

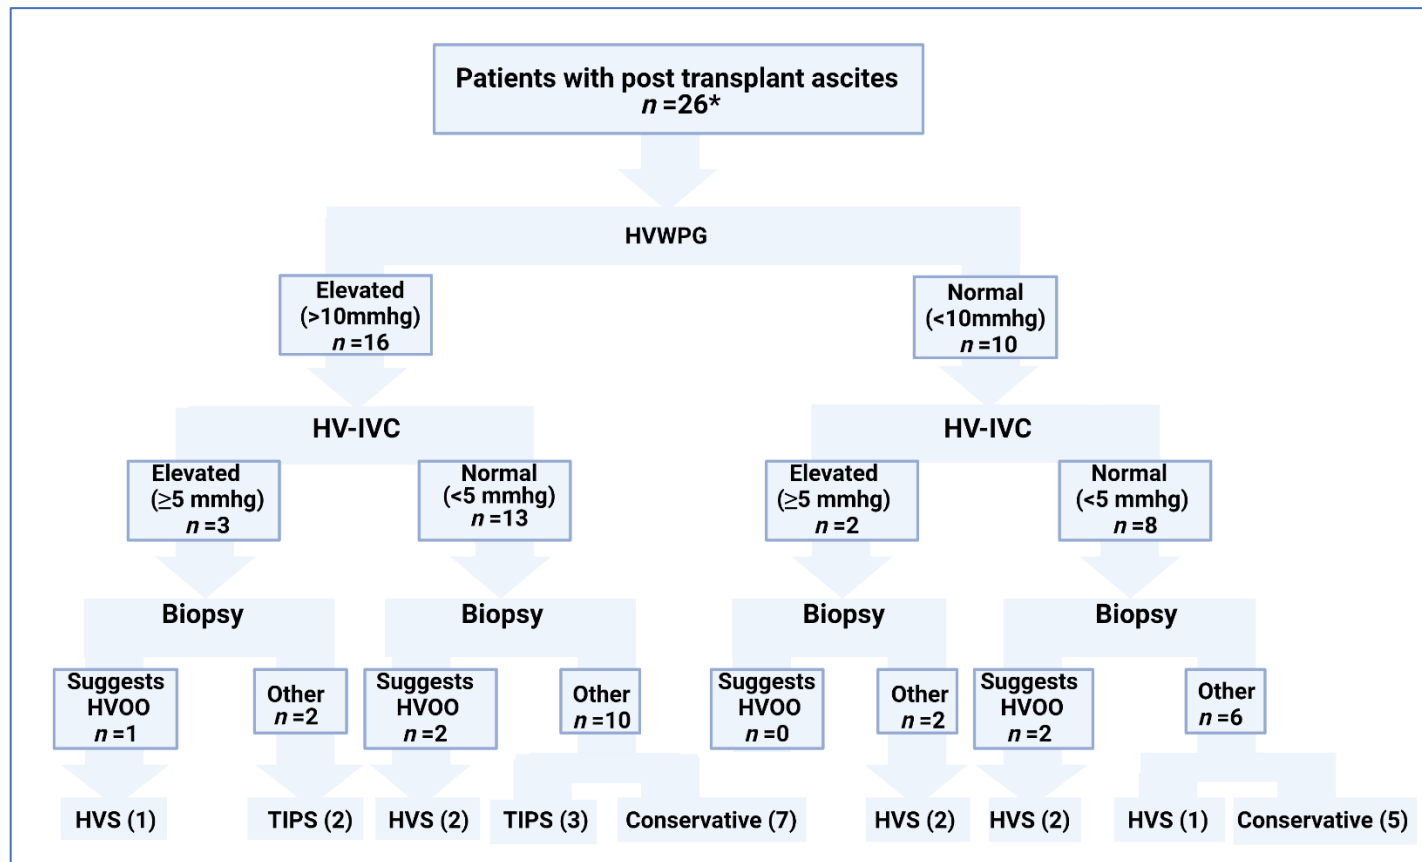

Figure S1

\*Patients that had more than one endovascular intervention were excluded from this figure

**SDC 1 Legend:** Flow diagram demonstrating the series based on HVWPG and HV-IVC pressure measurements, followed by biopsy results. HVOO = Hepatic venous outflow obstruction, HVS = Hepatic venous stent, HVWPG = Hepatic vein wedge pressure gradient, HV-IVC = Hepatic vein – Inferior vena cava, TIPS = Transjugular intrahepatic portosystemic shunt
