Table of contents

Table S1.....2

1.

Table S1. Plasma levels of ammonia, bilirubin and ALT in a BDL rat model with and without OP treatment as we previously reported in Hadjihambi et al. 2017.

Parameters	Sham (n=22)	BDL (n=26)	BDL+OP (n=14)
Ammonia (umol/L)	56±3	141±4	60±2
Bilirubin (umol/L)	5±0.5	205±3	161±6
ALT (U/L)	11±0.4	130±2	87±4
