

Fig. S3. Overall survival according to sex in each age group: (A) I (young: age <65 years), (B) II (early-old: age 60–74 years), (C) III (old: age \geq 75 years). Women show a non-significant advantage in overall survival in each age group ($p=0.130$, $p=0.060$, and $p=0.081$ for groups I–III, respectively).
