

Supplemental Material S4. Comparative statistics for repeated-measures ANOVA evaluating impact of task and age on upper esophageal sphincter minimum pressure.

Comparison	Test statistic	<i>p</i>-value	Partial η^2
Task	$F_{1,54} = 5.417$.024*	.091
Task \times Age	$F_{1,54} = 5.142$.027*	.087

*Statistically significant relationship.
