

Supplementary Table S2. Proteins identified in catalytically active samples*

	BOS-1	BOS-2	BOS-3	BOS-4
Total number of proteins found	1960	1473	740	244
Proteins shared with some samples	1188	1182	479	22
Proteins shared between all samples	219			
Unique proteins	550	72	42	3

*Proteins were identified using the SequestHT (64) and Mascot (65) search engines, searching against the translated transcriptome as the protein database.
