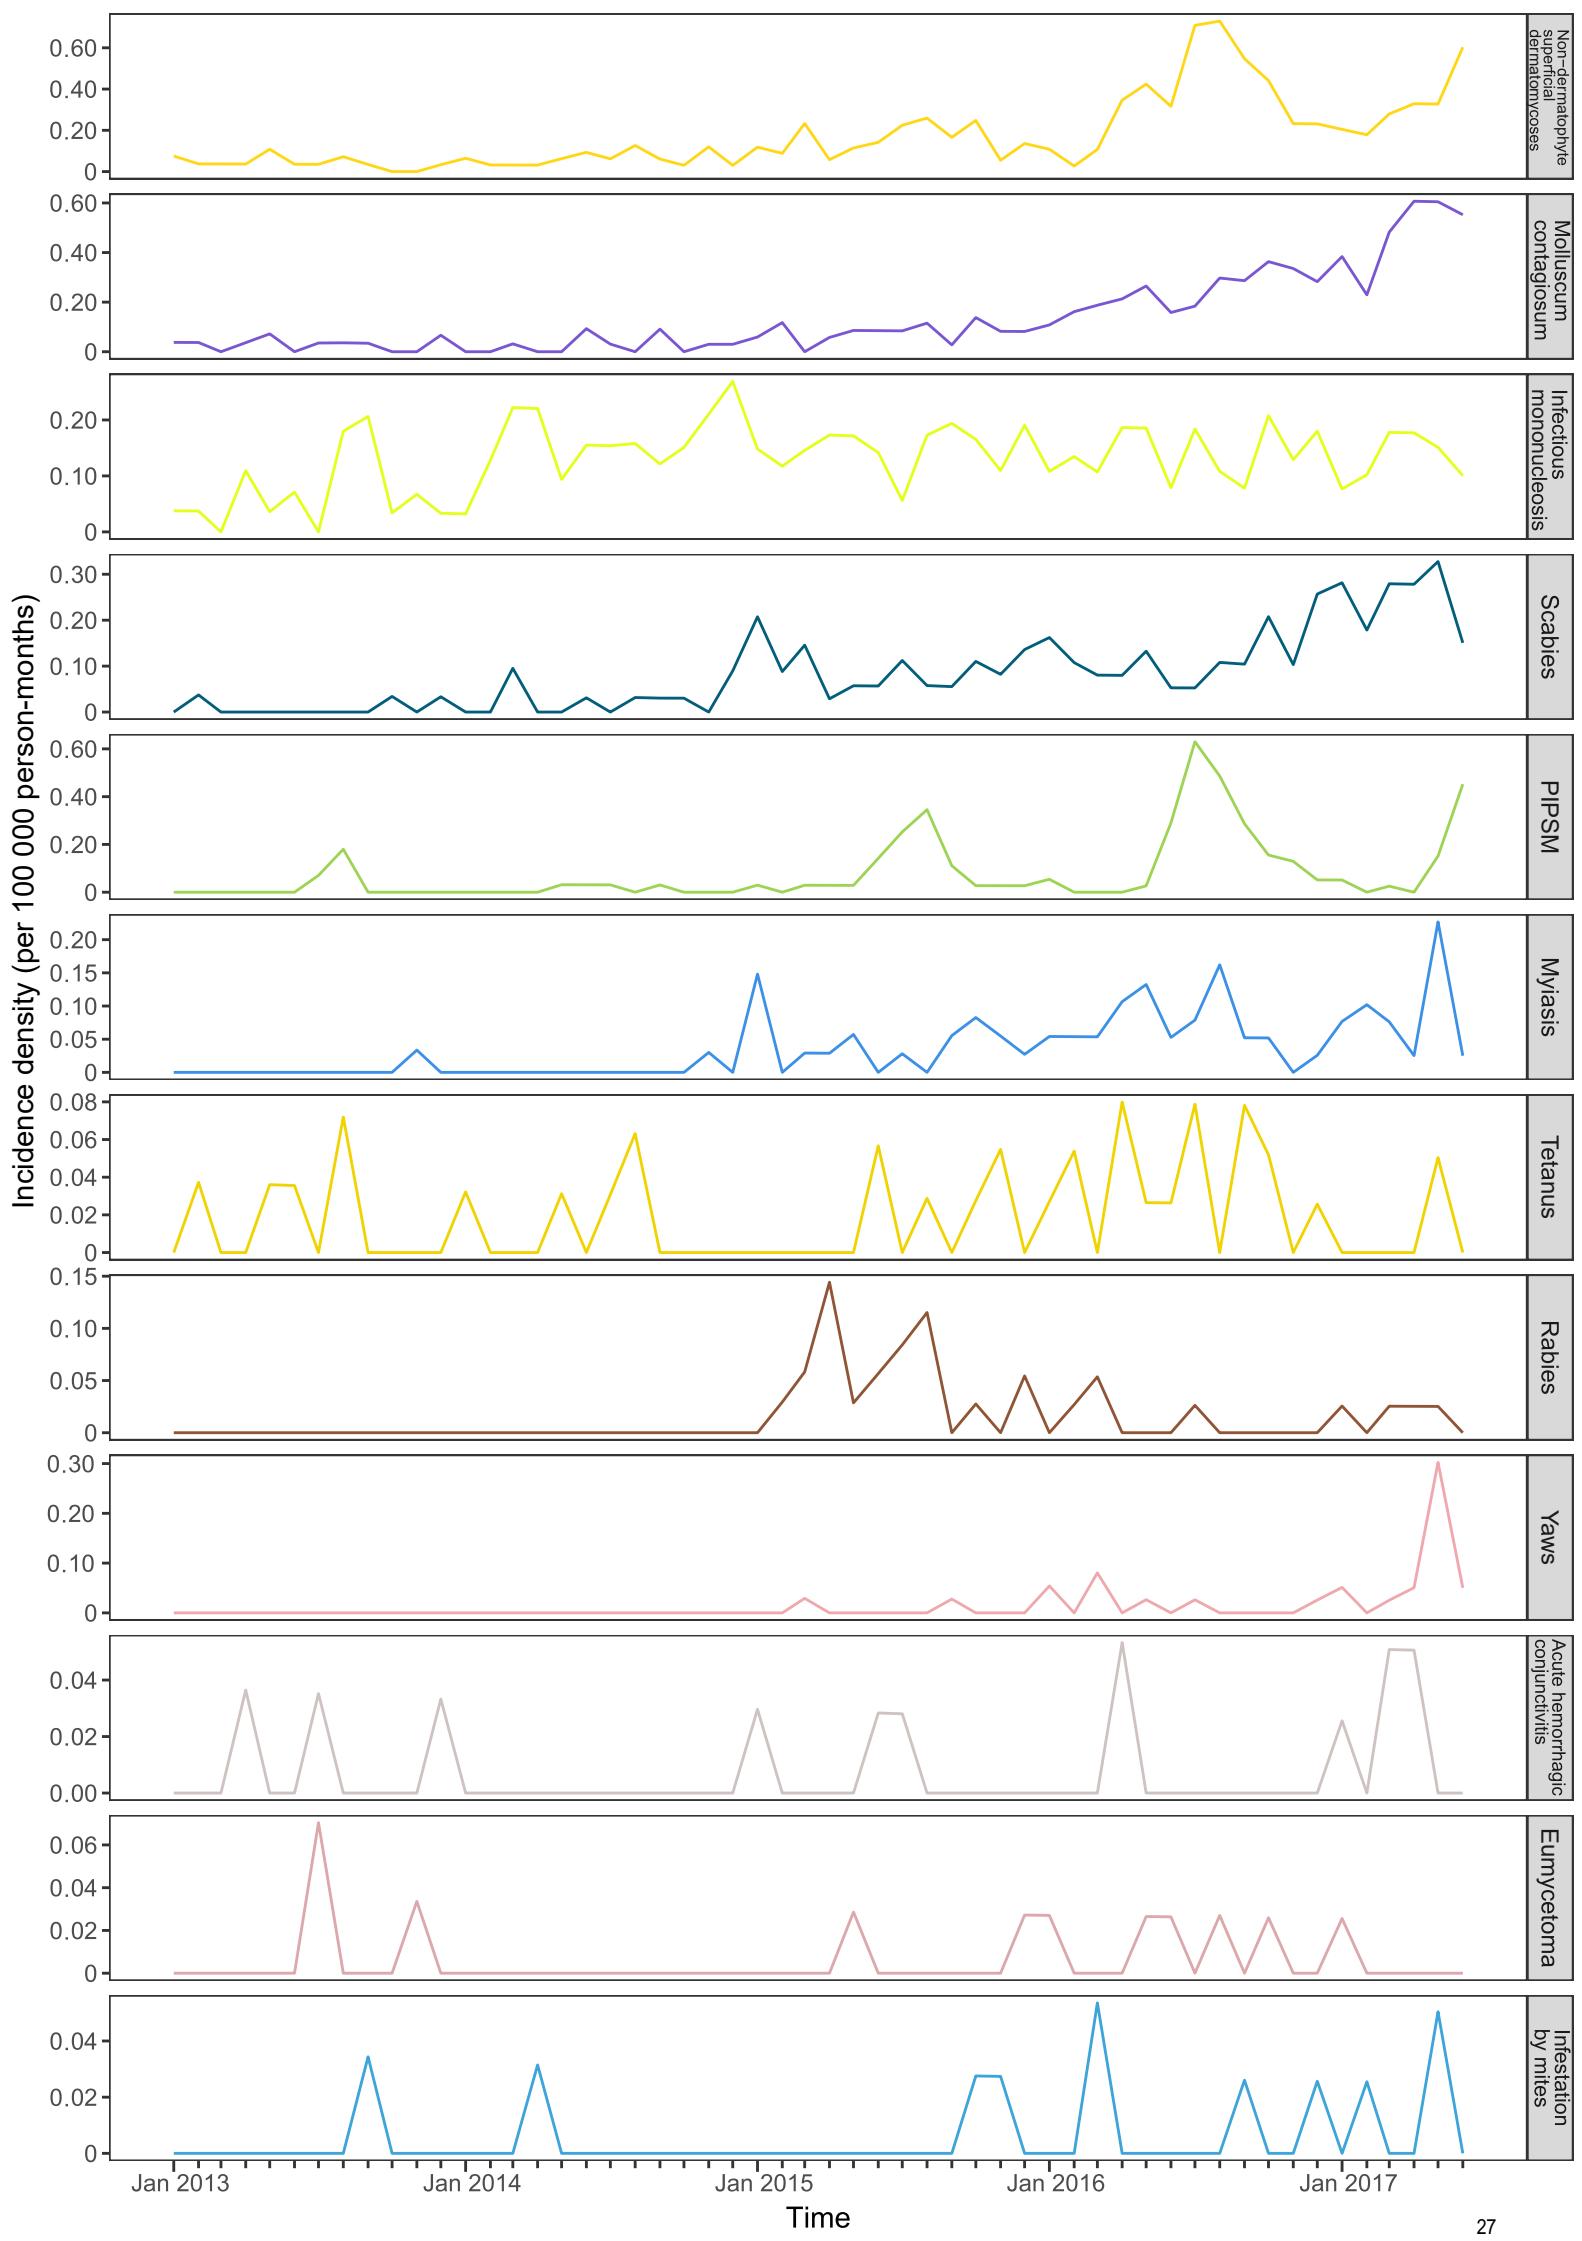

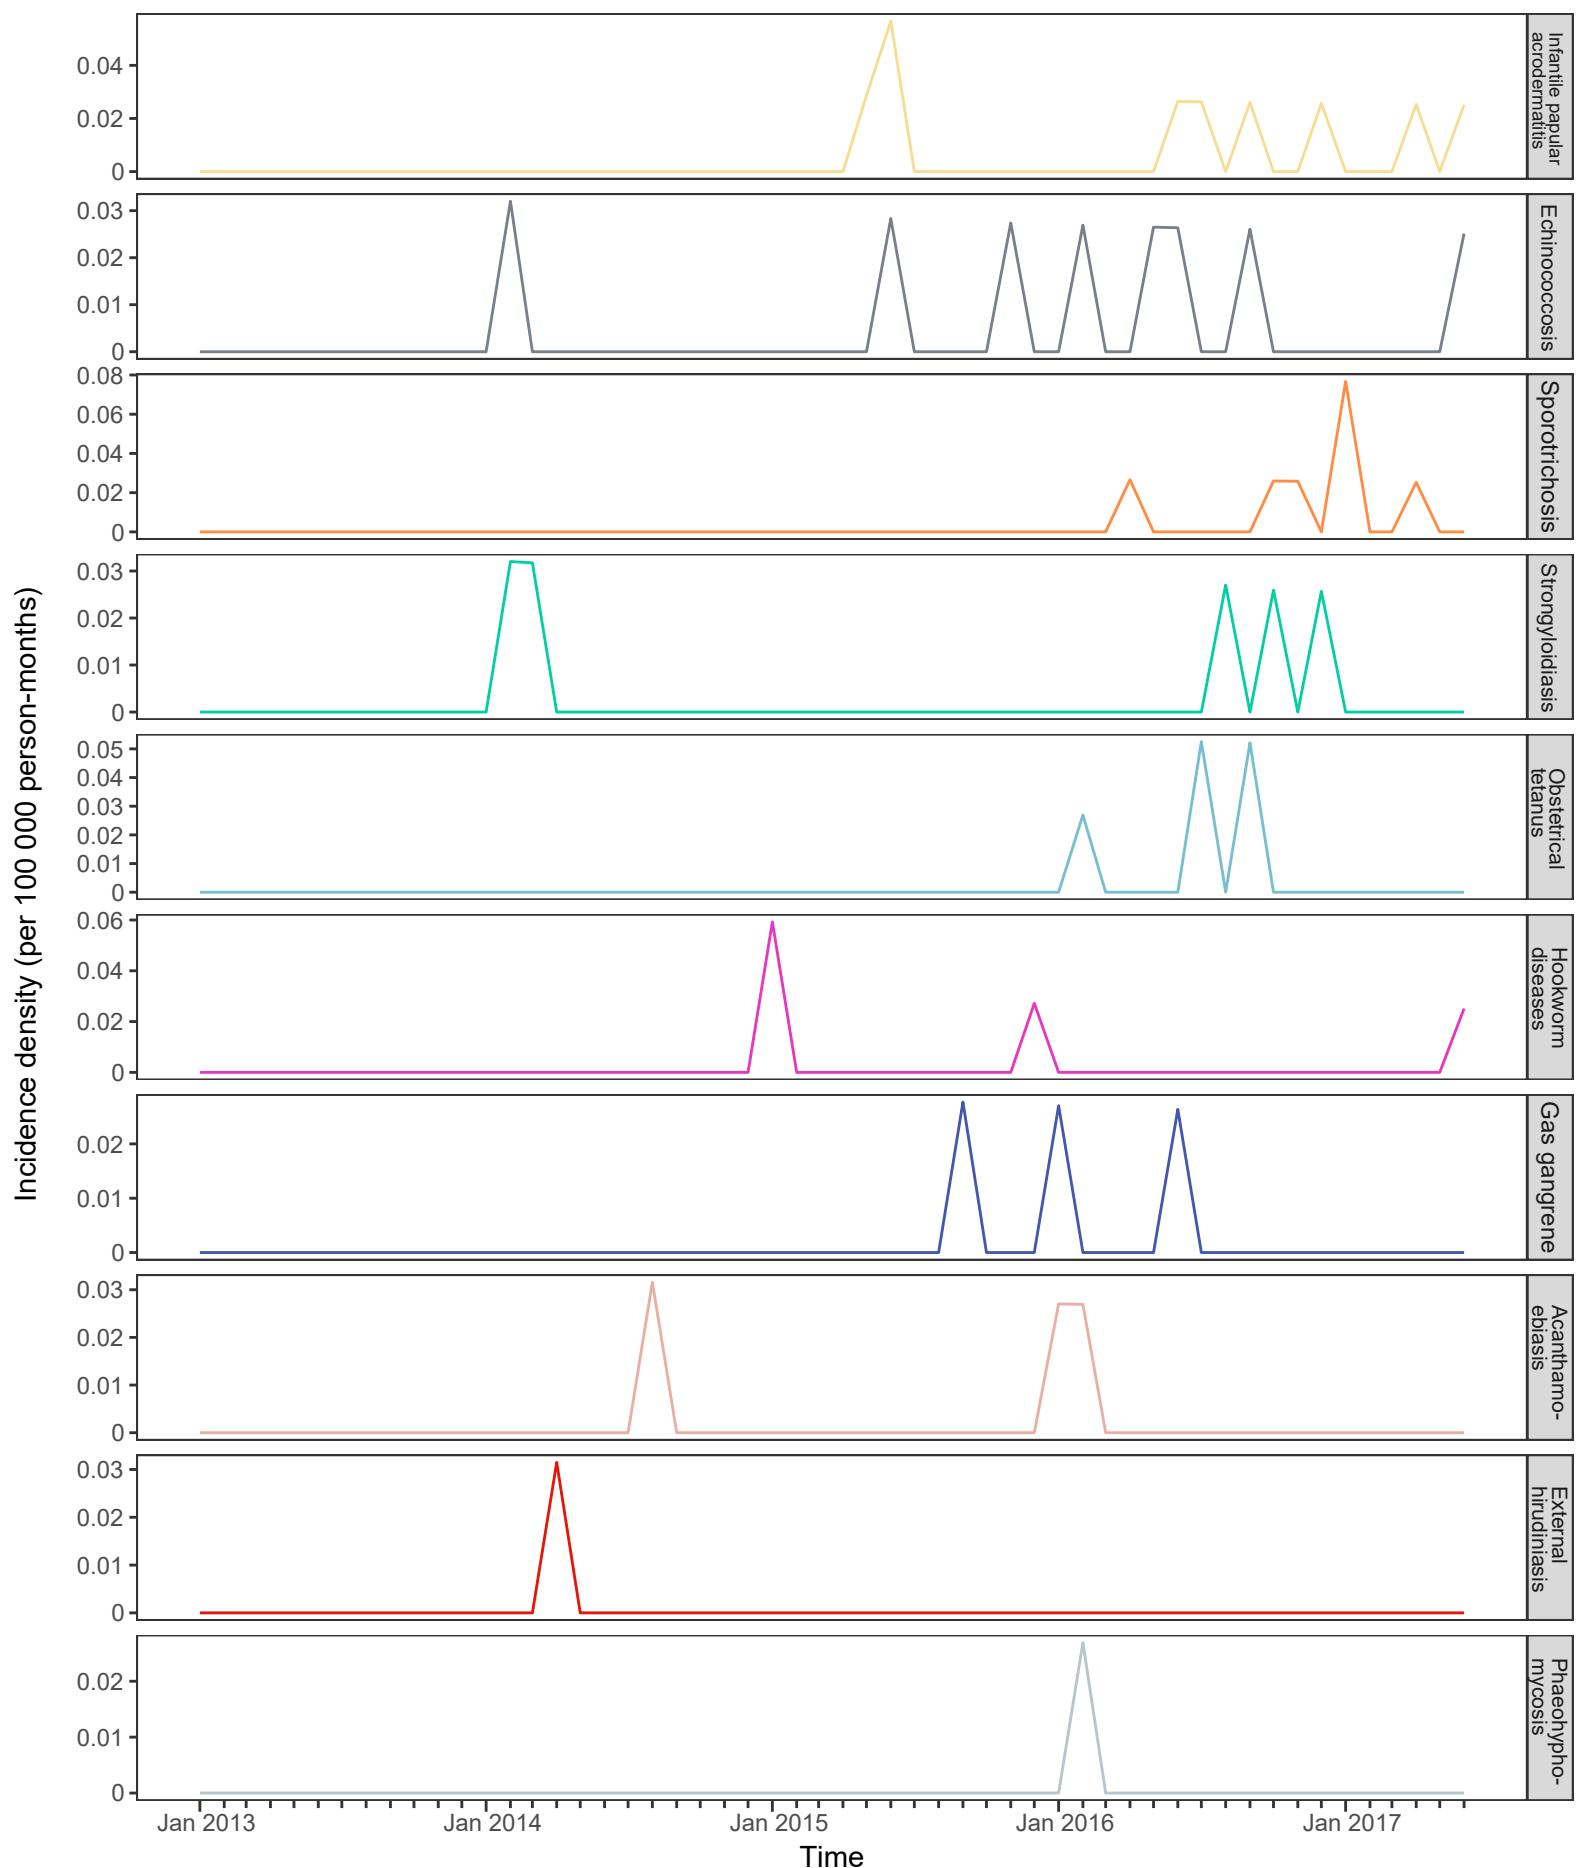

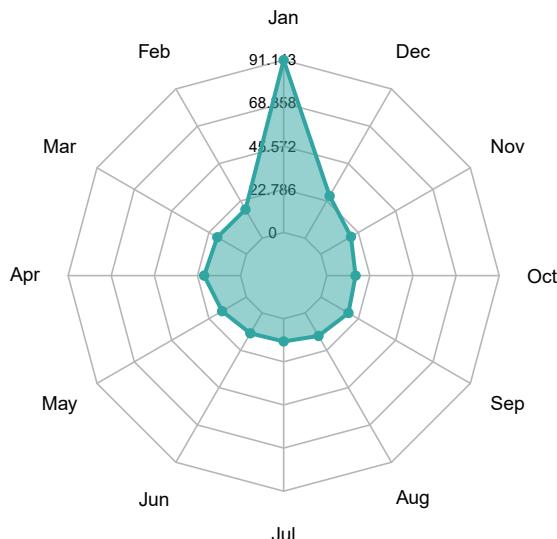

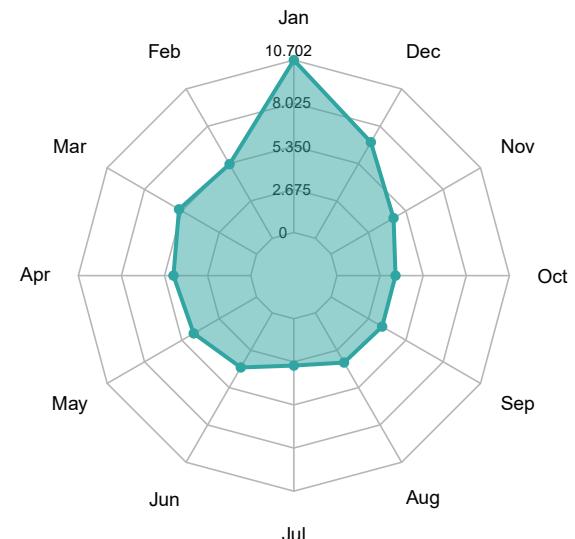

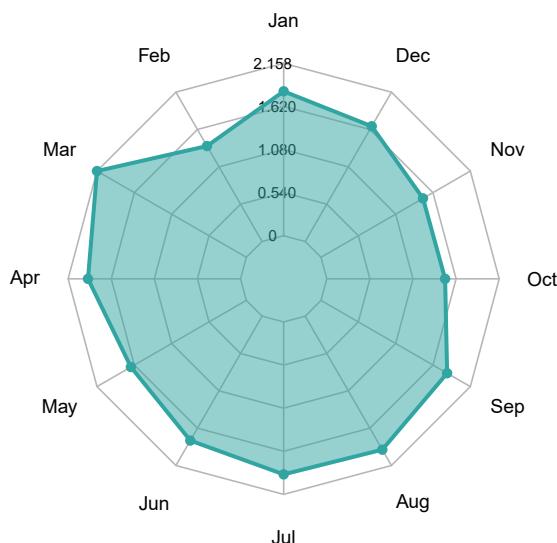

