

## Supplemental Figure

**A**

**B**

**Supplemental Figure.** The proportions of CD11b+ CD55– CD59– granulocytes (A) and glycophorin A+ CD55– CD59– erythrocytes (B) in each patient group. Minor PNH clones were defined as the presence of 0.02% to 1% of PNH-type granulocytes and 0.037% to 1% of PNH-type erythroblasts.
