

## Supplemental Material

Table A1

Section and Topic	Item #	Checklist item	Location where item is reported (page)
<b>TITLE</b>			
Title	1	Identify the report as a systematic review.	1
<b>ABSTRACT</b>			
Abstract	2	See the PRISMA 2020 for Abstracts checklist.	4
<b>INTRODUCTION</b>			
Rationale	3	Describe the rationale for the review in the context of existing knowledge.	4
Objectives	4	Provide an explicit statement of the objective(s) or question(s) the review addresses.	4
<b>METHODS</b>			
Eligibility criteria	5	Specify the inclusion and exclusion criteria for the review and how studies were grouped for the syntheses.	4
Information sources	6	Specify all databases, registers, websites, organisations, reference lists and other sources searched or consulted to identify studies. Specify the date when each source was last searched or consulted.	4
Search strategy	7	Present the full search strategies for all databases, registers and websites, including any filters and limits used.	4
Selection process	8	Specify the methods used to decide whether a study met the inclusion criteria of the review, including how many reviewers screened each record and each report retrieved, whether they worked independently, and if applicable, details of automation tools used in the process.	4- 5 (fig 1)
Data collection process	9	Specify the methods used to collect data from reports, including how many reviewers collected data from each report, whether they worked independently, any processes for obtaining or confirming data from	5- 6

		study investigators, and if applicable, details of automation tools used in the process.	
Data items	10a	List and define all outcomes for which data were sought. Specify whether all results that were compatible with each outcome domain in each study were sought (e.g. for all measures, time points, analyses), and if not, the methods used to decide which results to collect.	4- 5
	10b	List and define all other variables for which data were sought (e.g. participant and intervention characteristics, funding sources). Describe any assumptions made about any missing or unclear information.	NO
Study risk of bias assessment	11	Specify the methods used to assess risk of bias in the included studies, including details of the tool(s) used, how many reviewers assessed each study and whether they worked independently, and if applicable, details of automation tools used in the process.	5
Effect measures	12	Specify for each outcome the effect measure(s) (e.g. risk ratio, mean difference) used in the synthesis or presentation of results.	5
Synthesis methods	13a	Describe the processes used to decide which studies were eligible for each synthesis (e.g. tabulating the study intervention characteristics and comparing against the planned groups for each synthesis (item #5)).	4
	13b	Describe any methods required to prepare the data for presentation or synthesis, such as handling of missing summary statistics, or data conversions.	NO
	13c	Describe any methods used to tabulate or visually display results of individual studies and syntheses.	4
	13d	Describe any methods used to synthesize results and provide a rationale for the choice(s). If meta-analysis was performed, describe the model(s), method(s) to identify the presence and extent of statistical heterogeneity, and software package(s) used.	12
	13e	Describe any methods used to explore possible causes of heterogeneity among study results (e.g. subgroup analysis, meta-regression).	4
	13f	Describe any sensitivity analyses conducted to assess robustness of the synthesized results.	NO

Reporting bias assessment	14	Describe any methods used to assess risk of bias due to missing results in a synthesis (arising from reporting biases).	12
Certainty assessment	15	Describe any methods used to assess certainty (or confidence) in the body of evidence for an outcome.	NO
<b>RESULTS</b>			
Study selection	16a	Describe the results of the search and selection process, from the number of records identified in the search to the number of studies included in the review, ideally using a flow diagram.	Figure 1
	16b	Cite studies that might appear to meet the inclusion criteria, but which were excluded, and explain why they were excluded.	Table A6, page 47
Study characteristics	17	Cite each included study and present its characteristics.	Table 1
Risk of bias in studies	18	Present assessments of risk of bias for each included study.	12
Results of individual studies	19	For all outcomes, present, for each study: (a) summary statistics for each group (where appropriate) and (b) an effect estimate and its precision (e.g. confidence/credible interval), ideally using structured tables or plots.	Table 2- 6
Results of syntheses	20a	For each synthesis, briefly summarize the characteristics and risk of bias among contributing studies.	NO
	20b	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each the summary estimate and its precision (e.g. confidence/credible interval) and measures of statistical heterogeneity. If comparing groups, describe the direction of the effect.	Table 2-4, plots
	20c	Present results of all investigations of possible causes of heterogeneity among study results.	Plots
	20d	Present results of all sensitivity analyses conducted to assess the robustness of the synthesized results.	NO
Reporting biases	21	Present assessments of risk of bias due to missing results (arising from reporting biases) for each synthesis assessed.	

Certainty of evidence	22	Present assessments of certainty (or confidence) in the body of evidence for each outcome assessed.	NO
<b>DISCUSSION</b>			
Discussion	23a	Provide a general interpretation of the results in the context of other evidence.	27
	23b	Discuss any limitations of the evidence included in the review.	26
	23c	Discuss any limitations of the review processes used.	22
	23d	Discuss implications of the results for practice, policy, and future research.	27
<b>OTHER INFORMATION</b>			
Registration and protocol	24a	Provide registration information for the review, including register name and registration number, or state that the review was not registered.	2
	24b	Indicate where the review protocol can be accessed, or state that a protocol was not prepared.	NO
	24c	Describe and explain any amendments to information provided at registration or in the protocol.	NO
Support	25	Describe sources of financial or non-financial support for the review, and the role of the funders or sponsors in the review.	24
Competing interests	26	Declare any competing interests of review authors.	24
Availability of data, code and other materials	27	Report which of the following are publicly available and where they can be found: template data collection forms; data extracted from included studies; data used for all analyses; analytic code; any other materials used in the review.	NO

------------------	------------------	---------	---------	----	---------	----	---------	---------	----	---------	----	----	----	----	----	------

Was the research question or objective in this paper clearly stated?

