

Supplementary materials

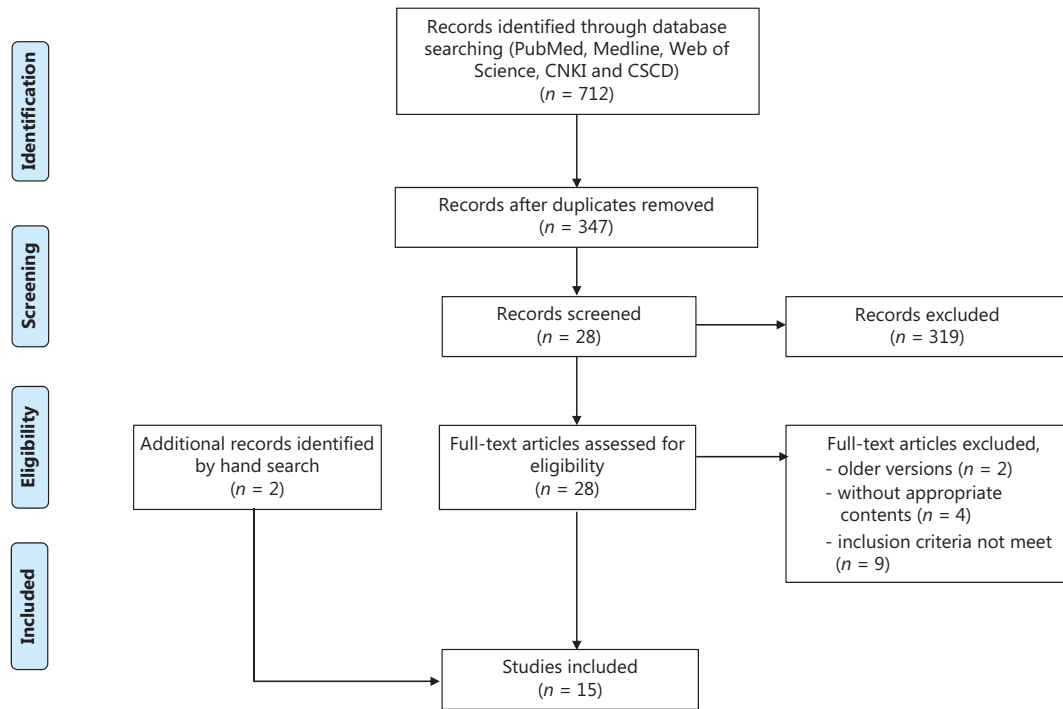

Figure S1 PRISMA flow chart of the included guidelines/consensus. The medical subject heading searches used all combinations of the following index terms: thyroid neoplasms, guidelines, and consensus. Articles not available in English or Chinese editions were excluded. Guidelines regarding other types of histology/diseases, other populations (e.g., pediatric and pregnant populations), diagnosis, or RAIA alone were excluded.

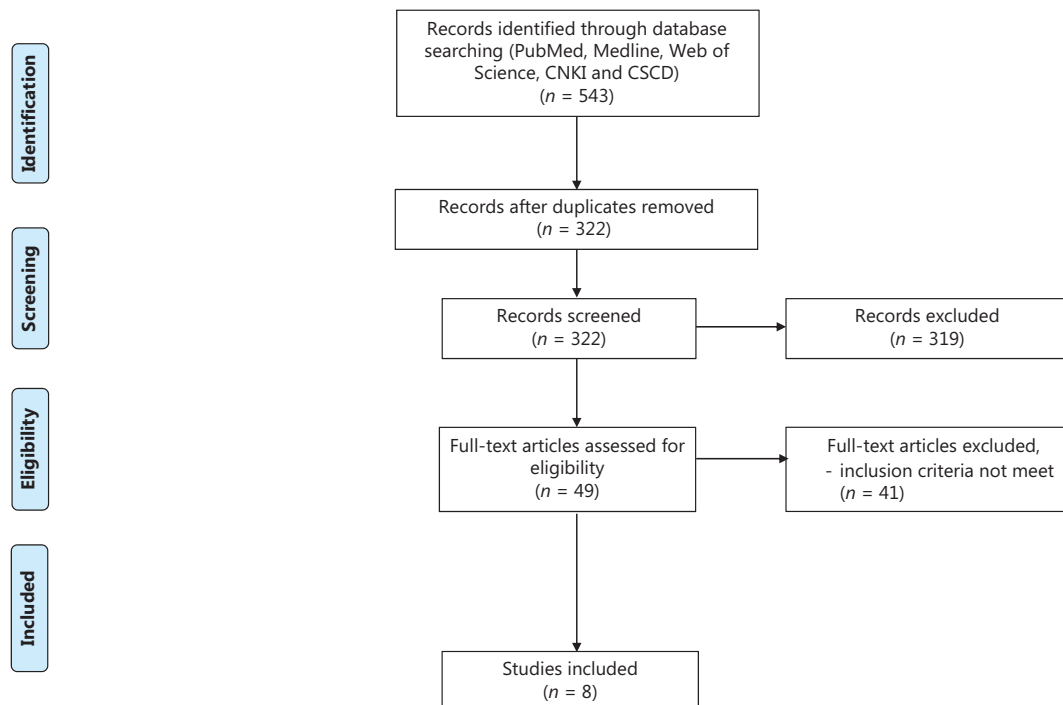

Figure S2 PRISMA flow chart of the active surveillance cohorts.
