**Figure S1.** The global distribution of published articles from 2000 to 2020.

**Figure S2. Timeline of author clusters.** The timeline runs from left to right. The clusters are displayed from top to bottom in descending order of their size. The earliest cluster burst point was formed in 2002 and appeared in cluster #10. Around 2010, the main focus shifted to cluster #4, and after 2012, shifted to cluster #3.

**Figure S3.** Cluster visualization of the co-cited network of references via CiteSpace, together with the details and the most representative references of the generated clusters.
