

Supplemental Material S3. Comparative statistics for repeated-measures ANOVA evaluating impact of task and age on pharyngeal contractile integral.

Comparison	Test statistic	<i>p</i>-value	Partial η^2
Task	$F_{1,54} = 30.339$	< .001*	.360
Task \times Age	$F_{1,54} = 1.943$.169	.035

*Statistically significant relationship.
