GENERAL COMMENTS	<p>The study has adequate scientific rigor, it needs minor revisions. Here are some indications:</p> <p>Please explain better what interRAI Long-Term Care Facilities (LTCF) is, not all readers may know it.</p> <p>Please make the results and tables easier to read. If possible add simpler labels to show the variables.</p> <p>Please implement the conclusions by explaining how these findings can be useful for the government for public health interventions and prevention campaigns.</p> <p>Please check your English.</p>
