Table S1. Control mouse diet (Ca:ratio = 1.5)

AIN-93M Maintenance Purified Diet (also known as #5801-M) 58M1

DESCRIPTION		NUTRITIONAL PROFILE¹					
TestDiet® AIN-93M Maintenance Purified Diet is the maintenance diet for rodents recommended by the American Institute of Nutrition. It is formulated to substitute for the previous version (AIN-76A) to improve animal performance.		Protein, % 13.0 Arginine, % 0.49 Histidine, % 0.36 Isoleucine, % 0.67 Leucine, % 1.21 Lysine, % 1.02 Methionine, % 0.36 Cystine, % 0.23 Phenylalanine, % 0.67 Tyrosine, % 0.71 Threonine, % 0.54 Tryptophan, % 0.15 Valine, % 0.80 Alanine, % 0.39 Aspartic Acid, % 0.90 Glutamic Acid, % 2.86 Glycine, % 0.27 Proline, % 1.65 Serine, % 0.77 Taurine, % 0.00					
Product Forms Available*		Catalog #					
1/2" Pellet		7603					
1/2" Pellet, Irradiated		1810541					
3/16" Pellet		1812811					
Meal		1810540					
Meal, Irradiated		1810542					
<i>*Other Forms Available By Request</i>							
TYPICAL ANALYSIS							
Protein.....		13.06%					
Fat.....		4.0%					
Fiber.....		5.0%					
Carbohydrate.....		73.8%					
Metabolizable Energy.....		3.83					
INGREDIENTS (%)							
Corn Starch		46.5692					
Dextrin		15.5000					
Casein - Vitamin Free		14.0000					
Sucrose		10.0000					
Powdered Cellulose		5.0000					
Soybean Oil		4.0000					
AIN 93M Mineral Mix		3.5000					
AIN 93 Vitamin Mix		1.0000					
Choline Bitartrate		0.2500					
L-Cystine		0.1800					
t-Butylhydroquinone		0.0008					
FEEDING DIRECTIONS							
Feed ad libitum to mice and rats. Plenty of fresh, clean water should be available at all times.							
CAUTION: Perishable, upon receipt store in a cool dry place, refrigeration recommended.							
For laboratory animal experimental use only, NOT for human consumption.

Table S2. Experimental mouse diet (Ca:P ratio = 10.5)

Mod AIN93M w/ 0.11% Phosphorus and 1.5% Calcium **5BLX**

DESCRIPTION		NUTRITIONAL PROFILE ¹							
Modification of TestDiet® AIN-93M Semi-Purified Diet with 0.11% Phosphorus and 1.5% Calcium.									
Storage conditions are particularly critical to TestDiet® products, due to the absence of antioxidants or preservative agents. To provide maximum protection against possible changes during storage, store in a dry, cool location. Storage under refrigeration (2° C) is recommended. Maximum shelf life is six months. (If long term studies are involved, storing the diet at -20° C or colder may prolong shelf life.) Be certain to keep in air tight containers.

From:		kcal	%						
Protein		0.517	13.9						
Fat (ether extract)		0.368	9.9						
Carbohydrates		2.832	76.2						
1. Formulation based on calculated values from the latest ingredient analysis information. Since nutrient composition of natural ingredients varies and some nutrient loss will occur due to manufacturing processes, analysis will differ accordingly. Nutrients expressed as percent of ration on an As-Fed basis except where otherwise indicated.									
2. Energy (kcal/gm) - Sum of decimal fractions of protein, fat and carbohydrate x 4.94 kcal/gm respectively.									
FEEDING DIRECTIONS									
Feed ad libitum. Plenty of fresh, clean water should be available at all times.									
CAUTION: Perishable - store properly upon receipt. For laboratory animal use only; NOT for human consumption.

Table S3. Skull landmarks (cranium + midface)

Landmark	Description
1	Nasal bone's most anterior suture
2	Nasal bone's most posterior suture
3	Frontal bone's most posterior suture
4	Parietal bone's most posterior suture
5-6	Frontal-squamosal intersection at temporal crest
7-8	The intersection between parietal, occipital and squamosal bones
9-10	Joining of squamosal body to zygomatic process
11-12	Most anterior suture of jugal bone and the maxillary zygomatic process
13-14	Mid zygomatic bone
15-16	Intersection of frontal process of maxilla with frontal and lacrimal bones
17-18	Midpoint of the anterior zygomatic process (dorsal view)
19-20	Most inferior point of the zygomatic process
21-22	Anterior-most point at intersection of premaxillae and nasal bones
23-24	Most superior point of the incisor alveolus
25-26	Most inferior anterior point of the incisor alveolus
27-28	Most inferior lateral point on premaxilla-maxilla suture
29-30	Most anterior point of the first molar alveolus
31-32	Most posterior point of the third molar alveolus
33-34	Most anterior point of the anterior palatine foramen
35-36	Most posterior point of the anterior palatine foramen
37-38	Most inferior aspect of posterior tip of medial pterygoid process
39	Line point of the suture between occipital and basisphenoid bones
40	Line point of the suture between basisphenoid and presphenoid bones
41	Line point of the suture between palatine bones.
42	Foramen magnum most anterior point, basion
43	Foramen magnum most posterior point, bregma

Table S4. Descriptive statistics and unpaired t-test results of skull measurements

Variable		Control (Mean ± SD)	Experiment (Mean ± SD)	p-value
Cranial Centroid Size (μm)	Total	42480 ± 2197	41017 ± 3181	0.2491 ns
	Males	40102 ± 186.9	44244 ± 841.4	<0.0001****
	Females	44064 ± 1065	38691 ± 1224	<0.0001****
Midface Centroid Size (μm)	Total	14903 ± 919.1	14370 ± 1368	0.3221 ns
	Males	13918 ± 133.6	15791 ± 419.9	<0.0001****
	Females	15560 ± 465.9	13372 ± 509.3	<0.0001****
Cranial Length (CL) (μm)	Total	21792 ± 1161	20878 ± 1475	0.0892 ns
	Males	20473 ± 253.3	22531 ± 263.1	<0.0001****
	Females	22671 ± 260.3	19777 ± 484.2	<0.0001****
Midface Length (ML) (μm)	Total	7288 ± 546.9	6958 ± 684.5	0.2495 ns
	Males	6742 ± 95.2	7727 ± 193.3	<0.0001****
