GTE, green tea extract; PLC, placebo.

* Number of days since entry into the study; 0 at baseline screening liver function test.

† All numbers in unshaded cells were ALT values tested at baseline or off-treatment period.

¹ First-time detected ALT > 90 U/L during treatment; green shading indicating the liver function tests were done in during the period of GTE or placebo pill intake.

² Second-time detected ALT >90 U/L after ALT returned to below 1.5 times upper limit normal (ULN) and resumed GTE intake.

³ Third-time detected ALT > 90 U/L after ALT returned to below 1.5 times ULN and resumed GTE intake second time.

⁴ Fourth-time detected ALT > 90 U/L after ALT returned to below 1.5 time ULN and resumed GTE intake third time.
