

Supplementary Table 2

Unaffected side legs		
Dermal back flow type	LN (+)	LN (-)
Type I	72	1
Type II	2	0
Type III	0	0
Type IV	5	0
Type V	1	0
<i>Total</i>	<i>80</i>	<i>1</i>

**Supplementary Table 2.** Relevance between the lymph nodes in the inguinal region and the type of dermal back flow in the unaffected lower limb

LN (+): lymph nodes were visualized in the single photon emission computed tomography-computed tomography lymphoscintigraphy (SPECT-CT LSG) images, LN (-): lymph nodes were absent in the in the SPECT-CT LSG images