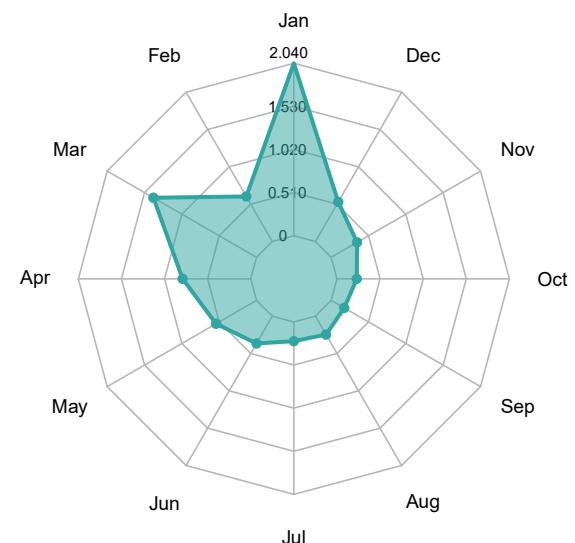

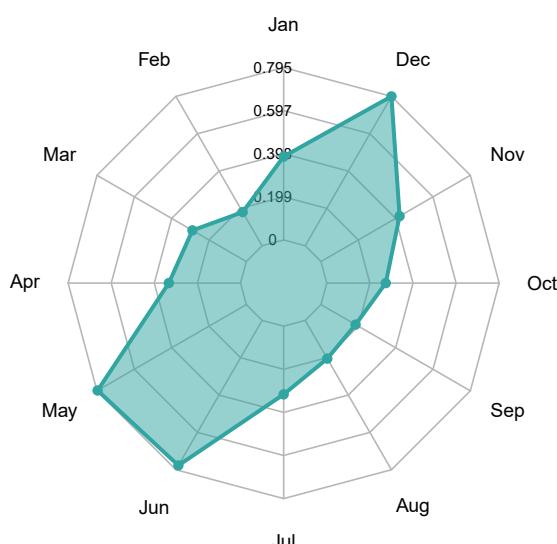

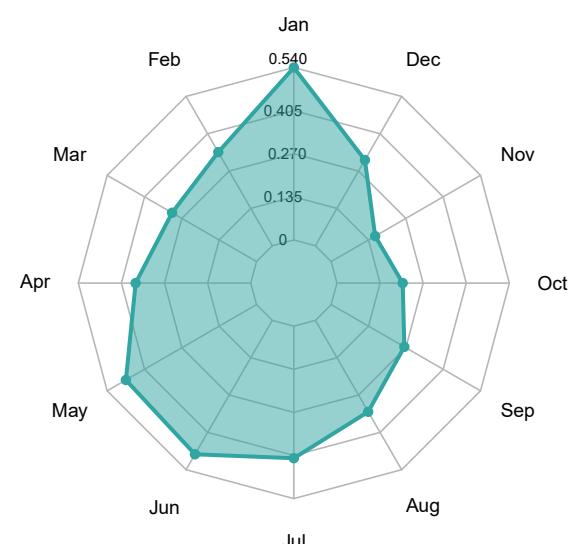

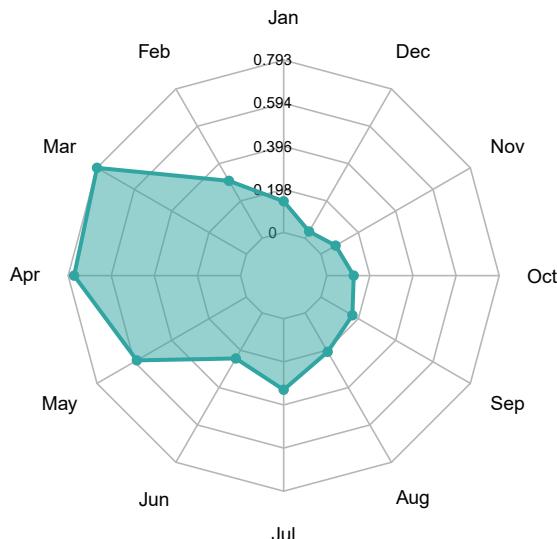

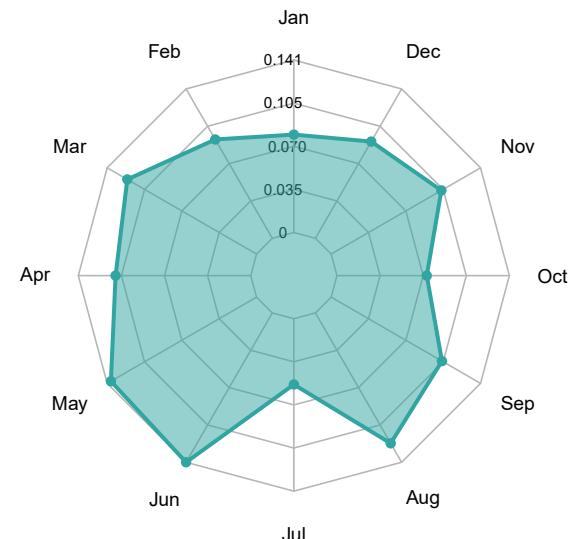

