

Supplementary information, Figure S13

Supplementary information, Figure S13. The gene expression of the V and J gene segments in glioma after RT. a, Left panel, the gene expression of the V gene segments in tumor from Ctr mRNA or VEGF-C mRNA groups on day 22 after

inoculation (n = 3); Right panel, frequency of V gene segments in tumor from Ctr mRNA or VEGF-C mRNA groups on day 22 after inoculation (n = 3). b, Left panel, the gene expression of the J gene segments in tumor from Ctr mRNA or VEGF-C mRNA groups on day 22 after inoculation (n = 3); Right panel, frequency of J gene segments in tumor from Ctr mRNA or VEGF-C mRNA groups on day 22 after inoculation (n = 3). Data are presented as means \pm SEM. *P <0.05, **P <0.01; Student's t test (a–b).
