

Part II. Qualitative Interview Question Guide

Interviewer: We are part of a research team from Stanford brought in to help improve GOMOMS training programs. This interview is being conducted as part of an evaluation process to help us plan future GOMOMS training programs. We will be interviewing about 30 residents. The interviews will be recorded, transcribed, and compiled for the purposes of research. Nothing you say will ever be identified with you personally, however we would like to link your interview answers to your online survey answers using your phone number. As we go through the interview, if you have any questions about why we are asking you something, please ask us. Also, if there is anything you do not want to answer, please just let us know.

0. Do you provide your verbal consent to participate in the interview? Do you have any questions before we begin?