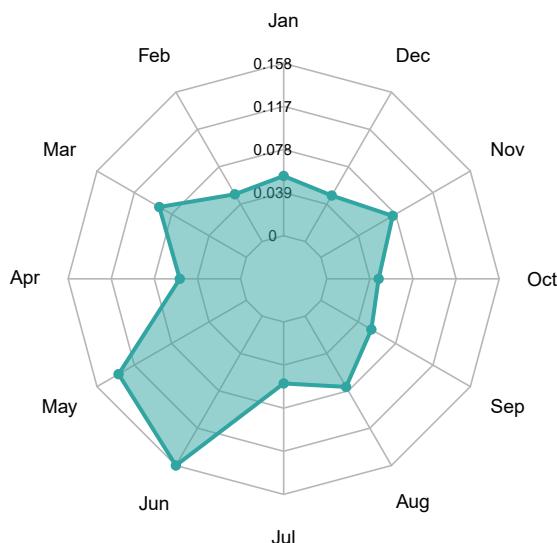

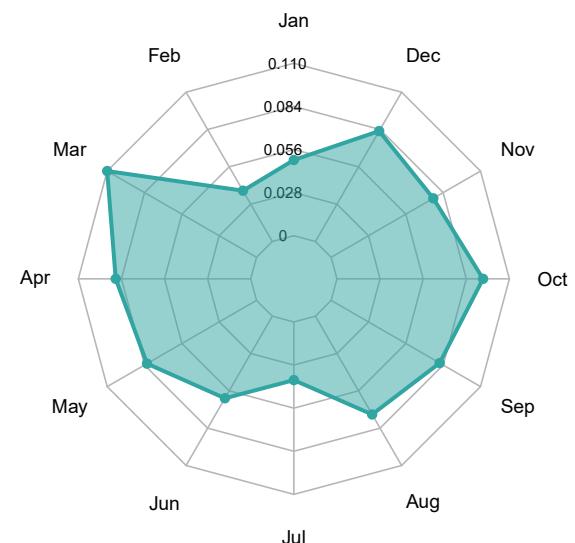

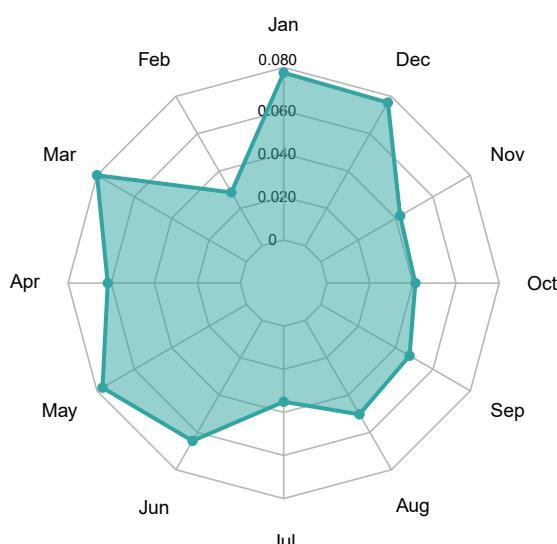

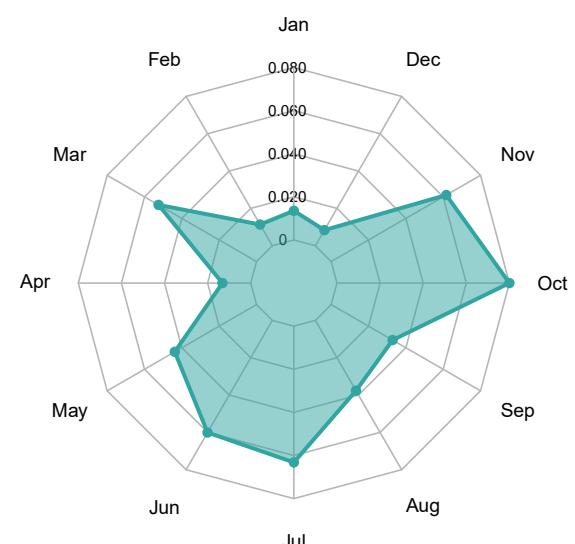

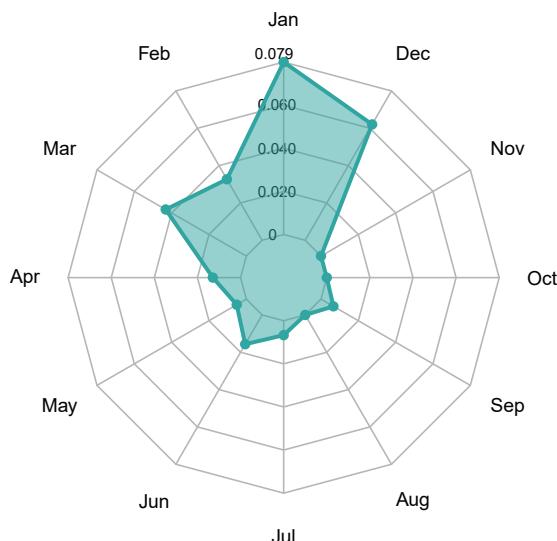

