Fig. S1 ¹H-NMR spectra of PS-*b*-PEO and PS-*b*-PEO-MA in CDCl₃. The characteristic peaks of terminal methacryloyl group are assigned in the figure and magnified in insert figure.

Fig. S2 Confocal microscopy image of cross-linkable PS-*b*-PEO micelles prepared by evaporation-induced self-assembly method.

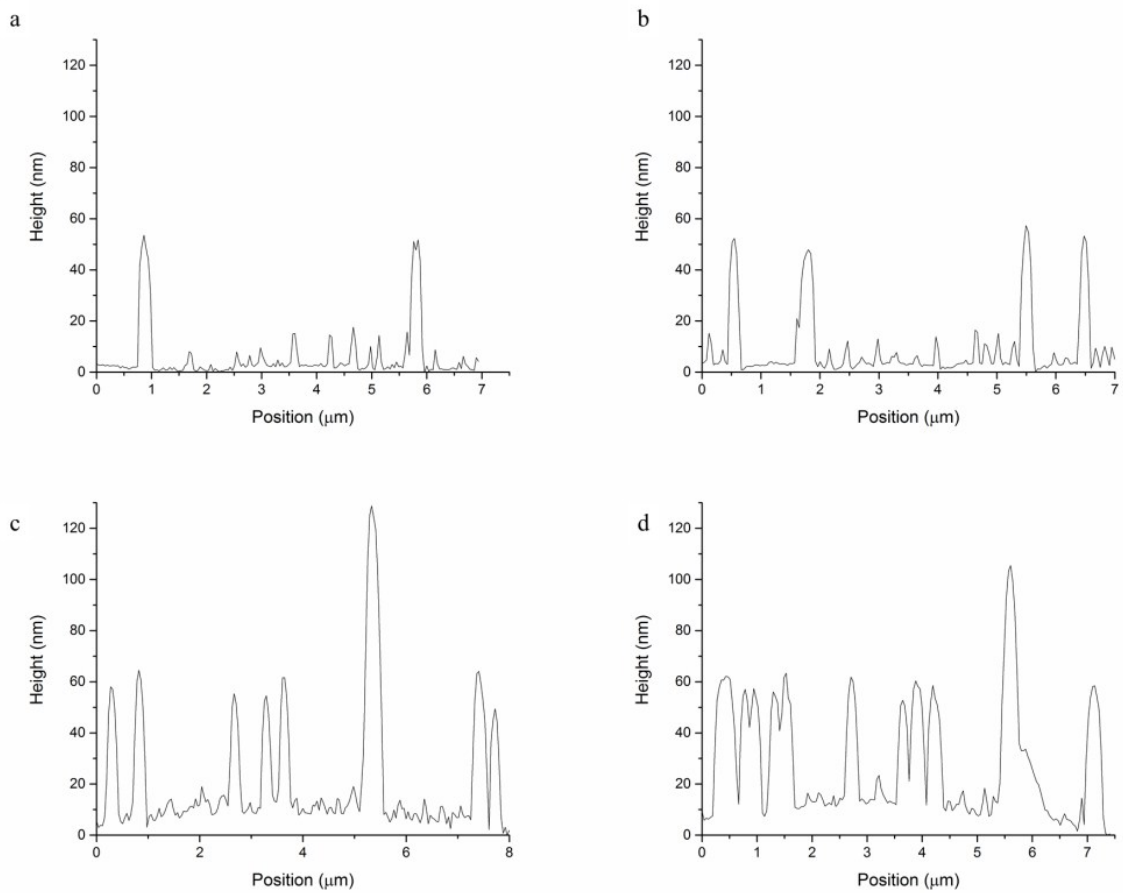

Fig. S3 Line scan profiles of the micelles printed and cross-linked on the glass surface: (a) 1, (b) 5, (c) 10, (d) 20 printing times.
