Heinz MV, Price GD, Ruan F, et al. Association of selective serotonin reuptake inhibitor use with abnormal physical movement patterns as detected using a piezoelectric accelerometer and deep learning in a nationally representative sample of noninstitutionalized persons in the US. *JAMA Netw Open*. 2022;5(4):e225403. doi:10.1001/jamanetworkopen.2022.5403

eTable. Standardized Beta Coefficient Estimates for Both Movement and Depression Score in a General Logistic Regression Model

This supplementary material has been provided by the authors to give readers additional information about their work.

eTable. Standardized Beta Coefficient Estimates for Both Movement and Depression Score in a General Logistic Regression Model. Standard error and P value for each estimate are also shown. Both are statistically significant.

	<i>Beta</i>	<i>Standard Error</i>	<i>P-Value</i>
<i>Movement</i>	0.72	0.22	0.0010*
<i>Depression Score</i>	0.40	0.11	0.0002*
