

Supplementary Table 6

| | | Lower leg | | |
|-------|----------------------|----------------------|---------|---------------|
| | | Superficial dominant | Complex | Deep dominant |
| | Superficial dominant | 0 | 0 | 0 |
| Thigh | Complex | 2 | 1 | 0 |
| | Deep dominant | 0 | 1 | 3 |

Supplementary Table 6. Distribution of the unaffected limbs of the patients whose affected limbs were classified into type I of dermal back flow type, and the lymph flow was regarded as deep pathway dominant both in the thigh and in the lower leg

These data are shown in Supplementary Figure S5 as a graph.