Was the study population clearly specified and defined

Was the participation rate of eligible persons at least 50%?

Were all the subjects selected or recruited from the same or similar populations (including the same time period)? Were inclusion and exclusion criteria for being in the study prespecified and applied uniformly to all participants?

Was a sample size justification, power description, or variance and effect estimates provided?

For the analyses in this paper, were the exposure(s) of interest measured prior to the outcome(s) being measured?

Was the timeframe sufficient so that one could reasonably expect to see an association between exposure and outcome if it existed?

For exposures that can vary in amount or level, did the study examine different levels of the exposure as related to the outcome (e.g., categories of exposure, or exposure measured as continuous variable)?

Were the exposure measures (independent variables) clearly defined, valid, reliable, and implemented consistently across all study participants?

Was the exposure(s) assessed more than once over time?

Were the outcome measures (dependent variables) clearly defined, valid, reliable, and implemented consistently across all study participants?

Were the outcome assessors blinded to the exposure status of participants?

Was loss to follow-up after baseline 20% or less?

Were key potential confounding variables measured and adjusted statistically for their impact on the relationship between exposure(s) and outcome(s)?

\*CD, cannot determine; NA, not applicable; NR, not reported

Table A3: Risk of bias of case series studies

Study ID	Study design	1	2	3	4	5	6	7	8	9	Global quality
Brenes Chacón	Case series	No	No	NR	NR	NA	No	NR	No	No	Poor
Gutiérrez Hidalgo	Case series	No	No	NR	CD	NA	No	NR	No	No	Poor
Luna Muñoz	Case series	Yes	Yes	CD	Yes	NA	Yes	Yes	No	No	Fair
De Farías	Case series	Yes	Yes	NR	Yes	NA	Yes	NR	No	Yes	Fair
Coll- Vela	Case series	Yes	Yes	NR	Yes	NA	Yes	Yes	NR	Yes	Fair
Duarte Neto	Case series	No	No	NR	Yes	NA	Yes	NA	No	Yes	Poor
Sandoval	Case series	Yes	Yes	NR	Yes	NA	Yes	CD	No	Yes	Fair
Coila Paricahua	Case series	Yes	No	NR	Yes	NA	No	Yes	No	No	Poor
Fontes	Case series	Yes	No	NR	Yes	NA	Yes	CD	Yes	Yes	Fair
Del Aguila	Case series	Yes	CD	NR	Yes	NA	No	CD	No	Yes	Fair
Alvarez	Case series	Yes	Yes	CD	Yes	NA	Yes	Yes	Yes	Yes	Good
Niño Taravilla	Case series	Yes	Yes	CD	Yes	NA	No	Yes	Yes	Yes	Fair
Ivankovich Escoto	Case series	Yes	No	NR	Yes	NA	No	No	No	No	Poor

Was the study question or objective clearly stated?

Was the study population clearly and fully described, including a case definition?  
 Were the cases consecutive?  
 Were the subjects comparable?  
 Was the intervention clearly described?  
 Were the outcome measures clearly defined, valid, reliable, and implemented consistently across all study participants?  
 Was the length of follow-up adequate?  
 Were the statistical methods well-described?  
 Were the results well-described?  
 \*CD, cannot determine; NA, not applicable; NR, not reported

Table A4: Risk of bias case control study

Study ID	Study design	1	2	3	4	5	6	7	8	9	10	11	12	Global quality
Rosanova	Case control	Yes	Yes	No	Yes	Yes	Yes	No	Yes	No	Yes	No	Yes	Fair

Was the research question or objective in this paper clearly stated and appropriate?  
 Was the study population clearly specified and defined?  
 Did the authors include a sample size justification?  
 Were controls selected or recruited from the same or similar population that gave rise to the cases (including the same timeframe)?

Were the definitions, inclusion and exclusion criteria, algorithms or processes used to identify or select cases and controls valid, reliable, and implemented consistently across all study participants?

Were the cases clearly defined and differentiated from controls?

If less than 100 percent of eligible cases and/or controls were selected for the study, were the cases and/or controls randomly selected from those eligible?

Was there use of concurrent controls?

Were the investigators able to confirm that the exposure/risk occurred prior to the development of the condition or event that defined a participant as a case?

Were the measures of exposure/risk clearly defined, valid, reliable, and implemented consistently (including the same time period) across all study participants?

Were the assessors of exposure/risk blinded to the case or control status of participants?

Were key potential confounding variables measured and adjusted statistically in the analyses? If matching was used, did the investigators account for matching during study analysis?

\*CD, cannot determine; NA, not applicable; NR, not reported

Table A5: studies excluded during full-text screening phase

<b>Author</b>	<b>n</b>	<b>Study design</b>	<b>Reason for exclusion</b>
Caro Domínguez <sup>63</sup>	37	Case series	No specific information from LAC
Lindan <sup>64</sup>	38	Case series	No MIS-C in children from LAC
Kehar <sup>65</sup>	91	Cohort	No specific information from LAC
Bautista Rodríguez <sup>66</sup>	183	Case series	No specific information from LAC
