

# THE LANCET

## Healthy Longevity

### Supplementary appendix

This appendix formed part of the original submission and has been peer reviewed.  
We post it as supplied by the authors.

Supplement to: Shrotri M, Krutikov M, Nacer-Laidi H, et al. Duration of vaccine effectiveness against SARS-CoV-2 infection, hospitalisation, and death in residents and staff of long-term care facilities in England (VIVALDI): a prospective cohort study. *Lancet Healthy Longev* 2022; **3**: e470–80.

## SUPPLEMENTARY MATERIAL

### Figure S1

Cycle threshold values of a) Nucleocapsid and b) ORF1ab gene targets from viral isolates, by vaccination status

### Figure S2

Ct values of a) Nucleocapsid and b) ORF1ab gene targets in unvaccinated individuals before and during Delta variant predominance.

### Table S1

Person-time at risk and numbers of recorded PCR test results for staff and residents by prior COVID-19 status and vaccination exposure group.

### Table S2

Vaccine effectiveness estimates against infection, hospitalisation, and death for exposed residents, using the unvaccinated exposed group as the comparator.

### Table S3

Vaccine effectiveness estimates against infection for exposed staff, using the unvaccinated exposed group as the comparator; and descriptive data on hospitalisations and deaths in exposed staff.

### Table S4

Crude rates, adjusted hazard ratios, and vaccine effectiveness against infections, stratified by vaccine type, in unexposed residents and staff.

### Table S5

Crude rates, adjusted hazard ratios, and vaccine effectiveness against infections in the pre-Delta period in unexposed residents and staff.

### Table S6

Crude rates, adjusted hazard ratios, and vaccine effectiveness against hospitalisations, stratified by vaccine type, in unexposed residents and staff.

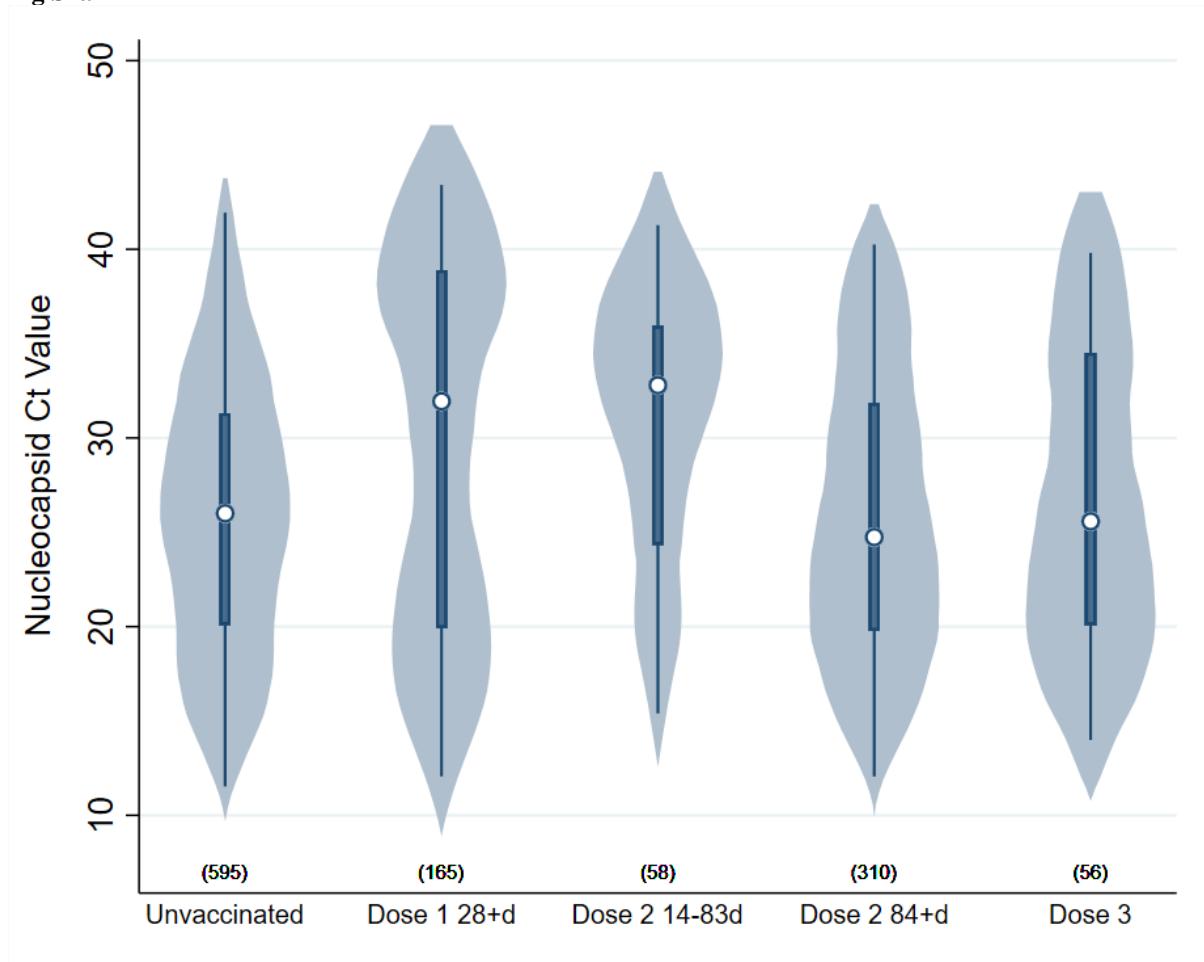

### Table S7

Crude rates, adjusted hazard ratios, and vaccine effectiveness against deaths, stratified by vaccine type, in unexposed residents.

