

Supplemental Figure 1. Tail vein CT26-Luc tumor cell injection results in lung metastases in all injected mice

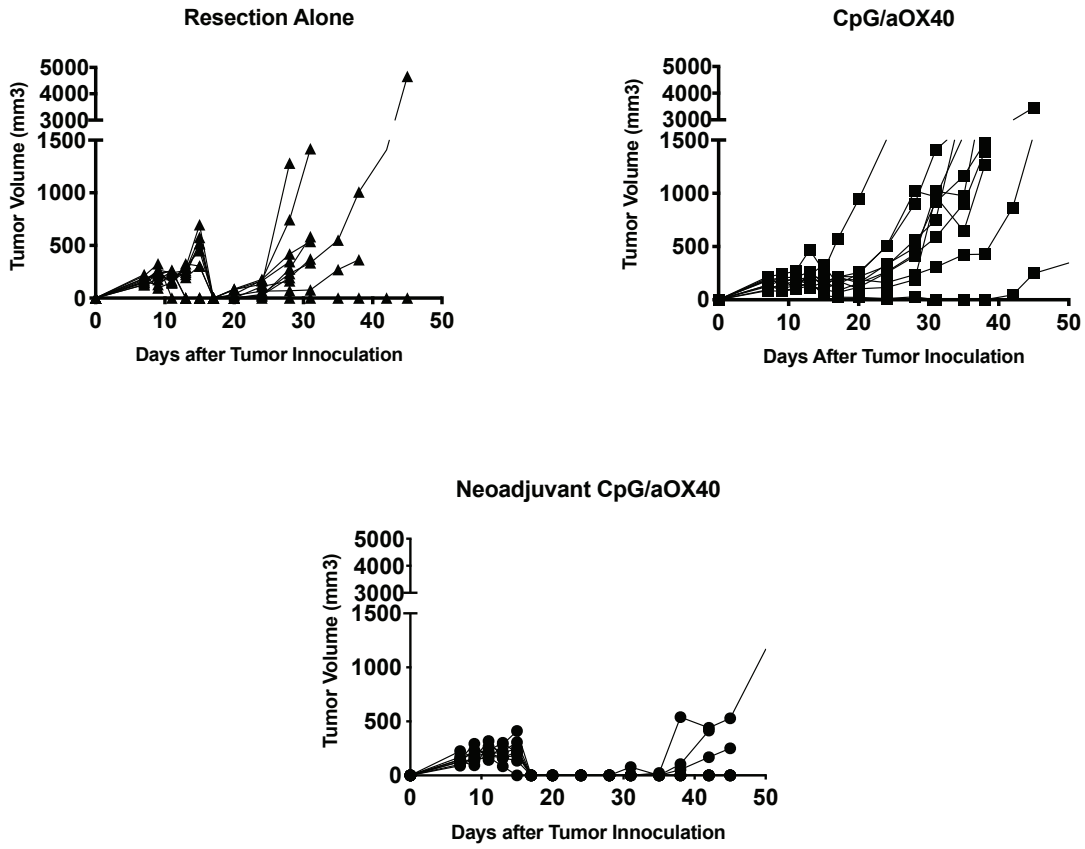

Weeks Following Injection 500,000 CT26-Luc Cells Injected

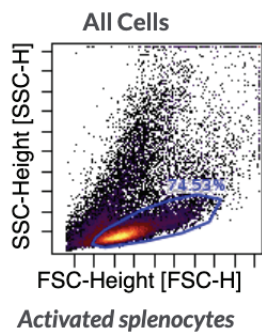

Supplemental Figure 2. CD4+ and CD8+ T cell populations depleted in experimental groups

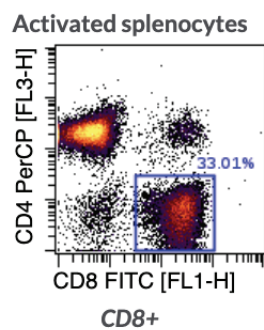

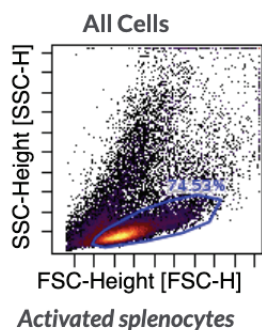

Supplemental Figure 3. Local disease burden in neoadjuvant, resection and untreated groups in 4T1-Luc tumor model

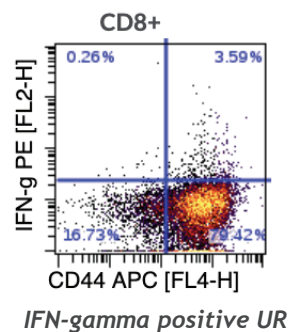

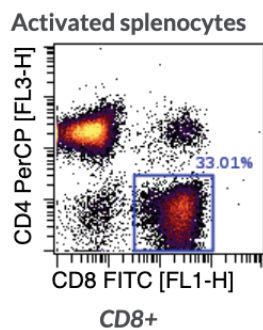

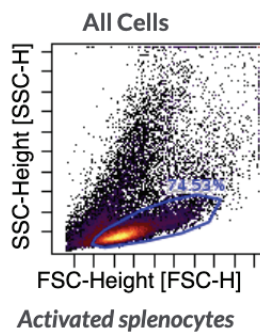

Activated splenocytes

CD8+

IFN-gamma positive UR

Supplemental Figure 5. Monotherapy tumor microenvironment comparison
