

Supplementary Material

Supplementary Table 1. Presence of organ dysfunction and severity of dysfunction* for survivors and non-survivors by 28 days.

Organ Dysfunction Incidence by Day 28 (n, %)	<u>All Patients</u> (n=7897)	<u>Survivors</u> (n=7431)	<u>Non-survivors</u> (n=466)
Endocrinologic	5143 (65.1%)	4730 (62.4%)	413 (88.6%)
Cardiovascular	4384 (55.5%)	3957 (53.2%)	427 (91.6%)
Severe Cardiovascular	881 (11.2%)	617 (8.3%)	264 (56.7%)
Immunologic	4184 (53.0%)	3901 (52.5%)	283 (60.7%)
Neurologic	4156 (52.6%)	3742 (50.4%)	414 (88.8%)
Respiratory	3555 (45.0%)	3158 (42.5%)	397 (85.2%)
Severe Respiratory	1009 (12.8%)	750 (10.1%)	259 (55.6%)
Hematologic	3204 (40.6%)	2879 (38.7%)	325 (69.7%)
Severe Hematologic	351 (4.4%)	304 (4.1%)	47 (10.1%)
Renal	2898 (36.7%)	2620 (35.3%)	278 (59.7%)
Coagulation	994 (12.6%)	835 (11.2%)	159 (34.1%)
Liver	623 (7.9%)	437 (5.9%)	186 (39.9%)

*Severity grading based on PODIUM criteria is only available for cardiovascular, respiratory, and hematologic dysfunction

Supplementary Table 2. Association between two organ dysfunction interactions and mortality or persistent MOD.

Heme: hematologic

Neuro: neurologic

Resp: respiratory

Supplementary Figure 1. Interaction plots for two organ dysfunctions and association with mortality. Black line represents single organ dysfunction, colored lines (per legend) represent interaction with second organ dysfunction. *Coag*: coagulation; *CV*: cardiovascular; *Endo*: endocrinologic; *Immuno*: immunologic; *Heme*: hematologic; *Neuro*: neurologic; *Resp*: respiratory

Supplementary Figure 2. Classification Tree for Persistent MODS using 10-fold cross validation. The top node of the decision tree, the root node, shows the total number of subjects in the cohort and the number and proportion of non-survivors. Each subsequent node shows the criterion for subsequent decisions, along with the number and proportion of patients with or without the organ dysfunction and the proportion who died. Terminal nodes show the risk for an individual with the preceding organ dysfunctions. AUROC = 0.74 (95% CI 0.70-0.78). *Coag*: coagulation; *CV*: cardiovascular; *Endo*: endocrinologic; *Immuno*: immunologic; *Heme*: hematologic; *Neuro*: neurologic; *Resp*: respiratory