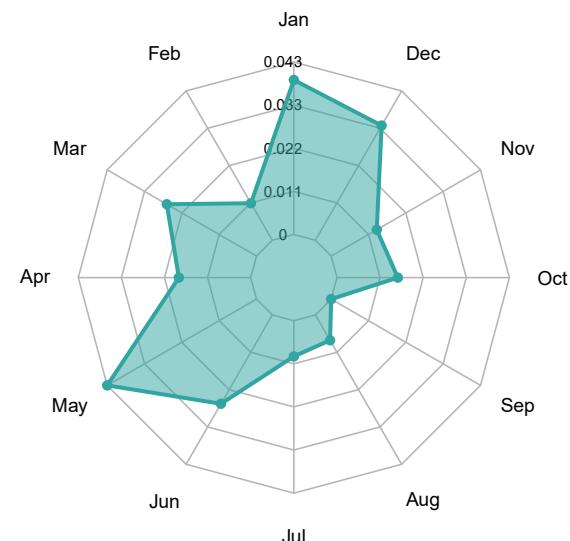

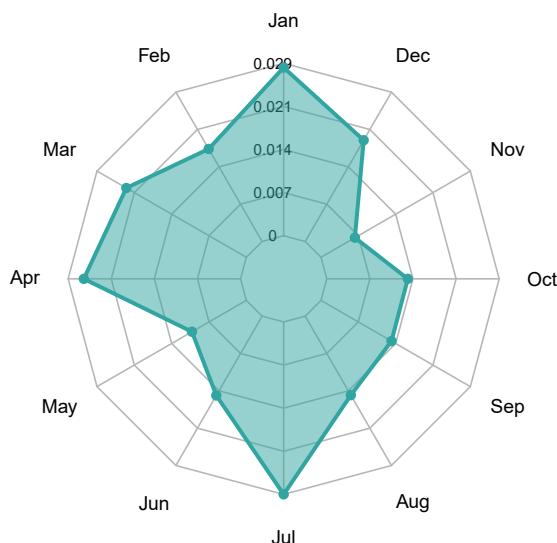

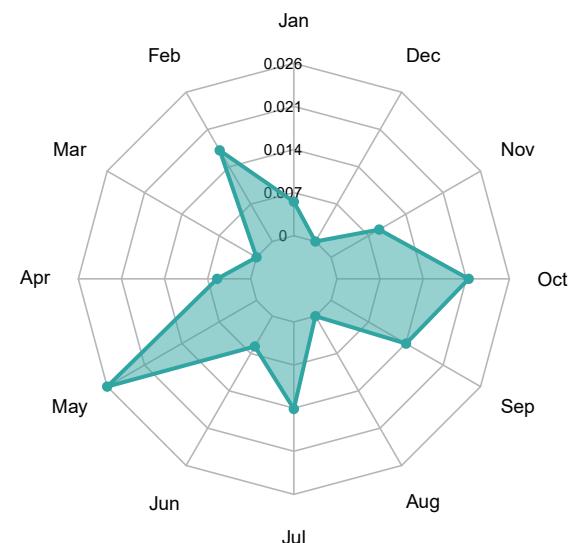

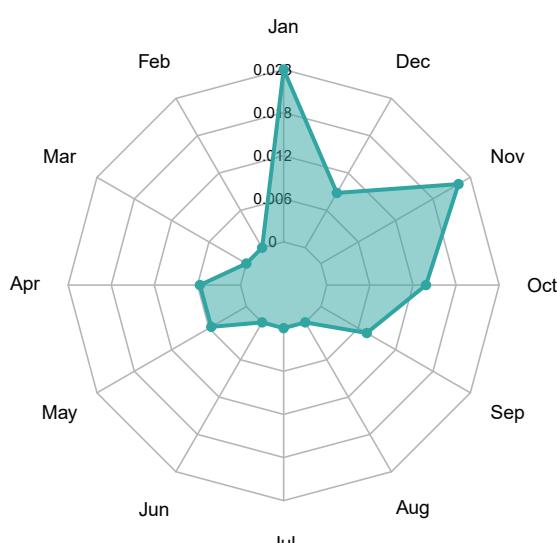

