

**Supplemental Table 2. Demographic Data of the Participants in Group B: Physical Ability, Age, and Cognitive Test Results.**

Variables	Total (n = 412)	AD (n = 367)	DLB (n = 45)	<i>P</i> -value
Sex, female (%)	64.6	66.2	51.1	
Age (years)	69.26 (4.96)	69.20 (5.00)	69.69 (4.70)	N.S.
BMI (kg/m <sup>2</sup> )	21.63 (3.46)	21.62 (3.40)	21.66 (3.97)	N.S.
MMSE	21.80 (2.74)	21.62 (2.58)	23.29 (3.51)	<0.01
GDS	3.68 (2.64)	3.52 (2.50)	5.21 (3.35)	<0.01
BI	98.19 (6.88)	98.42 (6.59)	96.10 (8.91)	N.S.
IADL				
Male	3.80 (0.98)	3.85 (0.96)	3.47 (1.07)	N.S.
Female	6.47 (1.55)	6.50 (1.57)	6.19 (1.37)	N.S.
Frailty (%)	14.10	12.00	31.10	<0.01

Data are presented as the mean (standard deviation) or %. AD: Alzheimer's disease, BI: Barthel Index, BMI: body mass index, DLB: dementia with Lewy bodies, GDS: Geriatric Depression Scale, IADL: Instrumental Activities of Daily Living, MMSE: Mini-Mental State Examination, N.S.: not significant.  $P < 0.01$ : statistically significant difference between the AD and the DLB groups.
