[a]PD (Psychological Distress) is Kessler 6-item Distress of 5-12
[b]SPD (Serious Psychological Distress) is Kessler 6-item Distress of 13-24
*Ref group is Kessler 6-item Distress of 0-4
PR=Prevalence Ratio; CI=Confidence Interval;
Adjusted for age (18-30, 31-49, ≥50 years), educational attainment (<high school, high school graduate, some college, ≥college), annual household income (<$35,000, $35,000-$74,999, $75,000+), occupational class (professional/management, support services, laborers), region of residence (Northeast, Midwest, South, West), alcohol consumption (never, former, current), "ideal" cardiovascular health (never smoking/quit >12 months prior to interview, BMI 18.5-<25 kg/m2, meeting physical activity guidelines, and no prior diagnosis of dyslipidemia, hypertension, or diabetes/prediabetes), marital/co-habiting status (married/living with partner or cohabitating, divorced/widowed/separated, single/no live-in partner), employment status (unemployed, employed), and self-rated health status (excellent/very good, good, fair/poor). All model additionally adjusted for sex (woman, man).
Overall models adjusted for race/ethnicity
Note. All estimates are weighted for the survey's complex sampling design. Boldface indicates statistically significant results at the 0.05 level.