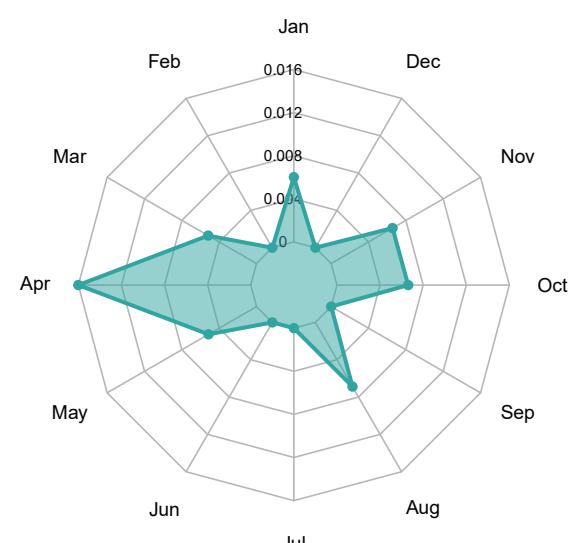

Figure S3: Monthly incidence density of 130 infectious diseases, from January 2013 to June 2017.

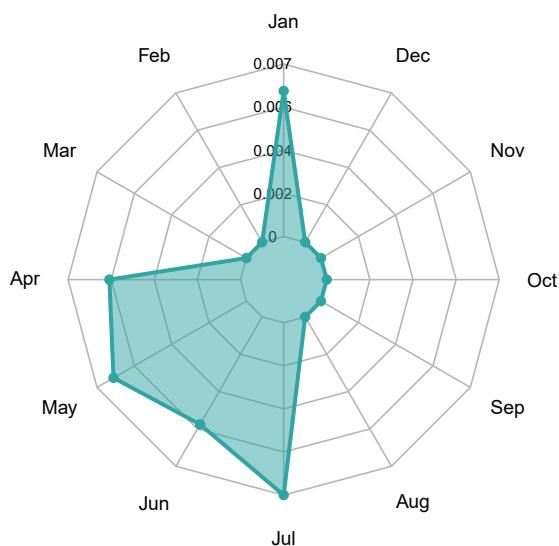

HIV=human immunodeficiency virus, PIPSM=picornavirus