

Supplementary materials F1 the extended results of 60 ferroptosis-related gene expression and the overall survival curve in the TCGA-OC data.

Supplementary materials F2 Gene mutations of tumor samples in the TCGA-OC data and its regulation on 60 ferroptosis-related genes. (A) Waterfall chart of genetic mutations; (A-H) effects of TP53 mutations on the expression of ferroptosis-related genes; (I-L) effects of TP53 mutations on the expression of ferroptosis-related genes.

Supplementary materials F3. Further validation verification of the this in another OC tumor dataset.
