

Title: Supplementary Data 1.

Description: Drosophila RNAi screening identifies evolutionary conserved myokines that regulate myofiber size.

Title: Supplementary Data 2.

Description: Genes regulated in diaphragm muscles from mice with LLC cancers but not in diaphragm muscles from mice with LLC cancers upon treatment with rFibcd1.

Title: Supplementary Data 3.

Description: qRT-PCR oligos.

Title: Supplementary Data 4.

Description: Genes that are commonly upregulated and downregulated in the diaphragm, tibialis anterior, and soleus muscles of mice with cachectic versus non-cachectic melanomas.

Title: Supplementary Data 5.

Description: Genes differentially regulated in diaphragm muscles of mice with cachectic versus non-cachectic melanomas, and treated with either rFibcd1 or mock.