infections presenting in the skin or mucous membranes.

Influenza**Pneumonia****Pulmonary tuberculosis****Varicella****Scarlet fever****Mumps**

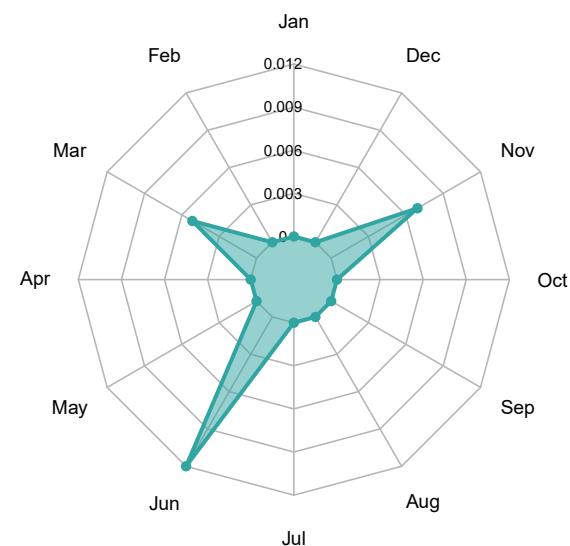

Measles**Cryptococcosis****Rubella****Whooping cough****Aspergillosis****Roseola infantum**

Influenza A H1N1**Blastomycosis****Meningococcal disease****Leprosy****Streptococcal pharyngitis****Legionellosis**

