

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Sample metadata and sequencing accession numbers.

File Name: Supplementary Data 2

Description: Genome mapping data by sample, including nuclear and mitochondrial genome coverage, and deamination statistics.

File Name: Supplementary Data 3

Description: Description of genes in regions of high genetic differentiation between samples from China and Uganda.

File Name: Supplementary Data 4

Description: Description of genes in regions of high genetic differentiation between samples from Uganda and Honduras.

File Name: Supplementary Data 5

Description: Description of genes in regions of high genetic differentiation between samples from China and Honduras.

File Name: Supplementary Data 6

Description: Description of genes in regions of high genetic differentiation between samples from Baboons and Uganda.
