

Supplemental File

A

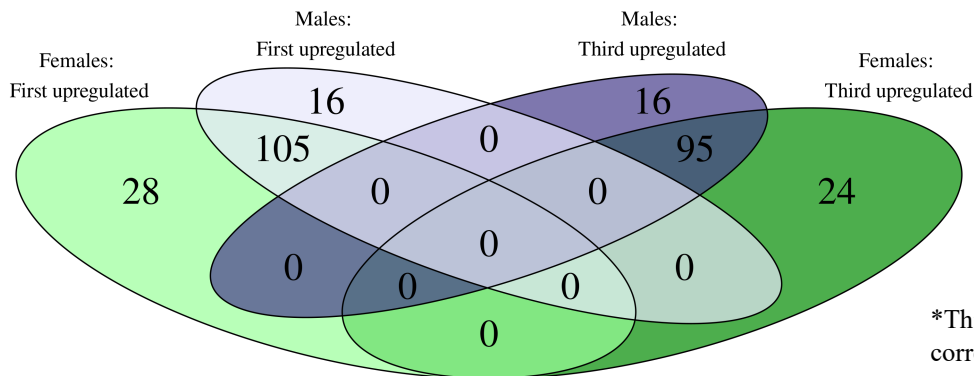

DE miRNAs for sex-specific first vs third trimester placenta
(FDR<0.05, baseMean>10 either trimester)

*This venn diagram corresponds to Figure 3

B

DE miRNAs for sex-specific first vs third trimester placenta
(FDR<0.05, baseMean>10 either trimester, fold change>2)

*This venn diagram corresponds to Figure 4A

Terms and abbreviations:

baseMean = counts normalized by sequencing depth by the DESeq2 R package

DE = differentially expressed

FDR = p-values adjusted by Benjamini-Hochberg's false discovery rate procedure