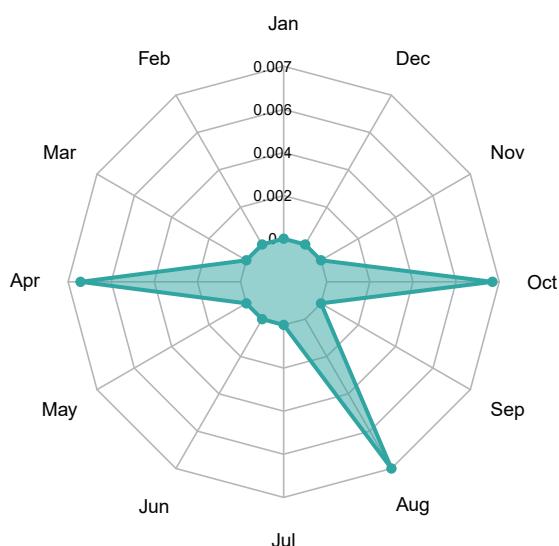

Epidemic cerebrospinal meningitis

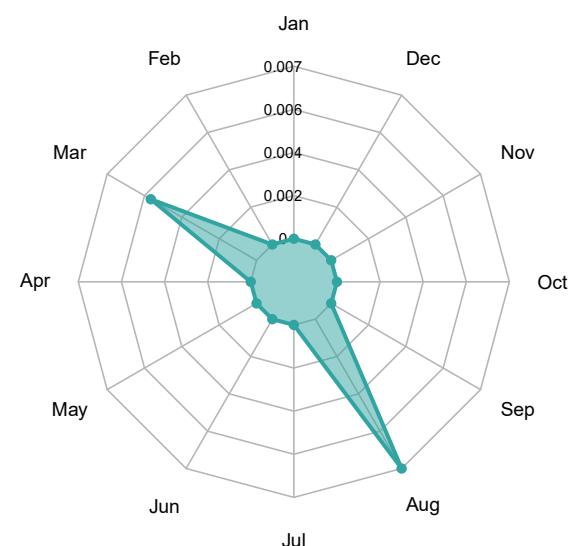

Nocardiosis

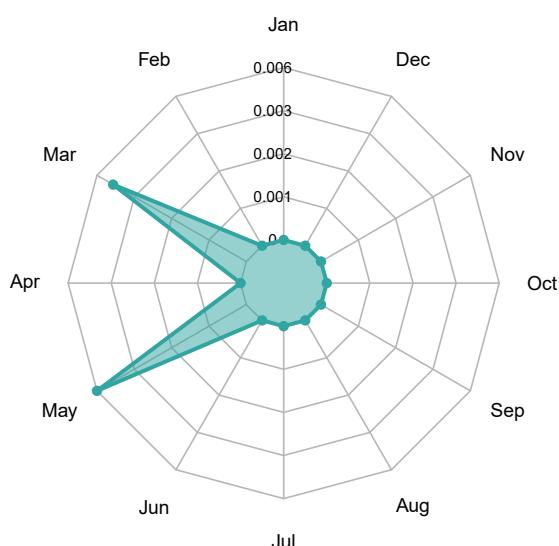

Histoplasmosis

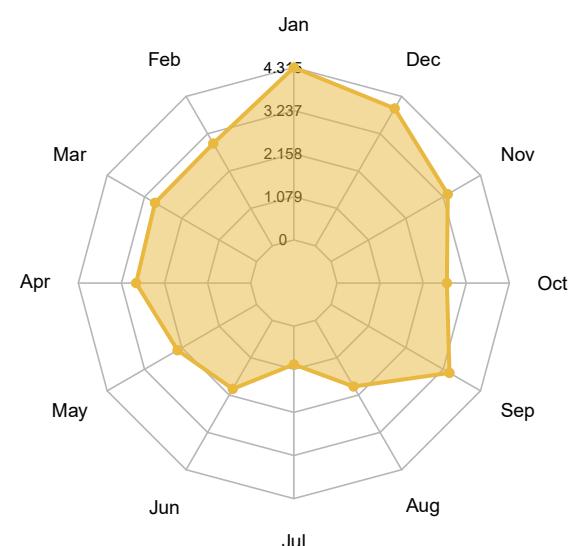

Erythema infectiosum

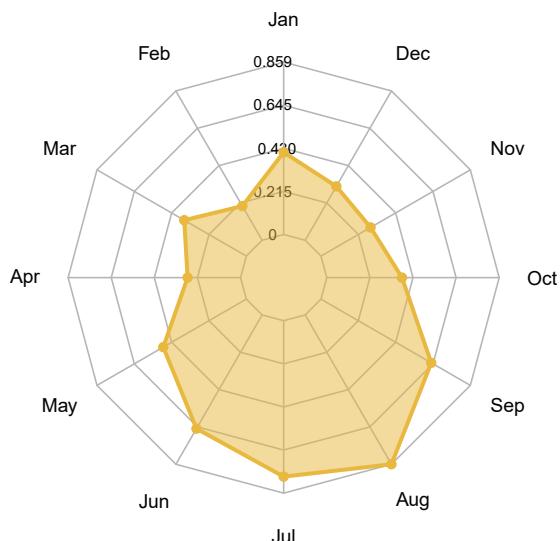

Coccidioidomycosis

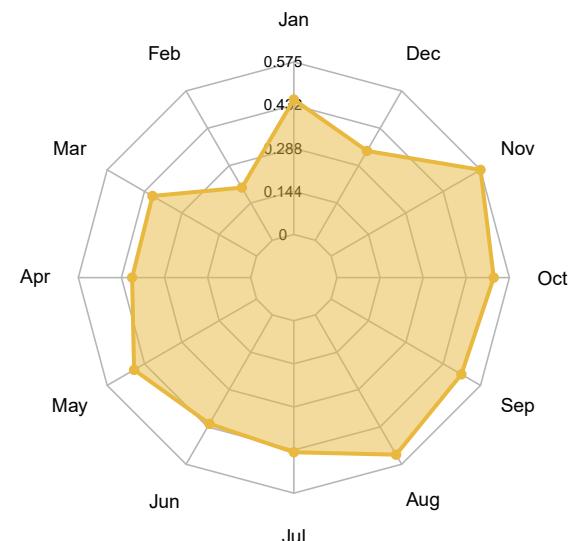

Typhoid