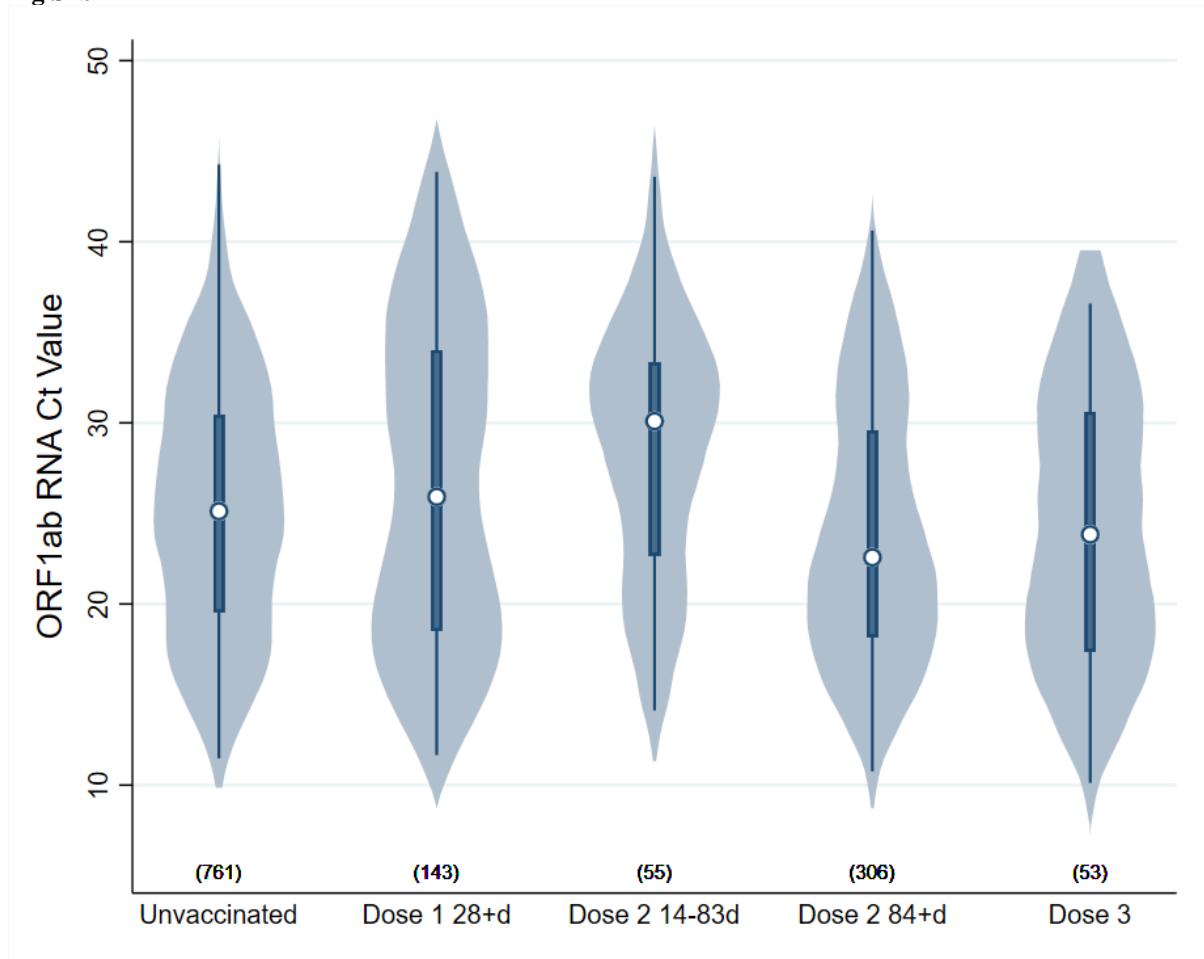

### Table S8

Cycle threshold values of Nucleocapsid and ORF1ab gene targets from viral isolates, by vaccination status across the whole study period; and in unvaccinated individuals before and during Delta variant predominance.

\*This category refers to individuals who received the AZ vaccine for Doses 1 and 2, followed by an mRNA vaccine as Dose 3.

\*\*Where there were no events in a cell we have not included hazard ratios or vaccine effectiveness estimates due to sparse data.

**Table S8**

Vaccination Status	Nucleocapsid RNA target			ORF1ab RNA target		
	n	Median Ct	IQR	n	Median Ct	IQR
Unvaccinated	595	26.0	20.1, 31.3	761	25.1	19.6, 30.4
Dose 1 28+d	165	31.9	19.9, 38.9	143	25.9	18.5, 34.0
Dose 2 14-83d	58	32.8	24.4, 35.9	55	30.1	22.7, 33.3
Dose 2 84+d	310	24.7	19.8, 31.8	306	22.6	18.2, 29.6
Dose 3	56	25.6	20.1, 34.5	53	23.8	17.4, 30.6
Unvaccinated pre-Delta	516	26.4	20.5, 31.7	676	25.4	20.2, 30.6
Unvaccinated Delta	79	22.1	18.3, 27.9	85	21.6	17.0, 28.0
