

Supp file 1.
Prevalence of RNAemia and Seropositive patients depending on the presence of N-antigenemia

*Patients with antigenemia showed higher levels of viral RNA in plasma (copies of N1 /mL: 250 (1449) vs 4432 (29096) [mean, (SD)]

** Patients with antigenemia showed lower levels of anti SARS-CoV-2 N antibodies (AUs/mL: 3.9 (2.8) vs 0.9 (1.7) [mean, (SD)]

*** Patients with antigenemia showed lower levels of anti SARS-CoV-2 S1 antibodies (AUs/mL: 2203 (5333) vs 189 (938)[mean, (SD)]
