

FIGURE E1. Cumulative incidence of enrollment in TSP group from the time of surgery (R0 cases).

TABLE E1. Recurrence rates, second lung primary tumors, and extrathoracic primary tumors and survivorship enrollment (excluding patients with carcinoid tumors)

	Non-TSP	TSP
Recurrence	[2547]	[1054]
Yes	534	76
Recurrence location (n = 610)		
Distant	287	37
Locoregional	150	25
Distant + locoregional	97	14
Second lung primary malignancy	[2555]	[1046]
Yes	319	131
Clinical stage of second lung primary (n = 450)		
IA	259	106
IB	11	5
II	16	3
IIIA	16	6
IIIB/C/IV	17	10
Treatment of second lung primary		
Local (surgery or radiation)	274	114
Local and systemic	19	6
Systemic	10	6
Observation	16	5
Second extrathoracic malignancy	[2578]	[1023]
Yes	211	60
Site of second extrathoracic malignancy (n = 271)		
Prostate/kidney/urologic	47	16
Breast	28	9
Thyroid	29	5
Other	107	35

Each outcome was analyzed separately with regard to TSP enrollment at the time of outcome; thus, the number of patients in TSP is different depending on outcome. [] Indicates total patients in TSP or non-TSP analyzed for each outcome. *TSP*, Thoracic Survivorship Program.

TABLE E2. Multivariable extended Cox model for recurrence

Characteristic	HR	95% CI	P value
Survivorship	0.91	0.65-1.26	.6
Age at surgery	1.00	0.99-1.00	.4
Smoking status
