

Supplementary Figure 1. Comparisons of the bacterial profiles (PCA, PERMANOVA) and bacterial diversity (Shannon Diversity Index) among the three groups - Delmopinol, CHX, and Placebo - per timepoint: (A) baseline visit; (B) follow-up after 1 month of mouthrinse use (FU1); (C) follow-up three months since the start of the therapy and two months after the end of the mouthrinse use (FU2).
