

Supplemental Table 1. Descriptive information on rates of abnormal screenings for each group by neurodevelopmental outcome.

| Cognitive tests (% abnormal screening) | Group | | | |
|----------------------------------------|---------------------------------|------------------------------|----------------------------------|------------------------------|
| | High-risk SCD +preterm (n = 20) | High-risk SCD +term (n = 60) | Lower-risk SCD +preterm (n = 11) | Lower-risk SCD +term (n= 98) |
| Decision Speed | 36% (7/19) | 16% (9/55) | 9% (1/11) | 10% (10/96) |
| Applied Problems | 5% (1/20) | 14% (8/59) | 9% (1/11) | 2% (2/98) |
| Grammatical Understanding | 25% (5/20) | 13% (8/60) | 0% (0/11) | 9% (9/98) |
| Oral Vocabulary | 30% (6/20) | 8% (5/60) | 0% (0/11) | 8% (8/98) |
| Word Discrimination | 39% (7/18) | 16% (9/57) | 0% (0/11) | 19% (18/97) |
| Letter-Word Identification | 15% (3/20) | 7% (4/59) | 9% (1/11) | 1% (1/98) |
| DVTMI | 21% (4/19) | 17% (10/60) | 0% (0/11) | 9% (9/98) |

Note.

DVTMI = Beery Developmental Test of Visual-Motor Integration
